The Orbital Perspective - An Astronaut's View Ron Garan, 2015-11-05 For astronaut Ron Garan living on the International Space Station was a powerful transformative experience one that he believes holds the key to solving our problems here on Earth On space walks and through windows Garan was struck by the stunning beauty of the Earth from space but sobered by knowing how much needed to be done to help this troubled planet And yet on the International Space Station Garan a former fighter pilot was working side by side with Russians who only a few years before were the enemy If fifteen nationalities could collaborate on one of the most ambitious technologically complicated undertakings in history surely we can apply that kind of cooperation and innovation toward creating a better world That spirit is what Garan calls the orbital perspective Garan vividly conveys what it was like learning to work with a diverse group of people in an environment only a handful of human beings have ever known But more importantly he describes how he and others are working to apply

The Earth in Space Edward Payson Jackson, 1887 Seeing Earth in a New Way , 1998 *Seeing Earth* Ronald Weber, 1985 As our interest in space continues to grow the cultural effects of space exploration become important In *Seeing Earth* Ronald Weber focuses on the literary response to this new frontier examining an area of contemporary expression that has remained until now virtually untouched The author surveys what has been written about space exploration and calls attention to its dominant use as a means of deflecting attention back to earth and earthly concerns As Norman Cousins states the most significant achievement of that lunar voyage Apollo 11 was not that man set foot on the Moon but that he set eyes on Earth This timely study includes the responses of writers scientists historians theologians philosophers and those who have experienced space first hand the astronauts Here we find of course Tom Wolfe and The Right Stuff Carl Sagan James Michener and Norman Mailer But Weber also discusses Oriana Fallaci Ben Bova Ken Kesey Saul Bellow Ray Bradbury and others as they offer a literary embodiment of this newest and perhaps ultimate phase of American journeying the newest New World the darkest frontier Weber finds

that in the first quarter century of the space age our writers have been more attentive to the familiar attractions of earth than the mysteries of outer space paradoxically in their accounts of space returning us to earth Seeing Earth is offered however as a preliminary report The era of the space shuttle with the promise of routine journeys in space may well alter the response of writers We may come to see ourselves at home in space But so far the deepest sympathies of our writers have been directed to the origin of space rockets more than their exotic destinations Weber shows us that our literary accounts of space journeys have given us new instruction about earth and earthly life The Future of Remote Sensing from Space
