International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book. Not least because of the twenty-four chapters, eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education. It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day-to-day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union (CGEIUG). My successors Joe Stoltman, Hartwig Haubrich, Rod Gerber, and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education. This book is proof, if proof were needed, that the international collaboration in this field is alive and well, with contributions coming from all the continents except Antarctica. It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve (1926) would have put it. And as Rod Gerber shows, the issues of globalisation of cultural encounters of differing value systems, of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education.

An Introduction to Qualitative Research Gretchen B. Rossman, Sharon F. Rallis, 2016-04-08 The updated Fourth Edition of Gretchen B. Rossman and Sharon F. Rallis's popular introductory text leads the new researcher into the field by explaining the core concepts through theory, research, and applied examples. Woven into the chapters are three themes that are the heart of the book: first, research is about learning; second, research can and should be useful; and finally, a researcher should practice the highest ethical standards to ensure that a study is trustworthy. The Fourth Edition includes an elaborate discussion of systematic inquiry as well as a nuanced discussion of developing a conceptual framework.

Qualitative Research in Criminology Rita Faria, Mary Dodge, 2022-11-18 This volume introduces innovative and inspired qualitative methods through topics on crime commission, victimisation, and crime control. It highlights how qualitative methods offer significant insights that frame our understanding of the narratives, events, theoretical perspectives, and realities of the social world. This book includes chapters discussing

cutting edge methods which demonstrate how qualitative research can expand beyond traditional approaches It offers diversity in research including gender race and geographic sensitivities The volume addresses a multitude of approaches for using qualitative methodologies including innovative uses of technology mediums such as social media participatory videos Zoom interviewing and photographic visual methods as means of collecting and co producing relevant data on meaning Ultimately this book illustrates how qualitative criminology allows for deeper and more nuanced understandings of local and regional specificities in a globalized world and how social interactions are influenced by individual interpretations social interactions and collective decision making This volume is an essential read for graduate students and researchers in criminology and other social science disciplines interested in qualitative empirical research and informed policy making
