Maupassant: the Semiotics of Text Algirdas Julien Greimas, 1988-01-01 Translated by Paul Perron Maupassant's short story Two Friends is examined in order to test methodological tools and to hone them for their application in the analysis of narrative discourse starting from the oral tale Propp and ending with the written tale instituted as literary genre Complex procedures of textual production are identified among which entire sequences as well as the eventual level of narrative fade away in favor of its cognitive dimension This semiotic investigation is accompanied by a challenge to certain conventions of literary criticism dialogue the locus of Realist stereotypes appears laden with paradoxical truths the description of nature inherited from the Romantics

bristles with narrative intent and entire sections of a valorized figurative universe unfold before us Thematic readings are linked up with semantic analysis the figure of Water exerts its profound fascination A Christian symbolics is uncovered which traverses the text and invites us to read it as a new Gospel Parable New readings complement older ones and remain as so many suspended possibilities The tale appears somewhat as a sonnet that is to say as a fixed form genre where the closure of the text would be a necessary condition for transcending it

A (Bio)Semiotic Theory of Translation Kobus Marais, 2018-10-25 This volume outlines a theory of translation set within the framework of Peircean semiotics which challenges the linguistic bias in translation studies by proposing a semiotic theory that accounts for all instances of translation not only interlinguistic translation In particular the volume explores cases of translation which does not include language at all The book begins by examining different conceptualizations of translation to highlight how linguistic bias in translation studies and semiotics has informed these fields and their development The volume then outlines a complexity theory of translation based on semiotics which incorporates process philosophy semiotics and translation theory It posits that translation is the complex systemic process underlying semiosis the result of which produces semiotic forms The book concludes by looking at the implications of this conceptualization of translation on social cultural emergence theory through an interdisciplinary lens integrating perspectives from semiotics social semiotics and development studies Paving the way for scholars to analyze translational aspects of all semiotic phenomena this volume is essential reading for graduate students and researchers in translation studies semiotics multimodal studies cultural studies and development studies

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventuring of the search itself

Introduction to the Semiotics of the Text Gianfranco Marrone, 2021-11-08 This book aims to demonstrate how semiotic models of textual analysis can be used to study any social reality or cultural process In addition it shows how

semiotic models work by using examples from everyday life and social praxis communicative processes and modes of consumption online interactions and cross media procedures political experiences and scientific universes Social Theory Today Anthony Giddens,1987 Social theory has undergone dramatic changes over the past fifteen years The aim of this book is to provide a comprehensive survey of those changes and an authoritative statement on current trends of development in social thought The contents of the book range in a systematic way across the major traditions of social theory prominent today Among the topics covered are the relationships between modern social theory and the classics of the late eighteenth and nineteenth centuries the connections between social theory and mathematical social science and the logical status of generalizations in the social sciences Traditions of thought discussed include behaviourism symbolic interactionism Parsonian theory analytical theory structuralism and post structuralism ethnomethodology structuration theory world systems theory Marxism and critical theory *Structure of Texts and Semiotics of Culture* Jan van der Eng,Monéir Grygar,2018-11-05 No detailed description available for Structure of Texts and Semiotics of Culture Semiotic Theory and Practice Michael Herzfeld,Lucio Melazzo,1988 **Defending Hope** Justin Langford,2013-02-01 Most of the current scholarly literature on biblical intertextuality or the use of the Old Testament in the New Testament exhibits a high degree of variance regarding methodological approach The variety of methods employed naturally yields a variety of results Semiotics or the study of signs and how they communicate offers an avenue for approaching intertextual references that focuses on communication theory and meaning In addition semiotic theory provides an overarching methodological framework for examining intertextual references As such a semiotic approach can assist in creating greater methodological consistency and clarity for this nuanced area of New Testament study The purpose of this book is to explore the use of semiotics as a viable approach to biblical intertextuality The intertextual references to Isaiah in 1 Peter will serve as the test case for an application of the method A semiotic approach is promising because it offers a solution to the pervasive problem of methodology in intertextual studies Moreover the investigation of 1 Peter s use of Isaiah provides a fresh perspective on how Peter utilizes this important source in the construction of his epistle and the communication of his message *Theory and Methodology of Semiotics* Alexandros Ph. Lagopoulos,Karin Boklund-Lagopoulou,2020-11-23 The book is an in depth presentation of the European branch of semiotic theory originating in the work of Ferdinand de Saussure It has four parts a historical introduction the analysis of langue narrative theory and communication theory Part I briefly presents all the semiotic schools and their main points of reference Although this material is accessible in many other Anglophone publications the presentation is marked by specific choices aiming to display similarities and differences The analysis of langue in Part II is also available in Anglophone bibliography but the book presents Saussurean theory according to a new theoretical rationale and enriched with later developments In addition it is orientated so as to offer the foundation for the part that follows Part III is a presentation of Greimasian narrative theory well documented in Francophone bibliography but

poorly represented in Anglophone publications The presentation extends the theory in both a qualitative and a new quantitative direction and includes a great number of examples and two extended textual analyses to help the reader understand and apply it Part IV communication theory combines an extension of Greimasian sociosemiotics with other schools of thought This original theoretical section discusses fourteen consecutive communication models the synthesis of which results in a holistic social semiotic theory of communication
