Rethinking World Systems Diasporas Colonies And Interaction In Uruk Mesopotamia:

Rethinking World-Systems Gil J. Stein, 2022-08-16 The use of world systems theory to explain the spread of social complexity has become accepted practice by both historians and archaeologists Gil Stein now offers the first rigorous test of world systems as a model in archaeology arguing that the application of world systems theory to noncapitalist pre fifteenth century societies distorts our understanding of developmental change by overemphasizing the role of external over internal dynamics In this new study Stein proposes two complementary theoretical frameworks for the study of interregional interaction a distance parity model which views world systems as simply one factor in a broader range of intersocietal relations and a trade diaspora model which explains variation in exchange systems from the perspective of participant groups He tests his models against the archaeological record of Mesopotamian expansion into the Anatolian highlands during the fourth millennium B C Whereas some scholars have considered this Uruk expansion to be one of the earliest documented world systems Stein uses data from the site of Hacinebi in southeastern Turkey to support his alternate perspective Comparing economic data from pre and postcontact phases Stein shows that the Mesopotamians did not dominate the people of this distant periphery Such evidence argues Stein shows that we must look more closely at the local cultures of peripheries to develop realistic cross cultural models of variation in colonialism exchange and secondary state formation in ancient societies By demonstrating that a multitude of factors affect the nature and consequences of intersocietal contacts his book advocates a much needed balance between recognizing that no society can be understood in complete isolation from its neighbors and assuming the primacy of outside contact in a society s development

Anthropological Considerations of Production, Exchange, Vending and Tourism Donald C. Wood, 2017-08-25 Volume 37 of REA features eleven original articles organized in four different sections each focusing on a specific popular and significant theme in economic anthropology production exchange vending and tourism

Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon Instead it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations With this historical advantage the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past The book is divided into three sections The first focuses on how globalization has been written about from a historical perspective The second part advances three different takes on how best to view globalization from a very long term stance The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions

Cities and the Shaping of Memory in the Ancient Near East Ömür Harmanşah, 2013-03-18 This book investigates

the founding and building of cities in the ancient Near East The creation of new cities was imagined as an ideological project or a divine intervention in the political narratives and mythologies of Near Eastern cultures often masking the complex processes behind the social production of urban space During the Early Iron Age c 1200 850 BCE Assyrian and Syro Hittite rulers developed a highly performative official discourse that revolved around constructing cities cultivating landscapes building watercourses erecting monuments and initiating public festivals This volume combs through archaeological epigraphic visual architectural and environmental evidence to tell the story of a region from the perspective of its spatial practices landscape history and architectural technologies It argues that the cultural processes of the making of urban spaces shape collective memory and identity as well as sites of political performance and state spectacle *Anthropology and Global History* Robert M. Carmack, 2013-10-11 Anthropology and Global History explains the origin and development of human societies and cultures from their earliest beginnings to the present utilizing an anthropological lens but also drawing from sociology economics political science history and ecological and religious studies Carmack reconceptualizes world history from a global perspective by employing the expansive concepts of world systems and civilizations and by paying deeper attention to the role of tribal and native peoples within this history Rather than concentrating on the minute details of specific great events in global history he shifts our focus to the broad social and cultural contexts in which they occurred Carmack traces the emergence of ancient kingdoms and the characteristics of pre modern empires as well as the processes by which the modern world has become integrated and transformed The book addresses Western civilization as well as comparative processes which have unfolded in Asia the Middle East Latin America and sub Saharan Africa Vignettes opening each chapter and case studies integrated throughout the text illustrate the numerous and often extremely complex historical processes which have operated through time and across local regional and global settings *Homo Migrants* Megan J. Daniels, 2022-04-01 One of the most significant challenges in archaeology is understanding how and why humans migrate Homo Migrants examines the past present and future states of migration and mobility studies in archaeological discourse Contributors draw on revolutionary twenty first century advances in genetics isotope studies and data manipulation that have resolved longstanding debates about past human movement and have helped clarify the relationships between archaeological remains and human behavior and identity These emerging techniques have also pressed archaeologists and historians to develop models that responsibly incorporate method theory and data in ways that honor the complexity of human behavior and relationships This volume articulates the challenges that lie ahead as scholars draw from genomic studies computational science social theory cognitive and evolutionary studies environmental history and network analysis to clarify the nature of human migration in world history With case studies focusing on European and Mediterranean history and prehistory as well as global history Homo Migrants presents integrated methodologies and analyses that will interest any scholar researching migration and mobility in the human past *A Companion to World History* Douglas Northrop, 2014-12-15 A COMPANION

TOWORLD HISTORY This new volume offers insightful reflections by both leading and emerging world historians on approaches methodologies arguments and pedagogies of a sub discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national regional or chronological fields of inquiry Choice The focus on the practicalities of how to do world history probably gives it its edge Its thirty three chapters are grouped into sections that address how to set up research projects in world history how to teach it how to get jobs in it how to frame it and how it is done in various parts of the globe It is an actual handbook in other words as opposed to a sample of exemplary work English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history This state of the art collection of more than 30 insightful essays including contributions from an international cast of leading world historians and emerging scholars in the field identifies continuing areas of contention disagreement and divergence while pointing out fruitful directions for further discussion and research Themes and topics explored include the lineages and trajectories of world history key ideas and methods employed by world historians the teaching of world history and how it draws upon and challenges traditional approaches and global approaches to writing world history By considering these interwoven issues of scholarship and pedagogy from a transnational interregional and world global scale fresh insights are gained and new challenges posed With its rich compendium of diverse viewpoints A Companion to World History is an essential resource for the study of the world s past

Imagining Babylon Mario Liverani,2016-07-11 Ever since the archaeological rediscovery of the Ancient Near East generations of scholars have attempted to reconstruct the real Babylon known to us before from the evocative biblical account of the Tower of Babel After two centuries of excavations and scholarship Mario Liverani provides an insightful overview of modern Western approaches theories and accounts of the ancient Near Eastern city The Routledge Handbook of Archaeology and Globalization Tamar Hodos,2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

Semantics of Statebuilding Nicolas Lemay-Hébert, Nicholas Onuf, Vojin Rakić, Petar Bojanić, 2013-12-04 This volume examines international statebuilding in terms of language and meanings rather than focusing narrowly on current policy practices After two decades of evolution towards more integrated multi faceted or simply stated more intrusive statebuilding and peacebuilding operations a critical literature has slowly emerged on the economic social and political impacts of these interventions Scholars have started to analyse the unintended consequences of peacebuilding missions analysing all aspects of interventions Central to the book is the understanding that language is both the most important tool for building anything of social significance and the primary repository of meanings in any social setting Hence this volume exemplifies how the multiple realities of state state fragility and statebuilding are being conceptualised in mainstream literature by highlighting the repercussions this conceptualisation has on good practices for statebuilding Drawing together leading scholars in the field this project provides a meeting point between constructivism in international relations and the critical perspective on liberal peacebuilding shedding new light on the commonly accepted meanings and concepts underlying the international or world order as well as the semantics of contemporary statebuilding practices This book will be of much interest to students of statebuilding and intervention war and conflict studies security studies and international relations

Investigating Archaeological Cultures Benjamin W. Roberts, Marc Vander Linden, 2011-06-04 Defining culture is an important step in undertaking archaeological research Any thorough study of a particular culture first has to determine what that culture contains what particular time period geographic region and group of people make up that culture The study of archaeology has many accepted definitions of particular cultures but recently these accepted definitions have come into question As archaeologists struggle to define cultures they also seek to define the components of culture This volume brings together 21 international case studies to explore the meaning of culture for regions around the globe and periods from the Paleolithic to the Bronze Age and beyond Taking lessons and overarching themes from these studies the contributors draw important conclusions about cultural transmission technology development and cultural development The result is a comprehensive model for approaching the study of culture broken down into regions Russia Continental Europe North America Britain and Africa materials Lithics Ceramics Metals and time periods This work will be valuable to all archaeologists and cultural anthropologists particularly those studying material culture

Ancient Complex Societies Jennifer C. Ross, Sharon R. Steadman, 2017-01-06 Through a detailed examination of the archaeological evidence and written records this comprehensive text aims to develop a common understanding of what complexity means to archaeologists and the methods by which they identify and analyze it In this first new undergraduate textbook on ancient complex societies in two decades the authors use vivid writing textboxes on key themes and sites and a glossary to keep students thoroughly engaged

Connectivity in Antiquity Oystein S. LaBianca, Sandra Arnold Scham, 2016-04-08 Today s politicians argue that the more connected societies are the less danger they pose to global stability But is this a new idea or one as old as history itself Trade routes as far back

as prehistory were responsible for the exchange of ideas as well as goods leading to the rapid expansion of states and empires

Connectivity in Antiquity brings together a team of influential scholars to examine the process of globalization in antiquity The essays examine metallurgy social evolution economic growth and the impact of religious pilgrimage and range across the eastern Mediterranean Syria the Transjordan south Yemen and Egypt **Connectivity in Antiquity** will be of value to all those interested in the relationship between antiquity and modern globalisation **Commanding Words** Lynda Chouiten, 2016-04-26 In a twenty first century which celebrates freedom and equality while also beginning to question the lax attitudes and methods which have triumphed since the late Sixties reflecting on the concept of authority is as necessary as ever What role does and should authority play in political social and academic organization Should one plead for stricter or more flexible authority Where does the frontier between authority and authoritarianism lie In examining these and other related questions this volume postulating the interconnectedness between authority and discourse also discusses the rhetorical strategies whereby authority is constructed manifested and resisted Pertaining to subjects as various as politics culture literature history and pedagogy the twenty chapters which constitute this book offer an interdisciplinary yet thematically coherent coverage of the question under discussion and encompass a wide historical and spatial scope which ranges from the Islamic Middle Ages to twenty first century America passing through nineteenth and twentieth century Europe India and North Africa on the way **The ^AOxford Handbook of the State in the Ancient Near East and Mediterranean** Peter Fibiger Bang, Walter Scheidel, 2013-01-09 Tracing the evolution of the state from its beginnings to the early Middle Ages this comprehensive handbook focuses on key institutions and dynamics while providing accessible accounts of states and empires in the ancient Near East and Mediterranean **The Oxford Handbook of Ancient Anatolia** Sharon R. Steadman, Gregory McMahon, 2011-09-15 This title provides comprehensive overviews on archaeological philological linguistic and historical issues at the forefront of Anatolian scholarship in the 21st century **Creation and Chaos** JoAnn Scurlock, Richard H. Beal, 2013-10-21 Hermann Gunkel was a scholar in the generation of the origins of Assyriology the spectacular discovery by George Smith of fragments of the Chaldean Genesis and the Babel Bibel debate Gunkel s thesis inspired by materials supplied to him by the Assyriologist Heinrich Zimmern was to take the Chaaskampf motif of Revelation as an event that would not only occur at the end of the world but had already happened at the beginning before Creation In other words in this theory one imagines God in Genesis 1 as first having battled Rahab Leviathan and Yam the forces of Chaos in a grand battle and only then beginning to create The problem with Gunkel s theory is that it did not simply identify common elements in the mythologies of the ancient Near East but imposed upon them a structure dictating the relationships between the elements a structure that was based on inadequate knowledge and a forced interpretation of his sources On the other hand one is not entitled to insist that there was no cultural conversation among peoples who spent the better part of several millennia trading with fighting and conquering one another **Creation and Chaos** attempts to address

some of these issues The contributions are organized into five sections that address various aspects of the issues raised by Gunekl s theories

Religion and Ideology in Assyria Beate Pongratz-Leisten,2015-09-25 Addressing the relationship between religion and ideology and drawing on a range of literary ritual and visual sources this book reconstructs the cultural discourse of Assyria from the third through the first millennium BCE Ideology is delineated here as a subdiscourse of religion rather than as an independent category anchoring it firmly within the religious world view Tracing Assur s cultural interaction with the south on the one hand and with the Syro Anatolian horizon on the other this volume articulates a northern cultural discourse that even while interacting with southern Mesopotamian tradition managed to maintain its own identity It also follows the development of tropes and iconic images from the first city state of Uruk and their movement between myth image and royal inscription historiography and myth and myth and ritual suggesting that with the help of scholars key royal figures were responsible for introducing new directions for the ideological discourse and for promoting new forms of historiography

Bioarchaeology and Identity Revisited Kelly J. Knudson,Christopher M. Stojanowski,2020-05-11 This volume highlights new directions in the study of social identities in past populations Contributors expand the scope of the field regionally methodically and theoretically moving behind the previous focus on single aspects of identity by demonstrating multi scalar approaches and by explicitly addressing intersectionality in the archaeological record

Archaeological Theory in Practice PatriciaA Urban,2017-07-05 In this concise friendly textbook Patricia Urban and Edward Schortman teach the basics of archaeological theory making explicit the crucial link between theory and the actual conduct of archaeological research The first half of the text addresses the general nature of theory as well as how it is used in the social sciences and in archaeology in particular To demonstrate the usefulness of theory the authors draw from research at Stonehenge Mesopotamia and their own long term research project in the Naco Valley of Honduras They show how theory becomes meaningful when it is used by very real individuals to interpret equally real materials These extended narratives exemplify the creative interaction between data and theory that shape our understanding of the past Ideal for introductory courses in archaeological theory
