Rethinking Linguistic Relativity:

Rethinking Linguistic Relativity John J. Gumperz, Stephen C. Levinson, 1996-07-11 Linguistic relativity is the claim that culture through language affects the way in which we think and especially our classification of the experienced world This book reexamines ideas about linguistic relativity in the light of new evidence and changes in theoretical climate The editors have provided a substantial introduction that summarizes changes in thinking about the Sapir Whorf hypothesis in the light of developments in anthropology linguistics and cognitive science Introductions to each section will be of especial use to students

Explorations in Linguistic Relativity Martin Pütz, Marjolyn Verspoor, 2000 About a century after the year Benjamin Lee Whorf 1897 1941 was born his theory complex is still the object of keen interest to linguists Recently scholars have argued that it was not his theory complex itself but an over simplified reduced section taken out of context that has become known as the Sapir Whorf hypothesis that has met with so much resistance among linguists over the last few decades Not only did Whorf present his views much more subtly than most people would believe but he also dealt with a great number of other issues in his work Taking Whorf s own notion of linguistic relativity as a starting point this volume explores the relation between language mind and experience through its historical development Whorf s own writing its misinterpretations various theoretical and methodological issues and a closer look at a few specific issues in his work

Hermeneutics, Linguistics, and the Bible Stanley E. Porter, 2024-01-25 The volume presents Stanley E Porter s considered thoughts and reflections on key questions of meaning and context addressing the problems of biblical interpretation and how a close collaboration between hermeneutics and linguistics can help to solve them The chapters display Porter s work in both fields examining how hermeneutics functions as a field in modern biblical studies and how the quest for meaning in biblical texts is underpinned by the study of linguistics The volume focuses on context for understanding the meanings of biblical texts Porter suggests that linguists can learn more from the philosophical questions around meaning that hermeneutics apply in their study of biblical texts and that there is more fruitful work to be done in the field of hermeneutics using insights from linguistics

Evidence for Linguistic Relativity Susanne Niemeier, René Dirven, 2000-04-15 This volume has arisen from the 26th International LAUD Symposium on Humboldt and Whorf Revisited Universal and Culture Specific Conceptualizations in Grammar and Lexis While contrasting two or more languages the papers in this volume either provide empirical evidence confirming hypotheses related to linguistic relativity or deal with methodological issues of empirical research These new approaches to Whorf s hypotheses do not focus on mere theorizing but provide more and more empirical evidence gathered over the last years They prove in a very sophisticated way that Whorf s ideas were very lucid ones even if Whorf s insights were framed in a terminology which lacked the flexibility of linguistic categories developed over the last quarter of this century especially in cognitive linguistics To date there is sufficient proof to claim that linguistic relativity is indeed a vital issue and the current volume confirms a more general trend

for rehabilitating Whorf's theory complex and also offers evidence for it. It contains articles written by scholars from various fields of linguistics including phonology, psycholinguistics, language acquisition, historical linguistics, anthropological linguistics, and cross-cultural semantics, which all contribute to a re-evaluation and partial reformulation of Whorf's thinking.

Early Category and Concept Development David H. Rakison, Lisa M. Oakes, 2008-12-30 Whether or not infants' earliest perception of the world is a blooming, buzzing confusion, it is not long before they come to perceive structure and order among the objects and events around them. At the core of this process and cognitive development in general is the ability to categorize, to group events, objects, or properties together and to form mental representations or concepts that encapsulate the commonalities and structure of these categories. Categorization is the primary means of coding experience underlying not only perceptual and reasoning processes but also inductive inference and language. The aim of this book is to bring together the most recent findings and theories about the origins and early development of categorization and conceptual abilities. Despite recent advances in our understanding of this area, a number of hotly debated issues remain at the center of the controversy over categorization. Researchers continue to ask questions such as: Which mechanisms for categorization are available at birth and which emerge later? What are the relative roles of perceptual similarity and nonobservable properties in early classification? What is the role of contextual variation in categorization by infants and children? Do different experimental procedures reveal the same kind of knowledge? Can computational models simulate infant and child categorization? How do computational models inform behavioral research? What is the impact of language on category development? How does language partition the world? This book is the first to address these and other key questions within a single volume. The authors present a diverse set of views representing cutting-edge empirical and theoretical advances in the field. The result is a thorough review of empirical contributions to the literature and a wealth of fresh theoretical perspectives on early categorization.

Crosslinguistic Approaches to the Psychology of Language Jiansheng Guo, Elena Lieven, Nancy Budwig, Susan Ervin-Tripp, Keiko Nakamura, Seyda Ozcaliskan, 2010-10-18 This volume covers state-of-the-art research in the field of crosslinguistic approaches to the psychology of language. The forty chapters cover a wide range of topics that represent the many research interests of a pioneer, Dan Isaac Slobin, who has been a major intellectual and creative force in the field of child language development, linguistics, and psycholinguistics for the past four decades. Slobin has insisted on a rigorous crosslinguistic approach in his attempt to identify universal developmental patterns in language learning, to explore the effects of particular types of languages on psycholinguistic processes, to determine the extent to which universals of language and language behavior are determined by modality (vocal auditory vs. manual visual), and finally to investigate the relation between linguistic and cognitive processes. In this volume, researchers take up the challenge of the differences between languages to forward research in four major areas with which Slobin has been concerned throughout his career: language learning in crosslinguistic perspective; spoken and sign languages; the integration of language-specific factors in

narrative skill theoretical issues in typology language development and language change and the relationship between language and cognition All chapters are written by leading researchers currently working in these fields who are Slobin's colleagues collaborators or former students in linguistics psychology anthropology and cognitive science Each section starts with an introductory chapter that connects the themes of the chapters and reviews Slobin's contribution in the context of past research trends and future directions The whole volume focuses squarely on the central argument universals of human language and of its development are embodied and revealed in its diverse manifestations and utilization Crosslinguistic Approaches to the Study of Language is a key resource for those interested in the range of differences between languages and how this impacts on learning cognition and language change and a tribute to Dan Slobin's momentous contribution to the field

Relatively Speaking Eve Danziger, 2001-04-12 Based upon 14 months of ethnographic fieldwork among the Mopan Maya in Belize Eve Danziger examines the semantic complexity of particular kinship terms used among Mopan women and children and shows that a culture specific analysis of their terms is superior to other non ethnographically based methods In doing so she contributes not only to theoretical semantics and the ethnography of that area but to the cross cultural study of child development and language acquisition

Early Category and Concept Development : Making Sense of the Blooming, Buzzing Confusion David H. Rakison Assistant Professor of Psychology Carnegie Mellon University, Lisa M. Oakes Associate Professor of Psychology University of Iowa, 2003-01-09 Whether or not infants' earliest perception of the world is a blooming buzzing confusion it is not long before they come to perceive structure and order among the objects and events around them At the core of this process and cognitive development in general is the ability to categorize to group events objects or properties together and to form mental representations or concepts that encapsulate the commonalities and structure of these categories Categorization is the primary means of coding experience underlying not only perceptual and reasoning processes but also inductive inference and language The aim of this book is to bring together the most recent findings and theories about the origins and early development of categorization and conceptual abilities Despite recent advances in our understanding of this area a number of hotly debated issues remain at the center of the controversy over categorization Researchers continue to ask questions such as Which mechanisms for categorization are available at birth and which emerge later What are the relative roles of perceptual similarity and nonobservable properties in early classification What is the role of contextual variation in categorization by infants and children Do different experimental procedures reveal the same kind of knowledge Can computational models simulate infant and child categorization How do computational models inform behavioral research What is the impact of language on category development How does language partition the world This book is the first to address these and other key questions within a single volume The authors present a diverse set of views representing cutting edge empirical and theoretical advances in the field The result is a thorough review of empirical contributions to the literature and a wealth of fresh theoretical perspectives on early categorization

Multilingual Cognition and Language Use Luna Filipović, Martin Pütz, 2014-06-15 This volume provides a multifaceted view of certain key themes in multilingualism research today and offers future directions for this research area in the context of the multilingual development of individuals and societies The selection of studied languages is eclectic e g Amondawa Cantonese Bulgarian Dene Dutch Eipo Frisian German Mandarin Chinese Mori Russian Spanish and Yukatek among others they are typologically diverse and they are contrasted from a variety of perspectives such as cognitive development aging acquisition grammatical and lexical processing and memory This collection also illustrates novel insights into the linguistic relativity debate that multilingual studies can offer such as new and revealing perspectives on some well known topics e g colour categorisation or language transfer The critical and comprehensive discussions of theoretical and methodological considerations presented in this volume are fundamental for numerous current future empirical and

interdisciplinary studies of linguistic diversity linguistic typology and multilingual processing Crosslinguistic Influence in Second Language Acquisition Rosa Alonso Alonso, 2016-01-11 This volume provides an unprecedented insight into current approaches to crosslinguistic influence CLI The collection investigates a range of themes including linguistic relativity the possible contributions of neurolinguistics the problem of cognitive development and the role of the frequency of structures in acquisition from distinct overlapping and complementary perspectives Chapters focusing on vocabulary morphosyntactic categories semantic structures and phonetic and phonological structures feature in the volume as do over 20 languages in order to offer new insights into both theoretical and empirical issues in CLI including the consequences of great or little similarity in structures between languages The relevance of CLI research for teaching is discussed in a number of chapters as is the phenomenon of multilingualism The collection will appeal to researchers graduate and postgraduate students teachers and professionals interested in the field of CLI in SLA A Companion to Cognitive Anthropology David B. Kronenfeld, Giovanni Bennardo, Victor C. de Munck, Michael D. Fischer, 2015-12-14 This new Companion traces the development of cognitive anthropology from its beginnings in the late 1950s to the present and evaluates future directions of research in the field In 29 contributions from leading anthropologists there is an overview of cognitive and cultural structures insights into how cognition works in everyday life and interacts with culture and examples of contemporary research A Companion to Cognitive Anthropology is essential for anyone interested in the questions of how culture shapes cognitive processes Teaching and Researching: Language and Culture Joan Kelly Hall, 2013-11-04 Language and culture are concepts increasingly found at the heart of developments in applied linguistics and related fields Taken together they can provide interesting and useful insights into the nature of language acquisition and expression In this volume Joan Kelly Hall gives a perspective on the nature of language and culture looking at how the use of language in real world situations helps us understand how language is used to construct our social and cultural worlds The conceptual maps on the nature of language culture and learning provided in this text help orient readers to some current theoretical and practical activities taking place in applied linguistics They also help them begin to chart their own explorations in the teaching and researching of language and culture **Language Learners as Ethnographers** Celia Roberts, 2001 This book looks at the role of cultural studies and intercultural communication in language learning The book argues that learners who have an opportunity to stay in the target language country can be trained to do an ethnographic project while abroad Borrowing from anthropologists the idea of cultural fieldwork and writing culture language learners develop their linguistic and cultural competence through the study of a local group This book combines a theoretical overview of language and cultural practices with a description of ethnographic approaches and materials specifically designed for language learners *Typology and Second Language Acquisition* Anna Giacalone Ramat, 2011-07-11 In recent years research on comparative typology has led to reveal regularities and to formulate new constraints upon variation for a broad range of phenomena As the amount of typological

research increased a growing interest arose for the implications that findings in the typological field might have on second language acquisition Written by experts in the field of typology and or second language acquisition this volume addresses theoretical and empirical issues on structural domains such as relative clauses and possessive constructions as well as pragmatic considerations on information organization in learners productions Handbook of Categorization in Cognitive Science Henri Cohen,Claire Lefebvre,2017-06-03 Handbook of Categorization in Cognitive Science Second Edition presents the study of categories and the process of categorization as viewed through the lens of the founding disciplines of the cognitive sciences and how the study of categorization has long been at the core of each of these disciplines The literature on categorization reveals there is a plethora of definitions theories models and methods to apprehend this central object of study The contributions in this handbook reflect this diversity For example the notion of category is not uniform across these contributions and there are multiple definitions of the notion of concept Furthermore the study of category and categorization is approached differently within each discipline For some authors the categories themselves constitute the object of study whereas for others it is the process of categorization and for others still it is the technical manipulation of large chunks of information Finally yet another contrast has to do with the biological versus artificial nature of agents or categorizers Defines notions of category and categorization Discusses the nature of categories discrete vague or other Explores the modality effects on categories Bridges the category divide calling attention to the bridges that have already been built and avenues for further cross fertilization between disciplines *Proceedings of the Twenty-fourth Annual Conference of the Cognitive Science Society* Wayne D. Gray,Christian D. Schunn,2019-04-24 This volume features the complete text of the material presented at the Twenty Fourth Annual Conference of the Cognitive Science Society As in previous years the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals presenting a multifaceted view of cognitive science The volume includes all papers posters and summaries of symposia presented at this leading conference that brings cognitive scientists together The 2002 meeting dealt with issues of representing and modeling cognitive processes as they appeal to scholars in all subdisciplines that comprise cognitive science psychology computer science neuroscience linguistics and philosophy
