Rafferty,2007-07-01 The New Critical Thinking Jack Lyons,Barry Ward,2017-08-09 Why is it so hard to learn critical thinking skills Traditional textbooks focus almost exclusively on logic and fallacious reasoning ignoring two crucial problems As psychologists have demonstrated recently many of our mistakes are not caused by formal reasoning gone awry but by our bypassing it completely We instead favor more comfortable but often unreliable intuitive methods Second the evaluation of premises is of fundamental importance especially in this era of fake news and politicized science This highly innovative text is psychologically informed both in its diagnosis of inferential errors and in teaching students how to watch out for and work around their natural intellectual blind spots It also incorporates insights from epistemology and philosophy of science that are indispensable for learning how to evaluate premises The result is a hands on primer for real world critical thinking The authors bring over four combined decades of classroom experience and a fresh approach to the traditional challenges of a critical thinking course effectively explaining the nature of validity assessing deductive arguments reconstructing identifying and diagramming arguments and causal and probabilistic inference Additionally they discuss in detail important frequently neglected topics including testimony the nature and credibility of science rhetoric and dialectical argumentation Key Features and Benefits Uses contemporary psychological explanations of and remedies for pervasive errors in belief formation There is no other critical thinking text that generally applies this psychological approach Assesses premises notably premises based on the testimony of others and evaluation of news and other information sources No other critical thinking textbook gives detailed treatment of this crucial topic Typically they only provide a few remarks about when to accept expert opinion argument from authority Carefully explains the concept of validity paying particular attention in distinguishing logical possibility from other species of possibility and demonstrates how we may mistakenly judge invalid arguments as valid because of belief bias Instead of assessing an argument's validity using formal mathematical methods i.e. truth tables for propositional logic and Venn diagrams for categorical logic provides one technique that is generally applicable explicitly showing that it is impossible to make the conclusion false and the premises true together For instructors who like the more formal approach the text also includes standard treatments using truth tables and Venn diagrams Uses frequency trees and the frequency approach to probability more generally a simple method for understanding and evaluating quite complex probabilistic information Uses arguments maps which have been shown to significantly improve students reasoning and argument evaluation **Current Issues and Enduring Questions**,1999 The unique collaborative effort of a distinguished interdisciplinary team a professor of English and a professor of philosophy Current Issues and Enduring Questions is a balanced and flexible book that provides the benefit of the authors dual expertise in effective persuasive writing and rigorous critical thinking Its comprehensive coverage of classic and contemporary approaches to argument includes Aristotle Toulmin

and a range of alternative views making it an extraordinarily versatile text Readings on contemporary controversies including the purpose of a college education immigration a peacetime draft and obesity and classic philosophical questions such as How free is the will of the individual are sure to spark student interest and lively discussion and writing Refined through seven widely adopted previous editions it has been revised to address current student interests and trends in argument research and writing and has been updated with compelling new topics and readings and more on analyzing visuals and presenting oral arguments No other text and reader offers such an extensive resource for teaching argument
