Maritime Security and the Law of the Sea Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea The discussion sets out the rules regulating passage of military vessels and military activities at sea law enforcement activities across the different maritime zones information sharing and intelligence gathering as well as armed conflict and naval warfare In doing so this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism weapons of mass destruction piracy drug trafficking environmental damage and illegal fishing While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed

The Future of the Law of the Sea Gemma Andreone, 2017-03-30 This book is open access under a CC BY NC 4.0 license It explores the diverse phenomena which are challenging the international law of the sea today using the unique perspective of a simultaneous analysis of the national individual and common interests at stake This perspective which all the contributors bear in mind when treating their own topic also constitutes a useful element in the effort to bring today's legal complexity and fragmentation to a homogenous vision of the sustainable use of the marine environment and of its resources and also of the international and national response to maritime crimes The volume analyzes the relevant legal frameworks and recent developments focusing on the competing interests which have influenced State jurisdiction and other regulatory processes An analysis of the competing interests and their developments allows us to identify actors and relevant legal and institutional contexts retracing how and when these elements have changed over time
