Chinese Animation and Socialism ,2021-10-05 Please visit our blog to read an interview with Daisy Yan Du This volume on Chinese

animation and socialism is the first in English that introduces the insider viewpoints of socialist animators at the Shanghai Animation Film Studio in China. Although a few monographs have been published in English on Chinese animation, they are from the perspective of scholars rather than of the animators who personally worked on the films, as discussed in this volume. Featuring hidden histories and names behind the scenes, precious photos and commentary on rarely seen animated films, this book is a timely and useful reference book for researchers, students, animators, and fans interested in Chinese and even world animation. This book originated from the Animators Roundtable Forum, April 2017, at the Hong Kong University of Science and Technology, organized by the Association for Chinese Animation Studies. Zhongnan Taoist Xiao CongHua, 2020-09-17

My mother is dead. My grave will be opened six months later. I was born in her grave. I am a ghost. I was born with a yin constitution and was destined to be a Taoist my whole life. Otherwise, I would definitely not live past the age of thirteen. Don't ask me if there are any ghosts in this world. If you want to see a ghost, burn the paper, write down the name of the dead soul in your blood, and I'll have it come straight to you. **The History of Chinese Animation** Lijun Sun, 2021-02-25

China has been one of the first countries to develop its own aesthetic for dynamic images and to create animation films with distinctive characteristics. In recent years, however, and subject to the influence of Western and Japanese animation, the Chinese animation industry has experienced several new stages of development, prompting the question as to where animation in China is heading in the future. This two-volume set describes the history, present, and future of China's animation industry. The author divides the business's 95-year history into six periods and analyses each of these from an historical, aesthetic, and artistic perspective. In addition, it focuses on representative works, themes, directions, artistic styles, techniques, industrial development, government support, policies, business models, the nurturing of education and talent, broadcasting systems, and animation. Scholars and students who are interested in the history of Chinese animation will benefit from this set, and it will appeal additionally to readers interested in Chinese film studies. *Art in China* Xiaowei Jia, 2007 *Media in China* Stephanie Hemelryk Donald, Yin Hong, Michael Keane, 2014-02-04

Multinational media companies increasingly look to China as a highly important market for the future, but with what degree of confidence should they do so? Media in China is about a new kind of revolution in China, a revolution in which rapidly commercializing media industries confront slow-changing power relations between political, social, and economic spheres. This interdisciplinary collection draws on the expertise of industry professionals, academic experts, and cultural critics. It offers a variety of perspectives on audio-visual industries in the world's largest media market. In particular, the contributors examine television, film, music, commercial, and political advertising, and new media such as the internet and multimedia. These essays explore evolving audience demographics, new patterns of media reception in regional centres, and the gradual internationalization of media content and foreign investment in China's broadcasting industries. This book will be of use to students and professionals involved in media and communication, as well as anyone interested in contemporary China. *Animation: A World History* Giannalberto Bendazzi, 2015-11-06

A continuation

of 1994's groundbreaking *Cartoons* Giannalberto Bendazzi's *Animation A World History* is the largest, deepest, most comprehensive text of its kind based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often neglected areas, and introducing over fifty previously undiscovered artists. Full of first-hand, never-before-investigated and elsewhere unavailable information, *Animation A World History* encompasses the history of animation production on every continent over the span of three centuries. Volume III catches you up to speed on the state of animation from 1991 to present. Although characterized by such trends as economic globalization, the expansion of television series, emerging markets in countries like China and India, and the consolidation of elitist auteur animation, the story of contemporary animation is still open to interpretation. With an abundance of first-hand research and topics ranging from Nickelodeon and Pixar to modern Estonian animation, this book is the most complete record of modern animation on the market and is essential reading for all serious students of animation history.

Key Features: Over 200 high-quality headshots and film stills to add visual reference to your research. Detailed information on hundreds of never-before-researched animators and films. Coverage of animation from more than 90 countries and every major region of the world. Chronological and geographical organization for quick access to the information you're looking for.

Little Friends Stephanie Donald, 2005-04-07 Contributing to the growing debates on children and media worldwide, *Little Friends* explores the pervasive presence of film culture in the lives of children in China. The book also introduces the work of the little-known Children's Film Studio and the Film Course, a reform period attempt by Chinese filmmakers and policy leaders to control the media to which schoolchildren were exposed. Stephanie Donald uses expansive firsthand interviews, children's drawings, and film history to tell a compelling cinematic story before it is forgotten in the onrush of globalized culture. She is especially careful to bring in the interests and experiences of children themselves. The book follows the trajectory of contemporary media analysis in privileging the use as well as the content of media. The author's turn to the end user enriches her discussion of media literacy, cultural competencies, and perhaps especially in the Chinese case, consideration of the desired uses of media in relation to state priorities and social expectations. This is a trend that belongs to an era of digital experimentation and commercial development in interactive television, streamed news, and entertainment, and the multiple unintended uses of Internet and mobile technologies. Notwithstanding the contemporary context, Donald's arguments consider a range of media deployment that, although not especially new in technological terms, offer new insights into a formalized Chinese media system for children. Scholars and students of Asian and children's film and education will find this unique work a fascinating window into Chinese culture and society and a provocative exploration of media culture.
