Academic Anthropology and the Museum Mary Bouquet,2001-12-01 The museum boom with its accompanying objectification and politicization of culture finds its counterpart in the growing interest by social scientists in material culture much of which is to be found in museums Not surprisingly anthropologists in particular are turning their attention again to museums after decades of neglect during which fieldwork became the hallmark of modern anthropology so much so that the social and the material parted company so radically as to produce a kind of knowledge gap between historical collections and the intellectuals who might have benefitted from working on these material representations of culture Moreover it was forgotten that museums do not only present the pastness of things A great deal of what goes on in contemporary museums is literally about planning the shape of the future making culture materialize involves mixing things from the past taking into account current visions and knowing that the scenes constructed will shape the perspectives of future generations However the re invention of museum anthropology presents a series of challenges for academic teaching and research as well as for the work of cultural production in contemporary museums issues that are explored in this volume Things Great and Small John E. Simmons,2024-03-18 Collection care is a fundamental responsibility for museums and other collecting institutions and the foundation of collection stewardship is good collection management policies The new third edition of Things Great and Small continues to be a comprehensive resource for developing implementing and revising collection management policies and includes new information for addressing prolonged or permanent closure of museums wider parameters for collection storage environments and sustainable collection management practices to cope with climate change Drawing on

Public History and the Food Movement Michelle Moon, Cathy Stanton, 2017-08-04 Public History and the Food Movement argues that today's broad interest in making food systems fairer healthier and more sustainable offers a compelling opportunity for the public history field Moon and Stanton show how linking heritage institutions unique skills and resources with contemporary food issues can offer accessible points of entry for the public into broad questions about human and environmental resilience They argue that this approach can also benefit institutions themselves by offering potential new audiences partners and sources of support at a time when many are

struggling to remain relevant and viable Interviews with innovative practitioners in both the food and history fields offer additional insights Drawing on both scholarship and practice Public History and the Food Movement presents a practical toolkit for engagement Demonstrating how public historians can take on a vital contemporary issue while remaining true to the guiding principles of historical research and interpretation the book challenges public historians to claim an expanded role in today s food politics The fresh thinking will also be of interest to public historians looking to engage with other timely issues
