Oxford Regional Economic Atlas, 1964 **Oxford regional economic atlas** Oxford University Press, 1960 **The Middle East and North Africa** Alasdair Drysdale, 2024-10-15 This contemporary text the first in over a decade on the region presents the geography of the Middle East and North Africa defined as the Arab World Israel Turkey Iran and Afghanistan Thematically organized the book s eleven chapters focus on the region s physical and climatic setting demographic characteristics migration patterns religious and linguistic diversity political map offshore claims oil and gas resources and subregions and states Within this framework Drysdale emphasizes pressing current problems the impact of climate change in a region where some areas already suffer from extreme summer heat and aridity the challenge of providing additional water in a region where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map ongoing territorial and boundary disputes that often have global repercussions external dependence on the region s prolific oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues *Oxford Regional Economic Atlas* Economist intelligence unit, 1956 *Presentation Outlines and Reading List*, 1962 **National Security Seminar** Industrial College of the Armed Forces (U.S.), 1961 **National Security Seminar: Outlines and Reading Lists** Joint Chiefs of Staff, *National Defense Resources Conference* Industrial College of the Armed Forces (U.S.), 1961 *The Statesman's Year-Book 1978-79* J. Paxton, 2016-12-26 The classic reference work that provides annually updated information on the countries of the world *Area Handbook for the Peripheral States of the Arabian Peninsula* Stanford Research Institute, 1971 **A Century of British Geography** Ron Johnston, Michael Williams, 2022-09-11 These essays trace the evolution of British geography as an academic discipline during the last hundred years and stress how the study of the world we live in is fundamental to an understanding of its problems and concerns Never before has such an ambitious and wide ranging review been attempted and never before has it been done with so much knowledge and passion The principal themes covered in this volume are those of environment place and space and the applied geography of map making and planning The volume also addresses specific issues such as disease urbanization regional viability and ethics and social problems This lively and accessible work offers many insights into the minds and practices of today s geographers *Oxford Regional Economic Atlas* Clarendon Press (Oxford) Cartographic Department, 1960 *The Foreign Relations of Iran* Sepehr Zabih, Shahram Chubin, 2023-11-15 This study of the foreign relations of a small state in a zone of Great Power conflict

focuses on the evolution of Iranian foreign policy from a struggle for national survival to the achievement of preponderance in an otherwise unstable region. The topic is of special interest because of the continuing proliferation of new actors on the international stage and the paucity of published studies of their foreign affairs. It is also particularly timely because of the increasing importance of the Persian Gulf and of oil in world politics. Recognizing that international politics exercises a major influence on the diplomacy of a small state by imposing constraints as well as offering options, the author argues that the success of Iranian diplomacy in achieving a balanced international posture and a strong regional policy is primarily a result of two factors: the gradual transformation of Soviet policy toward Iran from expansionism to accommodation and Iran's enhanced economic and political capabilities. A perceptive interpretation of the international political environment and a realistic recognition of the constraints and opportunities involved have redounded to the advantage of Iran. Consequently, Iran has been able to use its proximity to a Great Power with a long history of expansionist aspirations in order to pursue a posture of de facto nonalignment without abandoning a generally pro-Western orientation. The authors have designed their book to provide a detailed case study of Iranian foreign policy within an analytical framework conducive to theorizing about the foreign policy of other comparable small states. Previous treatments of the subject have ignored insights afforded by contemporary international relations and have been largely historical and descriptive. The present volume, taking a different approach, should serve both the specialist on Iranian affairs and the student of international relations and comparative foreign policy. This study of the foreign relations of a small state in a zone of Great Power conflict focuses on the evolution of Iranian foreign policy from a struggle for national survival to the achievement of preponderance in an otherwise unstable region. The Geography of the Middle East Stephen H. Longrigg, James Jankowski, 2017-09-04 Much of the Middle East is in a continuing state of visible often revolutionary change in almost every field: social, cultural, economic, political. Although time will have greatly modified the conditions here presented, the author emphasizes those aspects which, being the least ephemeral, were likely to remain valid for some years and indicates the areas in which the most change can be expected. Therefore, in evaluating any change that has occurred, the reader will at least be informed of the conditions out of which or because of which such an event occurred. In some cases, Longrigg passes over important aspects of the Middle Eastern region and its component countries almost or entirely in silence, among such aspects being those of military resources, prominent personalities, constitutional or legal issues, budgets and balances of trade. And even on matters upon which he has said something fairly specific, topography, races, and languages, religions, climates, natural resources, and agronomy, industry, communications, there may be too little detailed information to satisfy a reader desirous of a full picture of a given aspect of things in this or that territory. For most of such detail and not

less for an appreciation which may be widely different from the author's the student can very easily look elsewhere the literature of these countries is abundant and accessible Longrigg's attempt has been to offer an objective but informed account of the different nationalities and social forces found in Middle Eastern environments urban and rural in terms of the particular circumstances problems and hopes of the dozen separate and more or less divided states of the region The non specialist reader may from all this learn something true and perhaps suggestive while the expert may find not too much to offend him
