Oxford Textbook Of Geriatric Medicine:

Oxford Textbook of Geriatric Medicine Jean-Pierre Michel, B. Lynn Beattie, Finbarr C. Martin, Jeremy D. Walston, 2018
The third edition of the definitive international reference book on all aspects of the medical care of older persons will provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter as well as on related psychological, philosophical and social issues *Oxford Handbook of Geriatric Medicine* Lesley K. Bowker, James D. Price, Ku S. Shah, Sarah C. Smith, 2018 In an ageing population geriatric medicine has become central to general practice and to emergency and general internal medicine in the hospital setting Diseases are more common in the older person and can be particularly difficult to assess and to treat effectively in a field that has limited evidence yet makes up a substantial proportion of the work of most clinicians Fully updated this second edition of the Oxford Handbook of Geriatric Medicine includes all the information required to deliver effective geriatric care Guidance is given on a range of key treatment areas indicating where practice differs from that of younger adults or is ill informed by evidence where dangers lurk for the inexperienced clinician and on the many ethical and clinical dilemmas common in geriatric practice This accessible handbook is essential reading for all junior doctors and specialist trainees in geriatric medicine and general internal medicine and for all medical and nursing staff who manage older people 1 Ageing 2 Organizing geriatric services 3 Clinical assessment of older people 4 Rehabilitation 5 Falls and funny turns 6 Drugs 7 Neurology 8 Stroke 9 Psychiatry 10 Cardiovascular 11 Chest medicine 12 Gastroenterology 13 Renal medicine **Oxford Textbook of Geriatric Medicine** Jean-Pierre Michel, B. Lynn Beattie, Finbarr C. Martin, Jeremy D. Walston, 2018 The 3rd Edition of The Oxford Textbook of Geriatric Medicine brings together specialists from across the globe to provide every physician and health care provider involved in the care of older people with a comprehensive resource on the medical, social and psychological issues they are likely to encounter in their practice and research Beyond these issues this comprehensive text provides insights into global population ageing, ageing relevant policy developments, healthy ageing, lifecourse, multimorbidity, personalised and person-centred care New material has been added throughout with a strong focus on integrating the impact of age-related physiological and cellular changes with the development of age-related diseases and conditions **Oxford Textbook of Geriatric Medicine** J. Grimley Evans, T. Franklin Williams, **Oxford Textbook of Geriatric Medicine** J. Grimley Evans, 2000 Few if any diseases are specific to old age However factors such as multiple pathology and impaired feedback control mechanisms lead to non-specific or atypical presentation of disease to difficulties in diagnosis to rapid deterioration of untreated disease and to a high incidence of complications The geriatrician must include rehabilitation in clinical care plans and also be aware of the cultural gap that may exist between the old and the younger members of a changing society Ethical issues may arise in the distribution of scarce societal resources between different age groups and in considering the needs and rights of caring relatives as well as those of the disabled older patient Based on these considerations this new

textbook is designed to supplement rather than substitute for textbooks of general medicine As a frame of reference it is specifically designed as a companion volume to the Oxford Textbook of Medicine It draws on an international authorship with an emphasis on combining the fruits of experience in clinical geriatrics with a scientific base in research The various chapters therefore offer both scholarly reviews of fields of knowledge in medical gerontology and firmly practical advice on clinical problems Field reviews include biological origins and mechanisms of aging age associated changes in immunology and other host defences injury responses temperature homeostasis memory and the aging eye Practical issues include the management of foot problems back pain and infections in older patients Further chapters deal with ethical issues the difficulties of carers and the design of services The book includes traditional concerns of geriatric medicine such as hypothermia and postural hypotension but also takes a wider perspective on aging with chapters on topics including the post menopausal state and aging in the Third World References have been kept to a moderate number aimed at providing a rational and selective entree to the literature rather than a comprehensive bibliography

services and offer insight into the effective use of on going assessment **Reichel's Care of the Elderly** Christine Arenson, Jan Busby-Whitehead, Kenneth Brummel-Smith, James G. O'Brien, Mary H. Palmer, William Reichel, 2009-02-09 The sixth edition remains the pioneering text for the practising physician confronted with the unique problems of an increasingly elderly population Dr William Reichel's formative text is designed as a practical and useful guide for health specialists from medical students to practicing physicians This book is not a collection of subspecialty chapters but rather emphasizes the clinical management of the geriatric patient with simple to complex problems The editors have reviewed every chapter and have included the most up to date advances in the care of the elderly New chapters include hormonal therapy in post menopausal women drug therapy for Alzheimer's sufferers alternative medicine the chronic understaffing of nursing homes management of delirium and ethical issues Comprehensive and written for any clinicians caring for older patients including family physicians general internists nurse practitioners geriatricians and other specialists this esteemed text provides practical and trusted advice **Assisted Living Administration** James E. Allen, 2004-08-24 Matching the five domains of practice tested by the NAB's exam for long term care administrators this textbook defines the skills needed to organize staff direct control evaluate and market an assisted living facility for seniors who continue to live active lives The second edition incorporates findings from the Senate Aging Taskforce of 2003 No index is provided Annotation 2004 Book News Inc Portland OR booknews.com **Reichel's Care of the Elderly** Jan Busby-Whitehead, 2016-06-23 A clinical guide for all health specialists needing practical relevant and comprehensive information on managing the elderly patient The Encyclopedia of Aging George L. Maddox, 2013-12-11 Comprehensive multidisciplinary encyclopedia dealing with aging processes and older adults Intended for the educated inquirer who needs a brief authoritative introduction to key topics and issues in aging Signed entries contain cross references Contains lengthy bibliography General index *Clinical Management of the Elderly Patient in Pain* Gary McCleane, Howard Smith, 2006-05-22 Up to date information on pain management including options to consider when conventional treatment is ineffective Providing effective treatment for pain especially to elderly clients can be a vexing problem for even the most knowledgeable clinician In *Clinical Management of the Elderly Patient in Pain* some of the world's leading authorities describe the unique difficulties that arise when trying to provide pain relief to elderly patients They examine conventional treatment with opioid and non steroidal anti inflammatory drugs along with a broad range of alternatives to consider when frontline drugs fail Non drug options for pain relief from the fields of physical medicine and psychology are also explored Essential topics addressed in *Clinical Management of the Elderly Patient in Pain* include pain as an aspect of advancing age how pharmacology differs in elderly patients available therapeutic options including opioids non steroidal anti inflammatory drugs anti epileptic drugs tricyclic antidepressants membrane stabilizers and topical agents physical medicine approaches psychological approaches to pain in the elderly Most publications on this subject focus on the use of opioids non steroidal drugs and other commonly prescribed analgesics

Clinical Management of the Elderly Patient in Pain takes a different approach Editor Gary McCleane MD says Our need with elderly patients is to provide treatment that is both effective and easily tolerated This is not a book devoted to opioids and non steroidal although they are addressed Nor is it about those analgesics used in younger patients being used in smaller doses with the elderly Rather it contains practical options for treating pain when other simple remedies fail to help At times this will involve using conventional analgesics in scaled down doses but at others it will involve using substances not yet fully recognized as possessing analgesic properties because they fit the bill in terms of possible analgesic actions side effect profiles and lack of drug drug interactions and because practical experience suggests they may be useful in the scenario described Clinical Management of the Elderly Patient in Pain is designed as a point of interface between the specialist pain practitioner and the clinician faced with all the problems of satisfactorily managing pain in elderly patients It presents commonsense practical patient oriented options that make it a useful resource for busy clinicians

Caring for the Older Person Ann Bradshaw, RGN, Clair Merriman, RGN, 2007-02-06 The number of older people in our society is increasing rapidly and as they age the demand for safe effective care is growing This book offers readers the knowledge and skill to provide all aspects of care Caring for the Older Person is written in six sections covering the fundamental needs of an older person Assistance with personal cleansing Assistance with movement Assistance to maintain nutrition and fluid intake Assistance with toilet needs Assistance with the need for observation and monitoring Care of the person immediately following death Each section starts with an explanation and includes care procedures in a step by step format Written by two experienced nurses the book is systematic and evidence based using up to date knowledge and government policy It is intended to be a practical aid to improve care for the older person whether in hospital care home or at home and to give the reader the confidence that the care they provide is safe and effective Caring for the Older Person is an essential resource for health care professionals trainees care assistants or paid carers whose work involves caring for an older person or a lay person someone who needs to acquire skill and confidence to care for an older friend neighbour or relative
