Gertler, Dariusz Wójcik, 2018 Sixty six leading economists and geographers from around the world investigate the rival theories and perspectives that have sustained the development of economic geography Building on the success of the hugely influential first edition this volume offers a radically revised updated and broader approach to economic geography

Oxford Handbook of Economic Geography , Printbegrnsninger Der kan printes kapitlvis **An Introduction to Geographical Economics** Steven Brakman, Harry Garretsen, Charles van Marrewijk, 2001-12-06 The need for a better understanding of the role location plays in economic life was first and most famously made explicit by Bertil Ohlin in 1933 However it is only recently with the development of computer packages able to handle complex systems as well as advances in economic theory in particular an increased understanding of returns to scale and imperfect competition that Ohlin's vision has been met and a framework developed which explains the distribution of economic activity across space This book is an integrated non mathematical first principles textbook presenting geographical economics to advanced students Never

avoiding advanced concepts its emphasis is on examples diagrams and empirical evidence making it the ideal starting point prior to monographic and journal material Contains copious computer simulation exercises available in book and electronic format to encourage learning and understanding through application Uses case study material from North America Europe Africa and Australasia *Money and Finance After the Crisis* Brett Christophers,Andrew Leyshon,Geoff Mann,2017-06-29 Money and Finance After the Crisis provides a critical multi disciplinary perspective on the post crisis financial world in all its complexity dynamism and unpredictability Contributions illuminate the diversity of ways in which money and finance continue to shape global political economy and society A multidisciplinary collection of essays that study the geographies of money and finance that have unfolded in the wake of the financial crisis Contributions discuss a wide range of contemporary social formations including the complexities of modern debt driven financial markets Chapters critically explore proliferating forms and spaces of financial power from the realms of orthodox finance capital to biodiversity conservation Contributions demonstrate the centrality of money and finance to contemporary capitalism and its political and cultural economies **The Role of Labour Mobility and Informal Networks for Knowledge Transfer** Dirk Fornahl,Christian Zellner,David B. Audretsch,2006-01-17 The purpose of this volume is to analyze the microfoundations of knowledge spillovers The microeconomic analysis of spillovers leads to the insight that the spillover and flow of knowledge is not at all automatic Instead this volume suggests that a filter exists between knowledge and its economic application The focus of this volume is on several key mechanisms that serve to reduce this filter and facilitate the flow of knowledge In particular the volume draws on an emerging literature identifying the role of knowledge spillovers to investigate significance of labor mobility and informal networks as mechanisms facilitating the flow of knowledge No field in economics has dealt extensively with the microeconomics of knowledge spillovers This volume brings together scholars from a broad spectrum of fields including labor economics regional economics the economics of innovation and technological change and sociology to introduce new insights yielded from the microfoundations of knowledge spillovers **Multidisciplinary Economics** Peter de Gijssel,Hans Schenk,2006-07-02 Multidisciplinary economics deliberately uses the insights and approaches of other disciplines and examines what consequences their contributions have for existing economic methods theories and solutions to economic problems Multidisciplinary economists should be at home in their own discipline and meet the high international standards of economic teaching and research that the discipline has developed At the same time they should be able to recognise the limits of economics and be willing to open up new horizons by following new discipline transcending paths on which new insights into the analysis and solutions of economic problems can be found in collaboration with representatives of other disciplines As a result of this search economic methods and theories may have to be adjusted in such a way that they take insights from other disciplines into account They may even have to be replaced by methods and theories that have been developed by other disciplines Knowledge and the Economy Peter Meusbürger,Johannes Glückler,Martina

Meskioui,2013-05-23 The broad spectrum of topics surrounding what is termed the knowledge economy has attracted increasing attention from the scientific community in recent years The nature of knowledge intensive industries the spatiality of knowledge the role of proximity and distance in generating functional knowledge the transfer of knowledge via networks and the complex interplay between knowledge location and economic development are all live academic issues This book the fifth volume in Springer s Knowledge and Space series focuses on the last of these the multiple relationships between knowledge the economy and space It reflects the conceptual and methodological multidisciplinary emerging from this scholarship yet where there has up to now been a notable lack of communication between some of the contributing disciplines resulting in lexical and other confusions this volume brings concord and to foster interdisciplinarity These complications have been especially evident in our understanding of the spatiality of knowledge the part that spatial contexts play in knowledge creation and diffusion and the relevance of face to face contacts all of which are addressed in these pages The material here is grouped into four sections knowledge creation and economy knowledge and economic development knowledge and networks and knowledge and clusters It assembles new concepts and original empirical research from geography economics sociology international business relations and management The book addresses a varied audience interested in the historical and spatial foundations of the knowledge economy and is intended to bridge some of the gaps between the differing approaches to research on knowledge the economy and space Stranded Assets and the Environment Ben Caldecott,2018-05-11 Drawing on the work of leading researchers and practitioners from a range of disciplines including economic geography economics economic history finance law and public policy this edited collection provides a comprehensive assessment of stranded assets and the environment covering the fundamental issues and debates including climate change and societal responses to environmental change as well as its origins and theoretical basis The volume provides much needed clarity as the discourse on stranded assets gathers further momentum In addition to drawing on scholarly contributions there are chapters from practitioners and analysts to provide a range of critical perspectives While chapters have been written as important standalone contributions the book is intended to systematically take the reader through the key dimensions of stranded assets as a topic of research inquiry and practice The work adopts a broad based social science perspective for setting out what stranded assets are why they are relevant and how they might inform the decision making of firms investors policymakers and regulators The topic of stranded assets is inherently multi disciplinary cross sectoral and multi jurisdictional and the volume reflects this diversity This book will be of great relevance to scholars practitioners and policymakers with an interest in include economics business and development studies climate policy and environmental studies in general **The Evolution of Path Dependence** Lars Magnusson,Jan Ottosson,2009-01-01 The notion and interpretation of path dependence have been discussed and utilized in various social sciences during the last two decades This innovative book provides significant new insights onto how the different applications of path dependence have

developed and evolved The authors suggest that there has been a definite evolution from applications of path dependence in the history of technology towards other fields of social science They also discuss the various definitions of path dependence strong or weak and explore the potential applications of path dependence in new areas such as political economy and economic geography With new perspectives on how the debate surrounding path dependence has evolved this book will strongly appeal to postgraduate students and scholars of economic history economic geography political science and business studies

*Understanding Local Economic Development* Emil Malizia, Edward J. Feser, Henry Renski, Joshua Drucker, 2020-10-05 This book offers insights into the process and the practice of local economic development Bridging the gap between theory and practice it demonstrates the relevance of theory to inform local strategic planning in the context of widespread disparities in regional economic performance The book summarizes the core theories of economic development applies each of these to professional practice and provides detailed commentary on them This updated second edition includes more recent contributions regional innovation agglomeration and dynamic theories and presents the major ideas that inform economic development strategic planning particularly in the United States and Canada The text offers theoretical insights that help explain why some regions thrive while others languish and why metropolitan economies often rise and fall over time Without theory economic developers can only do what is politically feasible This text however provides them with a logical tool for thinking about development and establishing an independent basis from which to build the local consensus needed for evidence based action undertaken in the public interest Offering valuable perspectives on both the process and the practice of local and regional economic development this book will be useful for both current and future economic developers to think more profoundly and confidently about their local economy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**Dynamics of Economic Spaces in the Global Knowledge-based Economy** Sam Ock Park, 2014-09-19 This book addresses how economic spaces dynamically change within the context of the global knowledge based economy Specifically it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization knowledge based economy information society service world climate change and population aging Focusing on East Asia especially on Korea it deals with case studies regarding the processes and patterns of these global dynamics looking at economic spaces of various spatial scales and types of economic actors This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy It also emphasizes the analysis of empirical studies at the level of firm region and state by considering an evolutionary perspective over time In developing its theoretical framework this book examines regional resilience intangible assets service innovation path dependence and other notions related to the evolution of economic spaces and incorporates these elements into real world case studies The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy An integral model of service innovation the integration of path dependence and regional resilience the interaction between firm and region for the accumulation of intangible assets and the roles of governments and global firms these are all essential to understanding the dynamics of economic spaces in East Asia The theoretical model and case studies in this book suggest policy implications for developing countries especially in the Asian and African regions with regard to regional development and innovation policies

**The Relational Economy** Harald Bathelt, Johannes Glückler, 2011-06-23 How are firms networks of firms and production systems organized and how does this organization vary from place to place This book synthesizes theories from across the social sciences with empirical research and case studies in order to answer this question

*The New Introduction to Geographical Economics* Steven Brakman, Harry Garretsen, Charles van Marrewijk, 2009-04-09 Geographical economics starts from the observation that economic activity is clearly not randomly distributed across space This revised and updated introduction to geographical economics uses the modern tools of economic theory to explain the who why and where of the location of economic activity The text provides an integrated first principles introduction to geographical economics for advanced undergraduate students and first year graduate students and has been thoroughly revised and updated to reflect important developments in the field including new chapters on alternative core models and policy implications It presents a truly global analysis of issues in geographical economics using case studies from all over the world including North America Europe Africa and Australasia and contains many computer simulations and end of chapter exercises to encourage learning and understanding through application

Global and Regional Dynamics in Knowledge Flows and Innovation Chris Van Egeraat, Dieter Kogler, Phil Cooke, 2015-10-14 Innovation which in essence is the generation of knowledge and its subsequent application in the marketplace in the form of novel products and processes has become the key concept in inquiries concerning the contemporary knowledge based economy Geography plays a decisive role in the underlying processes that enable and support knowledge formation and diffusion activities Place specific characteristics are considered especially important in this context however more recently investigation into innovative capacity of places has also turned its attention to external knowledge inputs through innovation networks and increasingly recognize the evolutionary character of the processes that lead to knowledge creation and subsequent application in the marketplace The chapters that comprise this book are embedded at the intersection of the dynamic processes of knowledge production and creative destruction The first three contributions all discuss the role of global innovation networks in the context of territorial and or sectoral dynamics while the following two chapters investigate the evolution of regional or metropolitan knowledge economies The final three contributions adopt a knowledge base approach in order to provide insight into the organisation of innovation networks and spatiality of knowledge flows This book was published in a special issue of European Planning Studies **International Business Strategy** Peter J Buckley, Pervez Ghauri, 2015-02-20 With stagnated demand in many home economies the need to internationalize and exploit foreign market opportunities has never been more paramount for businesses to succeed at a global level However this process raises a number of questions such as can firms use their knowledge of one market in the next Can firms pursue internationalization on several fronts at the same time How should firms handle cultural and institutional differences between markets This textbook provides students with the core research in international business and strategy including organization efficiency external relationships and the challenges found in an increasingly multicultural world Each part begins with a presentation of the issues and controversies faced in that particular area followed by a synthesis of the research which provides avenues for future research To facilitate and encourage further debate and learning each part also includes at least one original case study Compiled by two of the World's leading scholars of international business and supplemented with critical commentaries and a range of integrative case studies this comprehensive textbook provides advanced students of international business and strategy with a resource that will be invaluable in their studies and beyond *Unfolding Cluster Evolution* Fiorenza Belussi, Jose Luis Hervás-Oliver, 2016-08-05 Various theories have been put forward as to why business and industry develops in clusters and despite good work being carried out on path dependence and dynamics this is still very much an emerging topic in the social sciences To date no overarching theoretical framework has been developed to show how clusters evolve Unfolding Cluster Evolution aims to address this gap by presenting theoretical and empirical research on the geography of innovation This contributed volume seeks to shed light on the understanding of clusters and its dynamic evolution The book provides evidence to suggest that traditional perspectives from

evolutionary economic geography need to be wedded to management thinking in order to reach this point Bringing together thinking from a range of disciplines and countries across Europe this book explores a wide range of topics from the capability approach to network dynamics to multinational corporations to firm entry and exit and social capital This book will be of interest to policy makers and students of urban studies economic geography and planning and development
