Zinn, 2012-12-06 A comprehensive understanding of diseases of the peripheral retina is essential to the general ophthalmologist as well as to the vitreoretinal surgeon Expertise in in direct ophthalmoscopy scleral depression and contact lens biomicroscopy serves as a basis for observing the peripheral retina These observations are then recorded on fundus drawing paper and the Tolentino vitreo retinal chart This orderly sequence of skills allows the ophthalmic surgeon to objectively diagnose and evaluate specific peripheral retinal disorders and plan for their therapeutic management The Clinical Atlas of Peripheral Retinal Disorders is a compilation of fundus paintings by David A Tilden based on our observations of a large number of patients over the past 15 years The atlas is organized along functional and anatomical lines After a brief introduction to the clinical anatomy of the peripheral retina the appearance of the fundus as a function of skin color and aging is presented Many of the diseases of the peripheral retina can be divided into trophic nutritional tractional and a combination of trophic plus tractional etiologies This classification system although somewhat simplistic appears adequate for our present level of understanding of the pathogenetic mechanisms of these disorders Undoubtedly once the molecular biology of these conditions is elucidated through future research the classification will be revised In addition there are other conditions that affect the peripheral retina that do not fit the proposed classification system and are covered under separate headings i e *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), **Modern Ophthalmology** Benjamin Boyd, 2011-06 Modern Ophthalmology The Highlights is a trilogy describing fifty major subjects in the field of ophthalmology developed through a period of sixty years More than 850 images help illustrate the developments throughout the years The first volume discusses the birth and development of modern ophthalmology refractive surgery and microsurgery angiography retinopathy and much more Volume two covers the entire field of glaucoma apoptosis contact lenses dry eye keratoplasty and LASIK Volume three examines cataract surgery optical coherence tomography eye conditions such as uveitis herpes cancer keratitis and strabismus ophthalmic plastic surgery and more **Atlas of Clinical Ophthalmology E-Book** David J.
