Roe,2003-12-19 Once again we bring you the proceedings of the International Workshop on Security Protocols It seems hard
to believe that we have reached the tenth event in this annual series This year our theme was Discerning the Protocol
Participants Security protocols are usually described in terms of the active participants Alice c putes foo and sends it to Bob
However most security protocols also include o line participants which are not synchronously involved in the exchange of
messages a bank may participate on behalf of a customer and an arbiter may subsequently be asked to interpret the meaning

of a run These silent partners to the protocol have their own security policies and assumptions about identity authorization and capability need to be examined when the agenda of a hidden participant may change We hope that the position papers published here which have been rewritten and rethought in the light of the discussions at the workshop will be of interest not just for the specific contributions they make but also for the deeper issues which they expose In order to identify these issues more clearly we include transcripts for some of the discussions which took place in Cambridge during the workshop What would you have liked to add Do let us know

Security Protocols Bruce Christianson, Bruno Crispo, James A. Malcolm, Michael Roe, 2003-06-30 Hello and welcome These are the proceedings of the 9th International Workshop on Security Protocols the first to be held in the new millennium This year our theme was mobile computing versus immobile security As usual the insights and challenges which emerged during the workshop are reflected in the position papers which appear here in rewritten form Transcripts are also included of the discussions which took place in Cambridge as the initial versions were presented These transcripts are intended to provide a perspective on lines of argument which are worth pursuing further Our desire is that you will join with us in this activity and that as a result you will like many of our participants feel moved to propound something quite different from what you originally planned Our thanks as always to Prof Roger Needham FRS and to Microsoft Research Ltd Cambridge for the use of the meeting room and coffee machine Thanks also to Lori Klimasewska of the University of Cambridge Computing Service for transcribing the audio tapes and for revealing in Audrey James a previously unsuspected double life of a well known double agent and to Dr Mary Buchanan for her assistance in editing the transcripts into a Thucydidean mould Actually we are often asked how we go about producing the transcripts especially upon those occasions when for various reasons no audio recording was made This year we bow to pressure and reveal the details of our methodology in the Afterword
