Colchester, Fortress of the War God David Radford, Adrian Gascoyne, 2013-07-19 This volume is a critical assessment of the current state of archaeological knowledge of the settlement originally called Camulodunon and now known as Colchester The town has been the subject of antiquarian interest since the late 16th century and the first modern archaeological excavations occurred in 1845 close to Colchester Castle the towns most prominent historic site The earliest significant human occupation recorded from Colchester dates to the late Neolithic but it was only towards the end of the 1st century BC that an oppidum was established in the area This was superseded initially by a Roman legionary fortress and then the colonia of Camulodunum on a hilltop bounded on the north and east by the river Colne There is little evidence for continuing occupation here in the early post Roman period but in 917 the town was re established as a burgh and gradually grew in importance After the Norman Conquest a castle was built on the foundations of the ruined Roman Temple of Claudius and a priory and an abbey were established just to the south of the

walled town Although the town as elsewhere was affected by the Dissolution of the Monasteries and the English Civil War it remained essentially medieval in character until the 18th century During the 19th century this process of change was accelerated by the arrival of the railway industrialisation and the establishment of the military garrison Since the 1960s Colchester has been subject to recurring phases of re development the most recent having ended only in 2007 which have had a significant impact on the historic environment Fortunately the town is one of the best studied in the country

Landscapes of the Norman Conquest Trevor Rowley,2022-11-04 For a long time the Norman Conquest has been viewed as a turning point in English history an event which transformed English identity sovereignty kingship and culture The years between 1066 and 1086 saw the largest transfer of property ever seen in English History comparable in scale if not greater than the revolutions in France in 1789 and Russia in 1917 This transfer and the means to achieve it had a profound effect upon the English and Welsh landscape an impact that is clearly visible almost 1 000 years afterwards Although there have been numerous books examining different aspects of the British landscape this is the first to look specifically at the way in which the Normans shaped our towns and countryside The castles abbeys churches and cathedrals built in the new Norman Romanesque style after 1066 represent the most obvious legacy of what was effectively a colonial take over of England Such phenomena furnished a broader landscape that was fashioned to intimidate and demonstrate the Norman dominance of towns and villages The devastation that followed the Conquest characterised by the Harrying of the North had a long term impact in the form of new planned settlements and agriculture The imposition of Forest Laws restricting hunting to the Norman king and the establishment of a military landscape in areas such as the Welsh Marches had a similar impact on the countryside
