## **Over Our Heads A Local Look At Global Climate:**

*Over Our Heads* John C. Ryan, 1997      *Forward Drive* Jim Motavalli, 2014-10-14 This comprehensive account of the past present and future of the automobile examines the key trends key technologies and key players involved in the race to develop clean environmentally friendly vehicles that are affordable and that do not compromise on safety or design Undertaking a rigorous interrogation of our global dependency on oil the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars which use both petrol and electricity innovations that could signal a new era of clean sustainable energy The arguments put forward draw on support from an eclectic range of sources including industry insiders scientists economists and environmentalists to make for an enlightening read      *Climate Change and International Politics* Narottam Gaan, 2008

Accustomed to understanding security primarily a matter spatial exercise in distancing and boundary making on the part of states and their military alliances to secure borders and institutions from outside threats the nations of the world have so far given a short shrift to the gravity of environmental degradation as a factor or catalyst of intrastate or interstate conflict or at worst a security threat to entire humanity until the shafts of retaliatory responses of the infuriated climate change to the cloddish and brutish power of the rich industrialized nations to destroy it by its emission of carbon dioxide and other greenhouse gases pointed toward man menacing with funereal and cascading consequences of global warming Thus climate change which has so far been on the fringe of human concern or in American President's view a myth or a hoax has catapulted into the center stage of great political flare up among the nations of the world on the issue of apportioning the responsibility on rich industrialized nations or the populous South to mitigate the dangers of climate change which seems to be mired in the contradiction between North's advocacy of inequity in having uncontested access to the atmosphere as carbon sinks and equity while disabusing the atmosphere of the carbon debris Not walking on trodden furrows this book expatiates on the desideratum of a paradigm shift from faith in the Newtonian mechanistic view of the universe to a faith in the profundity of Eastern wisdom and new insights presently found in science which see both nature and human beings as warp and woof woven beautifully into the divine tapestry      **Big Green Purse** Diane Maceachern, 2008-02-28 Read Diane McEachern's posts on the Penguin Blog Protecting our environment is one of the biggest issues facing our planet today But how do we solve a problem that can seem overwhelming even hopeless As Diane MacEachern argues in *Big Green Purse* the best way to fight the industries that pollute the planet thereby changing the marketplace forever is to mobilize the most powerful consumer force in the world women MacEachern's message is simple but revolutionary If women harness the power of their purse and intentionally shift their spending money to commodities that have the greatest environmental benefit they can create a cleaner greener world Spirited and informative this book targets twenty commodities cars cosmetics coffee food paper products appliances cleansers and more where women's dollars can make a dramatic difference provides easy to

follow guidelines and lists so women can choose the greenest option regardless of what they're buying along with recommended companies they should support encourages women to spend wisely by explaining what's worth the premium price some green products cost what's not and when they shouldn't spend money at all and differentiates between products that are actually green and those that are simply marketed as ecofriendly Whether readers want to start with small changes or are ready to devote the majority of their budget to green products MacEachern offers concrete and immediate ways that women can take action and make a difference Empowering and enlightening Big Green Purse will become the green shopping bible for women everywhere who are asking What can I do      **Cascadia Scorecard, 2005** Northwest Environment Watch (Organization), 2005      **The Benefits of Intercity Passenger Rail** United States. Ryan, 1999 Consider your way of life and the effect that you have on the planet and ask yourself the following question If everyone on Earth lived like you what would the impact be on the natural world and its finite resources Probably catastrophic According to John Ryan it's time for us to reexamine our actions and reconsider our options In Seven Wonders Ryan informs readers of the extraordinary benefits of such familiar things as the bicycle the ceiling fan the clothesline the condom Thai food the public library and the ladybug and how using them can help solve critical global problems such as air pollution ozone layer depletion and toxic pesticide runoff Our high consumption American way of life creates enormous ecosystem damage John Ryan artfully demonstrates how we can adopt relatively easy ways to lessen this damage and at the same time improve the health of our shared natural environment and of our families      **Alternative Library Literature, 1998/1999** Sanford Berman, James P.
