My Search For Absolutes A Touchstone:

The Method and Principles of Complementary Reflection in and Beyond African Philosophy Innocent Asouzu, 2005

Questions relating to types of philosophical trends within African philosophy can be very decisive for any idea of African philosophy. In this strikingly novel approach to African Philosophy, the author explores a complementary philosophical trend that goes back to those he calls anonymous traditional African philosophers. Based on their thoughts, he articulates a distinctive variant of the principles method and imperative of complementarity. Ihuanyi danda around which he builds his system. He anchors his reflection on such ambient concepts as the joy of being, *jide kiji*, fragmentation, wholeness, and future reference. *The Search for the Absolute* Jeffrey H. Williams, 2020-03-26

History and archaeology tell us that when our far ancestors began to settle in localized groups, they codified their lives and experiences and formed a collective for mutual support. This proto-civilization would have arisen from each individual's questions about the world and their attempt to understand themselves and their place in the world. These groups or tribes evolved rules of conduct to facilitate communal living and made a calendar for the group's celebration of harvests and other events upon which the group was utterly dependent. This process of social evolution is the origin of religion and of a magical way of looking at Nature. Eventually, this developing worldview was also the origin of science, which is our investigation of Nature to understand something of what is happening around us and to use this knowledge to ensure our survival in a violent indifferent Universe. After all, science and religion seek to answer the same question: Why and how is the natural world the way it is? This book seeks to show how science evolved from religion and magic in response to a need to understand Nature. **Way to Water** Callid

Keefe-Perry, 2014-09-10 *Way to Water* has two primary intentions: to trace the development of the nascent field of theological inquiry known as theopoetics and to make an argument that theopoetics provides both theological and practical resources for contemporary people of faith who seek to maintain a confessional Christian life that is also intellectually critical. Beginning with the work of Stanley Hopper in the late 1960s and addressing the early scholarship of key theopoetics authors like Rubem Alves and Amos Wilder, this text explores how theopoetics was originally developed as a response to the American death of God movement and has since grown into a method for engaging in theological thought in a way that more fully honors embodiment and aesthetic dimensions of human experience. Most of the extant literature in the field is addressed to allow for a cumulative and comprehensive articulation of the nature and function of theopoetics. The text includes an exploration of how theopoetic insights might aid in the development of tangible church practices and concludes with a series of theopoetic reflections. *Paul Tillich and Religious Socialism* Kirk R. MacGregor, 2021-03-19

Paul Tillich and Religious Socialism: Towards a Kingdom of Peace and Justice argues that the Kingdom of God, the reign of God over all human affairs, is via God's

manifestations in love power and justice can be fragmentarily achieved through a religious socialism that creatively integrates the early Tillich's socialist thinking with later insights throughout Tillich's theological career and with contemporary developments in just peacemaking. The resulting religious socialism is defined by economic justice and a recognition of the sacred reality in all human endeavors. It employs Christianity to furnish the necessary depth for warding off materialism and affirming the spiritual dimension of both labor and acquiring material goods. The unbridgeable Marxist chasm between expectation and reality is bridged through new being already historically inaugurated in the Christhood of Jesus. New being is fundamentally oriented toward bringing justice to the poor, the disenfranchised and the marginalized. It affirms the individual and equal value of all persons and thus in Kantian terms promotes a kingdom of intrinsically worthwhile ends rather than a kingdom of instrumentally worthwhile means of things.

The Essential Tillich Paul Tillich, 1999-09-15 Offers anyone struggling with the existential question an introduction to the Protestant theology of Paul Tillich. The book summarizes Tillich's thought.

Religious Internationalism Matthew Lon Weaver, 2010 Religious Internationalism assembles and assesses for the first time the ethics of war and peace in the writings of Paul Tillich. It sketches the evolution of Tillich's thought from the period of his service in the German Imperial Army through the time of the Cold War. The work begins by analyzing Tillich's theological roots and his World War I chaplaincy sermons as the starting point for his thoughts on power and nationalism. Then *Religious Internationalism* looks to his postwar turn to socialist thought and his participation in religious socialism fueling his cultural analyses and culminating in his forced emigration under Hitler. Next it probes the American interwar period giving special attention to Tillich's self-described boundary perspective as well as the one treatise he wrote on religion and international affairs. The book also examines his Voice of America speeches written and broadcast into his former homeland during World War II. Weaver next considers Tillich's message to his English speaking audience of that period emphasizing social and world reconstruction. The discussion continues by examining his vision of a path toward personhood in a bipolar world. Finally the book constructs Tillich's ethics of war and peace as an ethic of religious internationalism suggesting adjustments intended to give it more universal significance. The study concludes that Tillich's thought has provocative contributions to make to debates regarding civilizational conflict, economics and international justice, trade and globalization, the defense of unprotected minorities and immigration policy.

The Touchstone of Architecture Sir Reginald Theodore Blomfield, 1925

The Absolute Necessity of Searching the Scriptures. [The Preface is Signed D. T.] D. T., 1764

The Existentialist Reader Paul S. MacDonald, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis, an informal company.

The Experiential Turn in Eighteenth-Century German Philosophy Karin de Boer, Tinca Prunea-Bretonnet, 2021-05-17 This collection of essays challenges the prevailing assumption that eighteenth century German philosophy prior to Kant was largely defined by post-Leibnizian rationalism and accordingly a low esteem of the cognitive function of the senses. It does so by highlighting the various ways in which

eighteenth century German philosophers reconceived the notion and role of experience in their efforts to identify defend and contest the contribution of sensibility to disciplines such as metaphysics theology the natural sciences psychology and aesthetics Engaging in depth with Tschirnhaus Wolff the Wolffians eclecticism Popularphilosophie the Berlin Academy Tetens and Kant its thirteen chapters present a more nuanced understanding of the German reception of British and French ideas and dismiss the prevailing view that German philosophy was largely isolated from European debates Moreover the book introduces a number of relatively unknown but highly relevant philosophers and developments to non specialized scholars and contributes to a better understanding of the richness and complexity of the German Enlightenment **Paulus, Then**

for Truth in Early Modern France Rebecca M. Wilkin,2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public **America in the Seventies** Beth L.
