this imply about how our universe formed Questions like these are examined in Nature s Balancing Act presented for a wide audience From the Big Bang to present day research ranging from gravitational waves to experiments on antimatter our physical laws are shown to be slightly off balance allowing life to exist In its opening chapters the following is asked What would happen if the strong nuclear force which binds protons and neutrons together were slightly stronger or weaker Would life still be possible We know today that pushing the nuclear force off balance by just a few percent would create a different universe unlike our own Also for life to exist there must be a slight imbalance in the way matter and antimatter were created in the Big Bang If matter and antimatter were exactly in balance then our universe would not exist These are just two examples of the fine tuning of physical laws that must happen for the cosmological conditions to be right for life to exist If the universe wasn t just so you wouldn t be here to read about it Even with a favorable universe how did life on Earth begin How did it survive all this time without being wiped out by a cosmic event Can human life continue to exist for millions of years or will we cause our own extinction These topics are considered in the latter chapters of the book and provide a fascinating look at our existence on Earth and the possibility of life elsewhere

Islam and the West Wagih H. Makky Ph.D.,2019-04-01 This is the third book in the series Islam and the West The West here is atheism as it currently represents Western high culture It is based on the premises that atheism is exclusively the legacy of Western Christianity and the Western fallacy out of sheer ignorance of considering Islam as a Christian heresy that suffers whatever shortcomings Christianity may have Atheism took center stage with the rise of European enlightenment that sent its ideals across the Atlantic to form the intellectual foundation of the founding fathers of the American republic Atheism dismantled Western Christianity avoiding all moral arguments while taking full advantage of the presumably absurd biblical statements about material physical issues such as the age of the universe and instantaneous creation While this is patently an internal Western squabble atheists unabashedly drag Islam into the brawl Western self centeredness cannot shake off bigotry and innate historical hatred of Islam even after renouncing Christianity To make that point the book ascertains the historical fact that the celebrated Western Civilization is simply nothing more than a product of the Islamic Civilization in the sense that all civilizations produce their offspring without exception as none come from a void It does that through discussing Muslim scholars contributions to building an Islamic way of life and Westerners absorbing such massive structure at known geographical points of contact Atheistic arguments are analyzed vis a vis well established Islamic norms and are found wanting A rule of thumb is established that Islam alone can be discussed as a true representative of Religion as opposed to atheism Since atheism's newfound religion is Science its major foundations and breakthroughs till the present are discussed Islam's sacred statements are then shown to be emphatically reconcilable with all findings of modern science without exception These are the Fruits of Knowledge

Mathematical Solution Unifying the Four Fundamental Forces in Nature Richard Lighthouse,2013-08-14 This technical note describes a simple mathematical geometrical solution for unifying the four fundamental forces in nature The fundamental forces of gravitation electromagnetism strong force and the weak force are actually different aspects of the same force In general the relationship between the four forces can be described using a form of the equation for Analog Quadrature Amplitude Modulation Analog QAM This equation form is developed utilizing the concept of a blinking or discrete physical universe The approach to develop the solution is described by minimizing the number of available dimensions zero which is in contrast to numerous efforts String theory M theory Quantum gravity that attempt to maximize the number of dimensions under consideration An Electrical Universe EU model is presented that provides sufficient conditions for a solution This mathematical solution should be tested against experimental data to confirm its validity however it is noted that discrete time forces will be measured differently than time averaged forces in a laboratory environment Confirmation of the theory is suggested through small discrete time interval measurements of the gravitational acceleration force and the electromagnetic force where they will be seen to vary

continuously and yet also retain a time averaged value Each reader must comprehend that our universe literally blinks off and on more than 1 trillion times every second **Energy and Water Development Appropriations for Fiscal Year 1990: Department of the Army** United States.
