 main goals are to bring together in a concise way all the methodologies standards and recommendations related to Data
 Queries Links Semantics Validation and other issues concerning machine readable data on the Web to describe them in detail
 to provide examples of their use and to discuss how they contribute to and how they have been used thus far on the Web of
 Data As the content of the Web becomes increasingly machine readable increasingly complex tasks can be automated
 yielding more and more powerful Web applications that are capable of discovering cross referencing filtering and organizing
 data from numerous websites in a matter of seconds The book is divided into nine chapters the first of which introduces the
 topic by discussing the shortcomings of the current Web and illustrating the need for a Web of Data Next Web of Data
 provides an overview of the fundamental concepts involved and discusses some current use cases on the Web where such
 concepts are already being employed Resource Description Framework RDF describes the graph structured data model
 proposed by the Semantic Web community as a common data model for the Web The chapter on RDF Schema RDFS and
 Semantics presents a lightweight ontology language used to define an initial semantics for terms used in RDF graphs In turn
 the chapter Web Ontology Language OWL elaborates on a more expressive ontology language built upon RDFS that offers
 much more powerful ontological features In SPARQL Query Language a language for querying and updating RDF graphs is
 described with examples of the features it supports supplemented by a detailed definition of its semantics Shape Constraints
 and Expressions SHACL ShEx introduces two languages for describing the expected structure of and expressing constraints
 on RDF graphs for the purposes of validation Linked Data discusses the principles and best practices proposed by the Linked
 Data community for publishing interlinked RDF data on the Web and how these techniques have been adopted The final
 chapter highlights open problems and rounds out the coverage with a more general discussion on the future of the Web of
 Data The book is intended for students researchers and advanced practitioners interested in learning more about the Web of
 Data and about closely related topics such as the Semantic Web Knowledge Graphs Linked Data Graph Databases Ontologies
 etc Offering a range of accessible examples and exercises it can be used as a textbook for students and other newcomers to
 the field It can also serve as a reference handbook for researchers and developers as it offers up to date details on key
 standards RDF RDFS OWL SPARQL SHACL ShEx RDB2RDF LDP along with formal definitions and references to further
 literature The associated website webofdatatoolkit.org offers a wealth of complementary material including solutions to the
 exercises slides for classes raw data for examples and a section for comments and questions **Northern Spotted Owl**
