**Overseas Chinese Entrepreneurship and Capitalist Development in Southeast Asia** Annabelle R. Gambe, 2000 The study aims at finding an explanation to the economic development of Southeast Asia To achieve this end Indonesia Malaysia Thailand and the Philippines have been chosen as the foci of the study To explain the region's recent success the study is guided by the hypothesis that overseas Chinese entrepreneurship exercised by a group belonging to a discriminated ethnic minority is an indispensable component of the capitalist development of Southeast Asia Overseas Chinese businesses dominate nearly all branches of the economy of their respective countries of residence On a regional scale they are acknowledged to control two thirds of the region's retail trade The hypothesis of the study is validated by the empirical findings Furthermore the study has arrived at the conclusion that Southeast Asia is host to a type of entrepreneurship Overseas Chinese entrepreneurship that evolved and developed throughout the centuries and proven for its resiliency and risk taking abilities It did not create the boom in the region however Liberal government policies the inflow of huge foreign capital and the availability of cheap and skilled labor among the indigenous population are among the more crucial factors that facilitated this transformation

**Rural Capitalists in Asia** Mario Rutten, 2005-08-18 This is a comparative study of small capitalists and rural industrialists in three Asian countries Studies on the entrepreneurial class in South Asia tend to focus on the structural aspects of entrepreneurial behaviour while studies on this class in Southeast Asia tend to focus on cultural aspects of their behaviour In fact this book points to striking similarities between Indian overseas Chinese and Muslim businessmen in Asia similarities usually hidden under variations in analytical approaches Although this study emphasizes similarities within Asia it does not support the view of a specific Asian business pattern different to the rise of non Asian especially European entrepreneurs The findings are of major interest not just within the fields of anthropology and entrepreneurship but to all scholars working on South or Southeast Asia who will find much of interest in the author s observations of variable research results between the two regions

Gomez, Hsin-Huang Michael Hsiao, 2013-12-19 Presents empirical findings from different South East Asian countries to demonstrate that Chinese businessmen employ a variety of strategies in their networking entrepreneurship and organisational and firm development and concludes that much more research is needed in order to provide a full understanding of Chinese business success      **Handbook of Research on Asian Business** Henry Wai-Chung Yeung, 2007 This volume is excellent Students who are interested in Asian business should read it and will find the comprehensive bibliography offered by the different contributors very helpful In light of the recent global financial crises it is time to re-examine the Asian miracles as well as the Western models of business organizations and regulations This volume offers great insights not just on Asian business but also on Western economies and business It is also time to adopt an integrative approach recommended by Yeung through comparative research of businesses and economies in different institutions and cultures Yifei Sun *Economic Geography* An absolute must have for college library reference shelves filled cover to cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed The study of Asian business has reached equality in importance to the study of business in Europe and North America Researchers who study any of these regions have an incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now Nonetheless the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world Eurasian Geography and Economics This book is extremely comprehensive and well researched It will be of particular interest to scholars in the fields of international business development studies economic geography regional studies as well as international and national policymakers Science Technology Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium This accessible and comprehensive Handbook brings together state of the art reviews of Asian business in an expansive range of areas including business organizations strategic management marketing state business relations business and development business policy issues It is argued that whilst academic studies on Asian business have been in existence for over two decades there is relatively little systematic integration of our knowledge and research on Asian business The contributors drawn from a variety of disciplines within the social sciences aim to redress the balance with their lively cutting edge discussion Serving as a timely overview of more than two decades of scholarly research this Handbook will be an essential resource for academics students and researchers interested in Asian business      *Race, Ethnicity, and the State in Malaysia and Singapore* Kwen Fee Lian, 2006-07-01 Because

Malaysia and Singapore share a common colonial migration and political history the racial ethnic composition of the two societies are unsurprisingly similar However since 1965 state nation formation has taken separate trajectories and this has had a differential impact on the processes of racialization and ethnicization in the two countries The contributions in this volume examine how various groups namely the Chinese Malays Tamils Eurasian and Orang Asli have accommodated or resisted the dominant influence of the state in incorporating and subordinating them Students and scholars of race and ethnicity will be interested in this work as it is the first attempt to bring together the work of several writers in documenting the consequences of state policies on ethnic formation in the region and raises theoretical issues relevant to this **Chinese Capitalism in a Global Era** Henry Wai-Chung Yeung, 2004-03 Yeung examines overseas Chinese capitalism in East and Southeast Asia in a time of accelerated globalization and the evolution of Chinese capitalism through the participation of political and business elites in the global economy Chinese and Indian Merchants in Modern Asia Chi-cheung Choi, Takashi Oishi, Tomoko Shiroyama, 2019-10-21 In *Chinese and Indian Merchants in Modern Asia* the contributors put together an important and lucid study of overseas Chinese and Indian merchants and their impacts on the emerging global economy from the nineteenth to twentieth centuries In contrast to the conventional focus on the merchants networks per se the chapters of this volume uncover their networking the process in which they constructed and utilized linkages based on the shared concepts such as caste kin alliances and religion By analyzing the interactions between the merchants and the European and Japanese empires along with Asian states this volume provides the critical insights into the configuration of the regional economic order in the past and at present *China's Changing Economy* Curtis Andressen, 2016-05-20 One of the most dramatic events in the global economy over the past few decades has been the rise of China as a global economic power From humble beginnings in the late 1970s the policy shift in China from a planned to market economy has led to economic growth of tremendous speed This book examines the changes taking place in China's economy today and the impacts of these changes in China and abroad The central theme is that the rapid economic growth has come at a cost as many problems have emerged as a result in China's economy and society including a dramatic rich poor gap labour issues problems in the banking sector and severe inflation in the cost of housing as well as challenges with respect to China's external trade The Chinese government recognizes these problems and is taking steps to rebalance its economy and society The book takes a political economy perspective in order to investigate the interplay between the political system in China and the way in which the economy is structured and the manner in which economic changes take place Demonstrating that in order for China to achieve sustained economic growth and social improvement it must undertake serious policy changes it also highlights that if countries are going to deal with China in a stable and productive manner a thorough understanding of key contemporary developments in that country is vital Covering a range of the most pertinent issues facing China today this book will be of interest to students and scholars of Chinese Economics Economic Development and Political Economy *Southeast Asia*
