K. Hartmann, 2003 **English Dictionaries for Foreign Learners** Anthony Paul Cowie, 2002 This is the first history of dictionaries of English for foreign learners from their origins in Japan and East Asia in the 1920s to the computerized compilations of the present Monolingual dictionaries for foreign speakers were a revolutionary development at their outset and now represent a coming together of intellectual technological and commercial forces almost unequalled in book publishing As the author shows the early history of EFL dictionaries was research driven arising directly from research in linguistic theory and language pedagogy now it is user driven determined by what users require or are thought to require The pioneering dictionaries were the work of individuals Current dictionaries are the products of huge databases

manipulated by sophisticated processing as publishers strive to share an immense and ever growing global market The book has both a thematic and a chronological structure Three chapters describe the historical sequence over a period of some sixty years These alternate with chapters dealing with phraseology computers and corpus linguistics and research into dictionary users and uses three subjects central to the development of ELT dictionaries over the last thirty years Anthony Cowie examines the way in which availability of massive computing power has transformed the recording and analysis of current speech and shows how the growth of research into the users and uses of dictionaries has led to developments both in ELT lexicography and method This readable and non technical account is directed at professionals in applied linguistics and English language teaching and at lexicographers but it will fascinate everyone concerned with the analysis of English and faced with the challenge of recording the subtleties of its grammar and meaning      **Standards of English** Raymond Hickey, 2012-12-06 The first book length exploration of standard Englishes with contributions by the leading experts on each major variety of English discussed      *Words, Lexemes, Concepts, Approaches to the Lexicon* Wolfgang Falkner, Hans-Jörg Schmid, 1999      **Cultures, Ideologies, and the Dictionary** Braj B. Kachru, Henry Kahane, 2013-03-01 A pioneering volume addressing issues related to cultures ideologies and the dictionary A cross cultural and cross linguistic study with focus on selected Western and non Western languages A number of in depth case studies illustrates the dominant role ideology and other types of bias play in the making of a dictionary The volume includes invited papers of 40 internationally recognized scholars      **Universities, Pedagogical Encounters, Openness, and Free Speech** Nuraan Davids, Yusef Waghid, 2019-02-01 The authors have spent their lives in South Africa are writing this book from and within a very particular context of compounded oppression marginalisation and otherness In many ways apartheid has both damaged and provided us with the emotions and language through which to speak from and about harmful speech That apartheid managed to succeed in its depravity for as long as it did begins to provide some hint to the often underestimated power and debilitation of speech and language This book therefore is not only an interpretation and analysis of what a philosophy of education might have to offer in relation to the debate on free speech Rather it is also an attempt to make meaning of lived experiences its encounters its conflicts and its harms so that this debate is extended beyond conceptual deliberations and into a realm of human and humane dialogue for the sake of seeing and knowing one another The authors are intent upon understanding the arguments both for and against freedom of speech for the purpose of what makes educational sense In short the book questions whether constraining any form of speech would create conditions for control and manipulation that affect pedagogical encounters adversely If encounters were to remain justifiable ways should be found to undermine a restriction on free speech rather than encouraging the advocacy of constrained free speech within pedagogical encounters The authors raise questions about whether an argument for free speech can ensure more durable and justifiable pedagogical encounters in which the rights of teachers and students to exercise their rights to uncensored free speech should and would never be violated      **The**

**Science Communication Challenge** Gitte Meyer, 2018-03-26 The Science Communication Challenge explores and discusses the whys as distinct from the hows of science communication Arguing that the dominant science communication paradigm is didactic it makes the case for a political category of science communication aimed at furthering discussions of science related public affairs and making room for civilized and reasonable exchanges between different points of view As civil societies and knowledge societies modern democratic societies are confronted with the challenge of accommodating both the scientific logic of truth seeking and the classical political logic of pluralism The didactic science communication paradigm however is unsuited to dealing with substantial disagreement Therefore it is also unsuited to facilitate communication about the steadily increasing number of science related political issues Using insights from an array of academic fields The Science Communication Challenge explores the possible origins of the didactic paradigm connecting it to particular understandings of knowledge politics and the public and to the widespread assumption of a science versus politics dichotomy The book offers a critique of that assumption and suggests that science and politics be seen as substantially different activities suited to dealing with different kinds of questions and to different varieties of science communication
