Learning From Textbooks Bruce K. Britton, Arthur Woodward, Marilyn Binkley, 2012-11-12 It is surprising that there is so little research on textbooks given their centrality to teaching and learning in elementary and secondary schools Textbooks have become a focus of political and cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests Research is absent in this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and economic issues concerning the marketplace are not part of the current debate Without insights of research on considerate text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more content not less thus textbooks will become compendia of information that on the surface satisfy everyone This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection Representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks The chapters provide insight into research and its application to textbook design and improvement stimulating others to follow this lead

The Expert of Subtle Revisions Kirsten Menger-Anderson, 2025-03-18 A thrilling historical mystery about a young woman searching for her father a young man trying to solve an impossible problem and the quest for the power to transcend time From Vienna to San Francisco I was swept away by this fascinating search for family and for answers Janet Skeslien Charles New York Times bestselling author of *The Paris Library* and *Miss Morgan s Book Brigade* In Half Moon Bay California 2016 a young woman waits for her father s sailboat to arrive at port They have agreed to meet on this day and time Yet he never shows He has told her this event might come And if it did she was ready Go to the library in Berkeley find a certain book follow the instructions But what if the instructions lead to more questions than answers In 1933 a young man arrives in Vienna to begin a new post as a professor of mathematics at the university There he finds himself part of the Engelhardt Circle a group of intellectuals that have recently been targeted by a growing anti academic mob The circle includes the preeminent minds of their time and a cast of

characters desperate to get invited into their midst many of whom will stop at nothing to get there As fascism rises and polarization increases moderate voices are drowned out There are whispers of a machine a music box which can transport someone through time But no one can confirm if it s a rumor or true And the only people who know firsthand are not talking Between the young woman who lives off the grid and spends her free time editing Wikipedia entries and picking fights with people online and the circle of intellectuals debating space and time in Vienna on the eve of World War II lie years of history that might easily be erased unless old secrets are unraveled Kirsten Menger Anderson s beautiful meditation on time love and obsession shows us how we never truly know what happened in the past and often how the past eerily mirrors the future

What do Amadeus Mozart David Beckham Marie Curie and Bill Gates have in common Answer all excel in their diverse areas of music sport science and computing The Expert Learner looks at what we know about acquiring such expertise and seeks to apply it to education particularly to classroom teaching Challenging the widely held belief that excellence is the result of innate ability it shows how ability is developed through applied learning and deliberate practice Drawing on studies about expertise The Expert Learner highlights the importance of Providing opportunities and support to develop skills Being motivated to succeed Undergoing extensive deliberate practice Building powerful mental models to handle and organise information Receiving continuous and effective feedback to improve performance Developing self regulation to monitor performance The Expert Learner takes these findings and applies them to education What opportunities do our institutions offer to our students and how much choice do we really give them How do we motivate the unmotivated and how do we stretch our higher achieving students Are we helping learners to think for themselves and to make sense of what they are learning With its rich source of ideas for expert teaching and learning this book looks at some of the ways we can achieve wide awake thinking in the classroom Highly readable plenty of examples and packed with the power of thinking about learning in a way that can make the difference This is a book full of optimism it offers a way to positively think about learning and schools We are not determined by birth social status poverty wealth but we can invest in our learning if we think appropriately Stobart emphasizes not just practice but deliberate coached practice he shows the multiplier effect that comes from seizing opportunities or someone creating opportunities and he shows the importance of risk taking deep knowledge creativity and developing talk about progress BR John Hattie Director Melbourne Education Research Institute University of Melbourne Australia If I were to recommend just one book that all teachers parents employers and politicians who are interested in education should read it would be this one Not only is it full of engaging stories underpinned by important research but it goes to the very heart of what it is to be a successful learner and effective teacher It demolishes the myth of inherited ability as the overriding determinant of achievement and provides an alternative account by unpacking the opportunities experiences and practices that lead to the development of true expertise Read it and use the ideas to challenge backward thinking Professor Mary James University of Cambridge UK With clear arguments and ample research evidence

Stobart dispels the myth of ability and shows us the harm of society's persistent reliance on repackaged IQ tests. He advocates instead for teaching methods and schools that open up rather than close down opportunities. Using research on expertise and compelling examples from sports, science, medicine, and music, this book shows us how good teaching practices such as rich questioning and supportive feedback can engage students in the kinds of deep and purposeful practice needed for adept expert learning. All students can benefit from this model of teaching, not just an elite few. Distinguished Professor Lorrie Shepard, University of Colorado Boulder, USA.
