Reassembling the Strange Thomas Anderson, 2018-10-15 This book examines how Westerners understood and processed Madagascar and its environment during the nineteenth century Madagascar's unique ecosystem crafted its reputation as a strange place full of unusual species Westerners however often minimized Madagascar's peculiar features to stress the commonality of its fauna and flora with the world The attempt to understand the island through science led to a domestication of its environment that created the image of a tame and known world capable of being controlled and used by Western powers At the heart of the exploration of Madagascar and its transformation in Western eyes from a strange world to a cash crop colony were missionaries and naturalists who relied upon global experiences to master the island by normalizing the peculiar qualities of Madagascar's environment This book reveals how the environment played a dominant role in understanding the island and its people and how current environmental debates have evolved from earlier policies and discussions about the environment

Contemporary American Women Fiction Writers Laurie Champion, Rhonda Austin, 2002-11-30 American women writers have long been creating an extraordinarily diverse and vital body of fiction particularly in the decades since World War II Recent authors have benefited from the struggles of their predecessors who broke through barriers that denied women opportunities for self expression This reference highlights American women writers who continue to build upon the formerly male dominated canon Included are alphabetically arranged entries for more than 60 American women writers of diverse ethnicity who wrote or published their most significant fiction after World War II Each entry is written by an expert contributor and includes L DBLA brief biography L DBLA discussion of major works and themes DBLA survey of the writer's critical reception L DBLA bibliography of primary and secondary sources **The Watkins Book of African Folklore** Helen Nde, 2025-03-11 Combining vivid storytelling astonishing imagination and careful research this is the ultimate collection of African folklore with 50 entertaining tales and commentary from noted folklorist Helen Nde presented in a beautiful foiled gift package From creation myths and foundation legends to fascinating stories of

Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

PRISMATICS: LARRY LEVIS & CONTEMPORARY AMERICAN POETRY Gregory Donovan, Michele Poulos, 2020-03-04
Prismatics Larry Levis he was the star risen out of a constellation of poets coming from Fresno In Prismatics many of our most notable poets offer insightful personal and detailed responses to and assessments of Larry's life and work Especially touching and salient are the interviews with Philip Levine Peter Everwine C G Hanzlicek and David St John Fresno poets and friends who knew him best and who knew Larry from the start They testify to his talent humanity and unmatched originality and voice For lovers of Larry's poetry of contemporary poetry this is an invaluable collection Christopher Buckley author of A Condition of the Spirit As I read through the interviews in Prismatics I found myself pausing in the middle of chapters rather than between them so as to savor the feeling of always being immersed in a rich and rewarding conversation I love the

cumulative warmth of this book of so many poets speaking affectionately and thoughtfully about one of the great American poets of the 20th century as friend colleague lover co conspirator and cynosure But more than a commemoration of Larry Levis Prismatics offers meditations on passion creativity self destruction ambition and the nature of literary legacy It s a book as capacious and complex as the poetry of Levis itself Nicky Beer author of The Octopus Game and The Diminishing House

The Columbia Guide to Contemporary African American Fiction Darryl Dickson-Carr,2005-12-06 In both the literal and metaphorical senses it seemed as if 1970s America was running out of gas The decade not only witnessed long lines at gas stations but a citizenry that had grown weary and disillusioned High unemployment runaway inflation and the energy crisis caused in part by U S dependence on Arab oil characterized an increasingly bleak economic situation As Edward D Berkowitz demonstrates the end of the postwar economic boom Watergate and defeat in Vietnam led to an unraveling of the national consensus During the decade ideas about the United States how it should be governed and how its economy should be managed changed dramatically Berkowitz argues that the postwar faith in sweeping social programs and a global U S mission was replaced by a more skeptical attitude about government s ability to positively affect society From Woody Allen to Watergate from the decline of the steel industry to the rise of Bill Gates and from Saturday Night Fever to the Sunday morning fervor of evangelical preachers Berkowitz captures the history tone and spirit of the seventies He explores the decade s major political events and movements including the rise and fall of d tente congressional reform changes in healthcare policies and the hostage crisis in Iran The seventies also gave birth to several social movements and the rights revolution in which women gays and lesbians and people with disabilities all successfully fought for greater legal and social recognition At the same time reaction to these social movements as well as the issue of abortion introduced a new facet into American political life the rise of powerful politically conservative religious organizations and activists Berkowitz also considers important shifts in American popular culture recounting the creative renaissance in American film as well as the birth of the Hollywood blockbuster He discusses how television programs such as All in the Family and Charlie s Angels offered Americans both a reflection of and an escape from the problems gripping the country
