

## QUALIFICATION PROCEDURES

To determine whether a good qualifies as "originating" under the NAFTA rules of origin, take the following steps:

Step 1	<p>Was the good last processed in one of the NAFTA countries?</p> <p>If Yes, go to step 2.</p> <p>If no, the good does not qualify.</p>
Step 2:	<p>Do any of the materials or components used in the good come from outside Canada, The United States or Mexico, or otherwise do not qualify as originating under the NAFTA rules of origin in their own right?</p> <p>If yes, go to step 3+.</p> <p>If no, the good qualifies.</p>
Step 3:	<p>Determine the HS Tariff Classification number of the good that you produce. (Usually the six digit level is sufficient).</p>
Step 4:	<p>Using the HS Tariff classification number, identify the specific rule(s)** of origin in Annex 401 that applies to the good.</p>
Step 5:	<p>Determine the HS classification of the non-originating materials or components used in producing the good in a NAFTA country.</p>
Step 6:	<p>Does the change from the tariff classification of the non-originating materials to the tariff classification of the good meet the tariff change required in the specific rule(s) of origin you identified in step 4?</p> <p>If yes, the tariff classification change requirement is met and, if there are no other requirements to be met in the rule (e.g. a value content test), the good qualifies. If there are other requirements, go on to them.</p> <p>If no, the good does not qualify, unless the good falls under certain exceptions.***</p>
