Haagen Klaus, Bert Kinzey

P 38 Lightning:

P-38 Lightning at War Joe Christy, Jeffrey L. Ethell, 1978 This classic title traces the history of the Lightning from the earliest Lockheed Model 22 through the severe compressibility problems of the prototype YP 38 to the P 38L 5 the fighter bomber reconnaissance aircraft of the USAAF in Italy and the Pacific Graphically illustrated with over 200 action photographs and many eyewitness accounts this book tells the story of a unique and innovative aircraft revered for its adaptability and ability to limp home on one engine where other aircraft would have been destroyed *Lightning Strikes* Steve Blake, 2020-10-04 LIGHTNING STRIKES THE LOCKHEED P 38 tells the full story of one of the most successful and versatile aircraft of the Second World War The P 38 including its F 4 and F 5 photo reconnaissance models eventually served with all the USAAF s numbered overseas air forces from early 1942 to VJ Day The book describes the Lightning s design and its technical details as it gradually evolved and improved from the original XP 38 to its final variant the P 38L 5 The main focus is on its service in the combat theatres from the frigid windswept Aleutian Islands in the North Pacific to the steaming jungles of the South Pacific and Southeast Asia the burning sands of North Africa and the more temperate climes of Europe All the units that flew the Lightning are included as are the experiences of many of their pilots and ground crewmen as they fought the Japanese Empire and the European Axis Also related are the P 38 s service with foreign non U S air forces its postwar commercial utilization as civilian aircraft and the surviving examples in museums around the world The book is extremely well illustrated by over 400 high resolution photographs art work and graphics and is supplemented by detailed appendices P-38 Lightning vs Bf 109 Edward M. Young, 2023-11-23 An exciting account of the aerial battles fought by the USAAF s P38 Lightnings and the Jagdflieger s Bf 109Gs for dominance over North Africa and the Mediterranean USAAF fighter pilots experienced a baptism of fire when flying the technically advanced but fragile P 38 Lightning over North Africa in the wake of 1942 s Operation Torch Their opponents were battle hardened jagdflieger of the Jagdwaffe flying the tried and tested Bf 109 in its very latest Gustav iteration Responsible primarily for escorting USAAF bombers attacking Afrika Korps installations in Tunisia the P 38 units in North Africa had to develop effective tactics to defend the bombers against Luftwaffe fighter attacks For several months the Lightning squadrons had to also cope with shortages of aircraft and spare parts steady losses and a lack of replacement pilots To survive American aviators had to learn quickly While it is difficult to definitively attribute victories in air combat in the air battles over Tunisia and later over Sicily and Italy the claims made by Lightning pilots were comparable to Luftwaffe claims for P 38s destroyed Edward M Young turns his attention to the bitterly fought air war in North Africa and the Mediterranean in 1942 43 Using original archival sources official records and first hand accounts from both USAAF and Luftwaffe veterans as well as newly commissioned artwork and 50 carefully selected photographs from official and personal archives this book sees two of the most iconic piston engined fighters of their era pitted head to head for control of the skies in a key theatre of World War II **P-38 Lightning in Detail & Scale, Part 1** Bert Kinzey, 2024-12-23

The Germans called it Der Gabelschwanz Teufel or The Forked tailed Devil The Japanese referred to it as two planes with one pilot But whatever it was likened to the Lockheed P 38 Lightning represented a giant step forward in combat aircraft design and technology With its twin engine twin boom design and a fuselage pod between the booms the P 38 Lightning was a radically different design from any previous fighter aircraft Its high speed and long range coupled with its firepower being concentrated in the fuselage pod made it one of the most formidable fighters of World War II Ideally suited for operations in the Pacific it scored more aerial victories in that theater than any other USAAF fighter In 1998 Detail Scale published two books on the P 38 Lightning These publications were very popular but have been out of print for quite some time This publication P 38 Lightning in Detail and Scale Part 1 is the first of two newly expanded updated and revised editions of Detail Scale's previous two part coverage of the Lightning A considerable number of color photographs both historical and detail in nature have been added The focus of this volume is on the so called early Lightnings beginning with the first XP 38 prototype and continuing through the P 38H Also included are the related F 4 F 4A and F 5A photographic reconnaissance variants When it first flew in 1939 the Lightning was larger faster and more heavily armed than any fighter aircraft in the world Early variants of the P 38 found themselves thrust into combat as the United States entered World War II In Europe early Lightnings were plagued with problems associated with British fuels interacting with their exhaust driven turbo supercharged engines at high altitudes Elsewhere in northern Africa the Mediterranean the Aleutians and throughout the Pacific the P 38 performed far more effectively and produced outstanding results in combat America's top two aces of World War II Richard Bong and Thomas McGuire scored all of their victories in the large P 38 while flying against smaller more nimble Japanese aircraft known for their maneuverability More than one hundred other aces scored all or most of their victories in the Lightning This publication features expanded and revised historical overviews of the P 38s along with detailed descriptions of each P 38 variant The Early Lightning Details chapter also features new and expanded content compared to the original 1998 book The chapter is illustrated with scores of detailed and meticulously restored photographs accompanied by captions that illustrate both important features and subtle differences between P 38 variants Some of these images are original archival material while others were chosen from hundreds of photos taken specifically for this book by the authors and their contributors Of note the Lightning Details chapter in P 38 Lightning in Detail and Scale Part 1 features photos of the P 38F Glacier Girl to be found nowhere else This P 38 was recovered from under the Greenland ice pack in 1992 Bert Kinzey took these photos during the restoration of Glacier Girl in 1998 and the photographs illustrate the details of the Lightning that would otherwise be difficult or impossible to represent As with all of our publications in the Detail Scale Series the book concludes with a Modelers Section that features reviews of the plastic model kits of these early P 38 variants Each review impartially and objectively highlights each kit's strengths and weaknesses along with ways that a scale modeler can correct or improve upon accuracy and details P 38 Lightning in Detail Scale Part 1 contains over 200 high resolution
