Ozone Discourse:

Ozone Discourses Karen Litfin, 1994 How can scientific knowledge be translated into political change Ozone Discourse examines the first global environment treaty the Montreal Protocol and its subsequent revisions which was a highly effective collaboration among scientists policymakers and activists The treaties were the work of a small group of experts who without conventional political or economic resources were able to persuade most of the world's nations to agree to reduce and then eliminate chlorofluorocarbons These experts used their understanding of atmospheric science to supplement the policymakers short term perspective with a wider intergenerational timeframe characteristic of global environmental problems Litfin argues that the discipline of international relations requires a broader conception of power in order to accommodate the knowledge based problems such as environmental degradation

Global Ethics and Environment Nicholas Low, 2002-09-11 As global capitalism expands and reaches ever further corners of the world practical problems continue to escalate and repercussions become increasingly serious and irreversible These practical problems carry with them equally important and ethical issues Global Ethics and Environment explores these ethical issues from a range of perspectives and using a wide range of case studies Chapters focus on the impact of development in new industrial regions the ethical relationship between human and non human nature the application of ethics in different cultural and institutional contexts environmental injustice in the location of hazardous materials and processes the ethics of the impact of a single event

Chernobyl on the global community the ethics of transitional institutions This collection will both stimulate debate and provide an excellent resource for wide ranging case study material and solid academic context Corpus-Assisted Ecolinguistics Robert Poole, 2022-05-05 Corpus Assisted Ecolinguistics introduces and integrates key research concepts principles and techniques in ecolinguistics and corpus assisted discourse study answering foundational questions for researchers new to the discipline and asserting the urgent need to expand its scope Breaking new ground the book analyzes under explored environmental discourses that have a tangible impact on ecological wellbeing and sustainability by perpetuating harmful attitudes practices and ideologies Chapters present in depth case studies including an analysis of the evolving representations of wilderness an eco stylistic analysis of a popular novel and an investigation of the use of humor in reports on animal escapes from slaughterhouses The studies employ a range of corpus analysis techniques to show how ecological degradation and crisis have become normalized and even trivialized in popular discourse but also spaces where positive discourse practices are present By applying tools from corpus linguistics to a diverse range of environmental discourses this book makes a significant contribution to advancing the field of ecolinguistics **Pamphlets on Biography (Kofoid Collection)**, 1891 **The Politics of the Earth** John S. Dryzek, 2022 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future *International Politics in the Arctic* Geir Hønneland, 2017-10-30 As the ice around the Arctic landmass recedes the territory is becoming a flashpoint in world affairs New trade routes cutting thousands of miles off journeys are available and the Arctic is thought to be home to enormous gas and oil reserves The territorial lines are new and hazy This book looks at how Russia deals with the outside world vis a vis the Arctic Given Russia's recent bold foreign policy interventions these are crucial issues and the realpolitik practiced by the Russian state is essential for understanding the Arctic's future Here Geir Hønneland brings together decades of cutting edge research investigating the political contexts and international tensions surrounding Russia's actions Hønneland looks specifically at region building and environmental politics of fishing and climate change on nuclear safety and nature preservation and also analyses the diplomatic relations surrounding clashes with Norway and Canada as well as at the governance of the Barents Sea The Politics of the Arctic is a crucial addition to our understanding of contemporary International Relations concerning the Polar North Producing globalisation Andreas Antoniadou, 2013-07-19 How can we study globalisation in a way that transcends the material ideational rift How has globalisation resonated and or dominated in different national contexts What role has been played by national political economies and domestic institutions in this process Producing globalisation attempts to scrutinise the nature of the interplay between globalisation and national institutional settings Rather than taking globalisation as a given this book explores how concrete political actors produced the phenomenon of globalisation Such an approach aims to bring human agency and its importance to the forefront of theory and

practice in world politics and economics The analysis is based on two case studies Greece and Ireland By examining and comparing the discourses policies and strategies of key national institutional actors in these two countries Producing globalisation offers new insights into the emergence of globalisation as a hegemonic discourse as well as into the theory of hegemonic discourse itself Thus the author invites us to think differently both about the nature of globalisation and the nature of the hegemonic within international political economy
