Poverty Comparisons and Household Survey Design Steven Howes, Jean Olson Lanjouw, 1997-01-01 World Bank Discussion Paper No 356 The World Bank has become the world's largest lender in the health nutrition and population HNP sectors requiring the institution to seek ever greater evidence that its work is effective on the ground This paper reviews the literature on the causes of observed changes in health and fertility levels on the evaluation of policies and on programs designed to accelerate these changes It presents a framework that delineates the relationships between Bank activities in the HNP sectors the characteristics of a health care system household behavior and changes in health outcomes The paper also describes a strategy for assessing the development effectiveness of the Bank's work in these sectors The underlying thesis is that changes in health policy and improved outcomes depend on the demand for health services and on institutional incentives that drive health care system performance *Guidelines for Constructing Consumption Aggregates for Welfare Analysis* Angus Deaton, Salman Zaidi, 2002-01-01 In September 2001 staff from the World Bank and the International

Monetary Fund met with the objective of strengthening collaboration between the two organizations in projects of civil service reform. This strengthened collaboration will have key benefits in ensuring consistency between the conflicting goals of the two organizations, establishing realistic objectives within the reform process, and maintaining a core set of wage and employment data. The principal conclusion arrived at was that World Bank and IMF staff should be engaging in collaboration earlier in the reform process. To guide the collaboration, six foundations were identified. These include: develop a medium term fiscal framework; foster national ownership by making reforms politically feasible; focus and streamline conditionality; agree on sequencing and timing of reforms; and strengthen data collection. These principals will be tested for effectiveness in several focus countries.

Progress and Challenges of Nonfinancial Defined Contribution Pension Schemes Robert Holzmann, Edward Palmer, Robert Palacios, Stefano Sacchi, 2019-10-21. The individual account based but unfunded approach to mandated public pension systems is a reform benchmark for all pension schemes promising fair and financially sustainable benefits. Nonfinancial defined contribution (NDC) pension schemes originated in Italy and Sweden in the 1990s, were then adopted by Latvia, Norway, and Poland, envisaged but not implemented in various other countries such as Egypt and Russia, and remain under discussion in many nations around the world such as China and France. In its complete form, the approach also comprises budget financed basic income provisions and mandated or voluntary funded provisions. Volume 1 of this book offers an assessment of countries that were early adopters, before addressing key aspects of policy implementation and design review, including how best to combine basic income provisions with an NDC scheme, how to deal with heterogeneity in longevity, and how to adjust NDC scheme design and labor market policies to deliver on reform expectations. Volume 2 addresses a second set of issues, including the gender pension gap and what family policies can do about it within the NDC framework, labor market issues and administrative challenges of NDC schemes, and how countries are coping, the role of communication in these pension schemes, the complexity of cross border pension taxation, and much more.

Progress and Challenges of Nonfinancial Defined Contribution Pension Schemes is the third in a series of books analyzing the progress, challenges, and adjustment options of this reform revolution for mandated public pension systems. Pension reform is a major issue in many countries. The development of the nonfinancial defined contribution pension plan in the 90s was a major advance in pension design. By reporting actual country experiences and exploring properties of plan designs, this latest collection of essays is a valuable contribution well worth reading.

Peter Diamond, Professor at Massachusetts Institute of Technology, 2010 winner of the Nobel Memorial Prize in Economic Sciences. A highly stimulating publication for policy makers and researchers alike. It pushes the analytical frontier for policy challenges that all public pension schemes are confronted with, but that the nonfinancial defined contribution approach promises to handle best.

Noriyuki Takayama, President, Research Institute for Policies on Pension and Aging, Tokyo, and professor emeritus, Hitotsubashi University, Tokyo. In a changing world where pensions are more than ever linked to labor markets, communication tools and

flexibility considerations this anthology provides a unique up to date analysis of nonfinancial defined contribution pension schemes By mixing international experiences and theoretical studies it demonstrates the high adaptability of such pension schemes to changing social challenges Pierre Devolder Professor of Finance and Actuarial Sciences Catholic University of Louvain Belgium
