Rethinking The Nature Of War:

Rethinking the Nature of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States This book re evaluates these criticisms not only by scrutinising Clausewitz's arguments and their applicability but also by a careful reading of the criticism itself In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war

War Beatrice Heuser, 2022 War examines the nature of war and presents a genealogy of Western ideas and practices spanning over 2500 years

The Strategic Use of Force in Counterinsurgency Miles Kitts, 2020-01-13 The Strategic Use of Force in Counterinsurgency Find Fix Fight focuses on how to understand the relationship between the use of force and the outcomes of such use Specifically there is debate as to how to evaluate counterinsurgency conflicts and what prescriptions flow from that evaluation The Neo Classicist school emphasises prescriptions which are either directly from or inspired by Cold War counterinsurgency efforts undertaken by anti communist states The Revisionist school focuses on how best to evaluate the political dimensions of such conflicts This book finds that a third approach Reflective Action is best as it combines Neo Classicism's strength of issuing practical prescriptions with Revisionism's strength for conceptually evaluating counterinsurgency conflicts This conceptual debate is explicated in three cases They are the British counterinsurgency during the Malayan Emergency of the 1940s and 1950s American counterinsurgency in South Vietnam during the 1960s and 1970s and the Coalition counterinsurgency in Iraq during the 2000s

Rethinking Nature Aurélie Choné, Isabelle Hajek, Philippe Hamman, 2017-05-18 This textbook provides an overview of different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature or as part of or outside of nature

Rethinking Nature Bruce V. Foltz, Robert Frodeman, 2004-11-02 Rethinking Nature brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems This far reaching and lively volume affords firm ground for thinking about the multiple ways that humans engage nature Contributors are David Abram Edward S Casey Daniel Cerezuelle Ron Cooper Bruce V Foltz Robert Frodeman Trish Glazebrook James Hatley Robert Kirkman Irene J Klaver Alphonso Lingis Kenneth Maly Diane Michelfelder Elaine P Miller Robert Mugerauer Stephen David Ross John Sallis

Ingrid Leman Stefanovic Bruce Wilshire David Wood and Michael E Zimmerman **Ecocritical Readings Rethinking Nature and Environment** Shivani Jha, 2015-05-18 Through a reading of selected literary texts Shivani Jha integrates nature and society and demonstrates the outcome when one is severed from the other The first two chapters on *The Hungry Tide* and *Walden* take into account the dispossessed aspect of both the human and the nonhuman worlds and point towards environmental conservation and sustainable development The next two chapters based on the works of T S Eliot and Herman Melville highlight the anthropocentric attitude of humans the havoc it wreaks on the nonhuman world and the impact it has on the human psyche The last two chapters are readings in deep ecology that dwell on works of Wordsworth and Hemingway directing the readers gaze to the pristine natural world and the harmonious relationship that the humans are capable of having with it The focus of the book is on reviewing the relationship of humans and environment and the need for recognizing the rights of the nonhuman the aim that underlies the theoretical paradigm of ecocriticism Modern Insurgencies and Counterinsurgencies Kaushik Roy, 2022-08-25 This book provides a historical study of the theory and praxis of modern insurgencies and counterinsurgencies COIN Modern Insurgencies and Counterinsurgencies A Global History shows that the insurgents can wage a variety of conflicts at times conventional war which lies at the high end of their spectrum and terrorism which is located at the lowest end of their scale When insurgencies reach a certain critical threshold the insurgents shift their strategy from guerrilla irregular war to conventional regular war and at that point the level of conflict escalates to the level of civil war When the insurgents face intense state repression they revert to terrorist activities When the insurgents wage guerrilla war they can be called guerrillas The variety of wars conducted by the insurgents is termed as unconventional war This volume demonstrates that the insurgents in the modern world had been motivated by a trinity greed grievances and ideology Kaushik Roy traces the origin of modern insurgencies and COIN from the sixteenth century by focusing on regions outside Western Eurasia He also touches on the twin interrelated phenomena of modern insurgencies and COIN metastasising into something new at the beginning of the Information Revolution at the end of the twentieth century This volume will be of interest to researchers and research students of history British Empire imperial studies Asian studies security studies strategic studies and war and conflict studies **Rethinking Nature Relations** E. C.H. Keskitalo, 2023-10-06 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com This incisive book explores the implications of the nature culture binary and how it impacts the ways in which we think about nature Bringing together and building on extensive work from varied fields E. C. H. Keskitalo maps the many understandings of nature across diverse traditions and histories and demonstrates that nature relations must be understood in connection to power *Nietzsche on War* Rebekah S. Peery, 2009 Prof Peery offers new interpretations of Nietzsche's ideas regarding power values nature contrariety and language truth and deception religion experience sexuality and sexual politics that could provide new and provocative approaches toward dealing with the rising

menace of war She shows that had Nietzsche directly focussed on questions concerning war his interpretations of its destructive corrosive nature would have matched his critique of Christianity in substance and intensity Publisher's website

Theorizing War N. Mansfield, 2008-09-30 War is always defined in relation to something else peace society civilisation friendship or love What is the relationship between war and its other Are they opposites or versions of one another This book surveys four hundred years of thinking about the definition of war from Hobbes and Clausewitz to Badiou and Žižek War Against Ourselves Jacklyn Cock, 2007-10 For many people nature means wilderness and wild animals It is experienced indirectly through magazines and television programs or through visiting the highly managed environments of national parks Nature however is not external separate from the world of people we live in nature and interact with it daily In this book Jacklyn Cock describes how these intricate and complex interconnections seen and unseen are often ignored Each of the ten chapters examines an aspect of our relationship with nature The War Against Ourselves compels us to reexamine our relationship with nature to change our practices and dissolve present binary divisions such as people vs animals economic growth vs environmental protection nature vs culture It demonstrates the need for an inclusive politics which brings together peace social and environmental justice activists who believe that another world is both possible and necessary Book cover

Nature at War Thomas Robertson, Richard P. Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other There is little doubt today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7 1941 The conflict was in the words of historians Allan Millett and Williamson Murray a war to be won As the world's largest industrial power the United States put forth a supreme effort to produce the weapons munitions and military formations essential to achieving victory When the war finally ended the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki upwards of 60 million people had perished in the inferno Of course the human toll represented only part of the devastation global environments also suffered greatly The growth and devastation of the Second World War significantly changed American landscapes as well The war created or significantly expanded a number of industries put land to new uses spurred urbanization and left a legacy of pollution that would in time create a new term Superfund site **After Iraq** Colin S. Gray, 2009 A sustainable national security strategy is feasible only when directed by a sustainable national security policy In the absence of policy guidance strategy has to be meaningless The only policy that meets both the mandates of American culture and the challenges of the outside world is one that seeks to promote the necessary mission of guarding and advancing world order Dr Colin Gray considers and rejects a policy that would encourage the emergence of a multipolar structure for global politics He argues that multipolarity not only would fail to maintain order it would also promote conflict among the inevitably rival great powers In addition he suggests that Americans culturally are not comfortable with balance of

power politics and certainly would not choose to promote the return of such a system The monograph identifies the various pieces of the puzzle most relevant to national security strategy surfaces the leading assumptions held by American policymakers and strategists considers alternative national security policies and specifies the national security strategy Dr Gray concludes that America has much less choice over its policy and strategy than the public debate suggests He warns that the country's dominant leadership role in global security certainly will be challenged before the century is old p iii

Nature Wars Jim Sterba, 2013-11-12 For four hundred years explorers traders and settlers plundered North American wildlife in an escalating rampage but in the twentieth century an incredible turnaround took place Conservationists created wildlife sanctuaries restored habitats and imposed regulations on hunters and trappers Over decades they nursed many wild populations back to health Then after World War II something happened that conservationists hadn't foreseen sprawl People moved into suburbs and then kept moving outward All the while well meaning efforts to protect animals allowed wild populations to burgeon out of control causing damage costing billions degrading ecosystems and touching off disputes that polarized communities The result is a mix of people and wildlife that should be an animal lover's dream but often turns into a sprawl dweller's nightmare Deeply researched eloquently written and perceptively humorous Nature Wars expresses the need for organic reconnection with our natural ecosystem by offering a provocative look at how Americans created an inadvertent mess

Bodies of Violence Lauren B. Wilcox, 2015 According to conventional international relations theory states or groups make war and in doing so kill and injure people that other states are charged with protecting While it sees the perpetrators of violence as rational actors it views those who are either protected or killed by this violence as mere bodies ahistorical humans who breathe suffer and die but have no particular political agency In its rationalist variants IR theory only sees bodies as inert objects Constructivist theory argues that subjects are formed through social relations but leaves the bodies of subjects outside of politics as brute facts According to Wilcox such limited thinking about bodies and violence is not just wrong but also limits the capacity of IR to theorize the meaning of political violence By contrast to rationalist and constructivist theory feminist theory sees subjectivity and the body as inextricably linked This book argues that IR needs to rethink its approach to bodies as having particular political meaning in their own right For example bodies both direct violent acts violence in drone warfare for example and are constituted by practices that manage violence for example scrutiny of persons as bodies through biometric technologies and body scanners The book also argues that violence is more than a strategic action of rational actors as in rationalist theories or a destructive violation of community laws and norms as in liberal and constructivist theories Because IR theorizes bodies as outside of politics it cannot see how violence can be understood as a creative force for shaping the limits of how we understand ourselves as political subjects as well as forming the boundaries of our political communities By engaging with feminist theories of embodiment and violence Bodies of Violence provides a more nuanced treatment of the nexus of bodies subjects and violence than currently exists in the field

of international relations Governing Nature and the Making of World Order Elana Wilson Rowe,Paul Beaumont,Lucas de Oliveira Paes,2025-06-24 Available open access digitally under CC BY NC ND licence This book explores how recognition and governance of the environmental issues facing our planet is transforming local and global politics and governance

Listening to British Nature Michael Guida,2022 Listening to British Nature Wartime Radio and Modern Life 1914 1945 argues that trench warfare created new practices of listening to nature in order to cultivate an intimate connection with its vibrations to understand danger and to imagine survival In focusing on the sensing of sounds and rhythms this study demonstrates how nature retained its emotional potency as the pace of life seemed to increase and new man made sounds and sonic media appeared all around

Contested Natures Phil Macnaghten,John Urry,1998-03-06 Demonstrating that all notions of nature are inextricably entangled in different forms of social life the text elaborates the many ways in which the apparently natural world has been produced from within particular social practices These are analyzed in terms of different senses different times and the production of distinct spaces including the local the national and the global The authors emphasize the importance of cultural understandings of the physical world highlighting the ways in which these have been routinely misunderstood by academic and policy discourses They show that popular conceptions of and attitudes to nature are often contradictory and that there are no simple ways of prevailing upon people to save the environment

Military Ethics and the Changing Nature of Warfare Jean-Francois Caron,Marina Miron,2023-06-12 If war is a timeless reality of mankind the ways and means whereby it is conducted have nonetheless evolved over time due to new technologies and innovative military strategies For the most part however they have not challenged the ethical rules of warfare The rapid rise in the use of automated weapons the growing popularity of remotely controlled weapons the development in soldiers enhancement technologies of hybrid warfare and the impact of gender equality are all posing tremendous moral challenges affecting the traditional warrior ethos the justification of killing and criminal responsibility This begs the question to what degree are the ways and means of modern warfare keeping pace with the current technological evolutions and societal values Based upon a selection of presentations made at the 2022 annual conference of the International Society for Military Ethics in Europe Euroisme this book contains a variety of reflections on this question

Rethinking College Education George Allan,1997 Not a method of turning your degree back in and having your loans forgiven but an argument that by becoming vocational schools measured by reduced cost and efficient production colleges and universities are neglecting their essential purpose The reason for college education says Allan is to provide an environment within which students can absorb the moral practices that determine how they can acquire and evaluate knowledge best conduct their lives and become responsible adults He maintains that such learning requires imagination dialogue conversation and cultured intercourse
