Paths Of Neighborhood Change Race And Crime In Urban America:

Paths of Neighborhood Change Richard P. Taub, D. Garth Taylor, John Dunham, Jan D. D. Dunham, 1987-09-01 The Resegregation of Suburban Schools Erica Frankenberg, Gary Orfield, 2012-10-01 The United States today is a suburban nation that thinks of race as an urban issue and often assumes that it has been largely solved write the editors of this groundbreaking and passionately argued book They show that the locus of racial and ethnic transformation is now clearly suburban and illustrate patterns of demographic change in the suburbs with a series of rich case studies The book concludes by considering what kinds of strategies school officials and community leaders can pursue at all levels to improve opportunities for suburban low income students and students of color and what ways address the challenges associated with demographic change

The Voucher Promise Eva Rosen, 2022-05-24 A must read for anyone interested in solutions to America's housing crisis Matthew Desmond Pulitzer Prize winning author of *Evicted* Poverty and Profit in the American City An in depth look at America's largest rental assistance program and how it shapes the lives of residents in one low income Baltimore neighborhood Housing vouchers are a cornerstone of US federal housing policy offering aid to more than two million households Vouchers are meant to provide the poor with increased choice in the private rental marketplace enabling access to safe neighborhoods with good schools and higher paying jobs But do they The Voucher Promise examines the Housing Choice Voucher Program colloquially known as Section 8 and how it shapes the lives of families living in a Baltimore neighborhood called Park Heights Eva Rosen tells stories about the daily

lives of homeowners voucher holders renters who receive no housing assistance and the landlords who provide housing While vouchers are a powerful tool with great promise she demonstrates how the housing policy can replicate the very inequalities it has the power to solve Rosen spent more than a year living in Park Heights sitting on front stoops getting to know families accompanying them on housing searches speaking to landlords and learning about the neighborhood s history Voucher holders disproportionately end up in this area despite rampant unemployment drugs crime and abandoned housing Exploring why they are unable to relocate to other neighborhoods Rosen illustrates the challenges in obtaining vouchers and the difficulties faced by recipients in using them when and where they want to Yet despite the program s real shortcomings she argues that vouchers offer basic stability for families and should remain integral to solutions for the nation s housing crisis Delving into the connections between safe affordable housing and social mobility The Voucher Promise investigates the profound benefits and formidable obstacles involved in housing America s poor **Villa Victoria** Mario Luis

Small,2009-05-08 For decades now scholars and politicians alike have argued that the concentration of poverty in city housing projects would produce distrust alienation apathy and social isolation the disappearance of what sociologists call social capital But relatively few have examined precisely how such poverty affects social capital or have considered for what reasons living in a poor neighborhood results in such undesirable effects This book examines a neglected Puerto Rican enclave in Boston to consider the pros and cons of social scientific thinking about the true nature of ghettos in America Mario Luis Small dismantles the theory that poor urban neighborhoods are inevitably deprived of social capital He shows that the conditions specified in this theory are vaguely defined and variable among poor communities According to Small structural conditions such as unemployment or a failed system of familial relations must be acknowledged as affecting the urban poor but individual motivations and the importance of timing must be considered as well Brimming with fresh theoretical insights Villa Victoria is an elegant work of sociology that will be essential to students of urban poverty **Understanding and**

Preventing Violence, Volume 3 National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Panel on the Understanding and Control of Violent Behavior,1994-02-01 This volume examines social influences on violent events and violent behavior particularly concentrating on how the risks of violent criminal offending and victimization are influenced by communities social situations and individuals the role of spouses and intimates the differences in violence levels between males and females and the roles of psychoactive substances in violent events **Urban Exodus** Gerald Gamm,2001-03-16 Across the country white ethnics have fled cities for suburbs But many have stayed in their old neighborhoods When the busing crisis erupted in Boston in the 1970s Catholics were in the forefront of resistance Jews 70 000 of whom had lived in Roxbury and Dorchester in the early 1950s were invisible during the crisis They were silent because they departed the city more quickly and more thoroughly than Boston s Catholics Only scattered Jews remained in Dorchester and Roxbury by the mid 1970s In telling the story of why

the Jews left and the Catholics stayed Gerald Gamm places neighborhood institutions churches synagogues community centers schools at its center He challenges the long held assumption that bankers and real estate agents were responsible for the rapid Jewish exodus Rather according to Gamm basic institutional rules explain the strength of Catholic attachments to neighborhood and the weakness of Jewish attachments Because they are rooted territorially defined and hierarchical parishes have frustrated the urban exodus of Catholic families And because their survival was predicated on their portability and autonomy Jewish institutions exacerbated the Jewish exodus Gamm shows that the dramatic transformation of urban neighborhoods began not in the 1950s or 1960s but in the 1920s Not since Anthony Lukas's *Common Ground* has there been a book that so brilliantly explores not just Boston's dilemma but the roots of the American urban crisis *Visions of Place* Zane L. Miller, 2001 These structural shifts involved a variety of familiar nineteenth and twentieth century urban phenomena including not only the switch from suburban village to city neighborhood and the salience of interracial fears but also the rise of formal city planning and conflicts among Protestants Catholics and Jews over the future of Clifton's religious and ethnic ambiance *Gangs* Jacqueline Schneider, 2017-11-30 The task of researching gangs is fraught with difficulties central to which are issues of definition and reliance on certain forms of data for analyses These methodological issues have been acknowledged as limitations in most of the existing research but they have not been explored as being potentially serious flaws contributing to the proliferation of myth or as aggravating factors that exacerbate what is essentially a relatively uncomplicated social process Also unclear from existing studies is the extent to which suppositions about gangs feed moral panics or contribute to the misidentification or over specification of a problem This captivating volume focuses on gangs their formation identity and behaviour with a view to developing a preventive strategy **The ^AOxford Handbook of Environmental Criminology** Gerben J.N. Bruinsma, Shane D. Johnson, 2018-02-08 The Oxford Handbook of Environmental Criminology provides an in depth source for understanding how and why physical setting can influence the emergence of crime affect the environment and impact individual or group behavior *Ethnicity Housing* Frederick W. Boal, 2020-09-29 This title was first published in 2000 This work has its origins in the 1995 Congress of the International Federation for Housing and Planning held in Belfast The theme was Accommodating Differences Differences were defined in broad terms and included ethnic and social economic and political differences However Frederick W Boal's own interest in ethnic differences motivated him to invite a number of Congress participants to make available their papers for inclusion in this book of essays It seeks to offer experience that can be drawn on by housing practitioners who are operating in multi ethnic contexts It also provides empirical material that should contribute to the development of more soundly based theoretical insights in both urban sociology and social geography **Participation and Democracy East and West** Dietrich Rueschemeyer, 2015-05-11 Since Alexis de Tocqueville first made the linkage in his writings on America a healthy democracy has been associated with the flourishing of civil society as measured by popular participation in voluntary and civic activities

and the vitality of organizations that mediate between the individual and the state This volume takes a fresh look at this classic theme in the context of post communist Eastern Europe the West European welfare states and the United States asking what patterns of participation characterize the new democracies of Eastern Europe what levels of civic activism are characteristic of contemporary Western democracies what factors account for differences among countries and changing patterns over time and what do findings suggest about the prospects for democracy in the 21st century Causes of Conduct Disorder and Juvenile Delinquency Benjamin B. Lahey, Terrie E. Moffitt, Avshalom Caspi, 2003-05-22 A great deal has been learned about serious child and adolescent conduct problems but their causes are still not well understood This book brings together an international group of leading authorities to advance specific testable hypotheses about the causes of conduct disorder and juvenile delinquency Four general causal models are delineated the social learning model the developmental pathways model an integrative antisocial propensity model and an integrative ecological developmental model Also provided are models focusing on specific aspects of the origins of conduct problems including contextual psychological and biological influences The authors present significant original theoretical work and map out the kinds of further studies needed to confirm or disconfirm their new or revised hypotheses Democracy's Victory and Crisis Axel Hadenius, 1997-08-28 Leading scholars from a range of disciplines address questions central to the development and survival of democratic rule *Metropolis 2000* Thomas Angotti, 2018-05-30 Originally published in 1993 *Metropolis 2000* analyses 20th century metropolitan development and planning under the economic and environmental conditions of the world's regions Attempts to achieve the physical integration of the city without economic equality have failed The book advances the principle of integrated diversity which emphasises linking neighbourhood planning with a broader vision of the planned metropolis and applies a political economy approach and argues for a new form of pro urban thinking The book argues that the basis for a humane approach to city planning is viewing the metropolis as a beneficial accompaniment to national independence equality and social progress *Cityscape*, 1998 *Community Economic Development in Social Work* Steven D. Soifer, Joseph B. McNeely, Cathy Costa, Nancy Pickering-Bernheim, 2014-11-18 Community economic development CED is an increasingly essential factor in the revitalization of low to moderate income communities This cutting edge text explores the intersection of CED and social work practice which both focus on the well being of indigent communities and the empowerment of individuals and the communities in which they live This unique textbook emphasizes a holistic approach to community building that combines business and real estate development with a focus on stimulating family self reliance and community empowerment The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics The authors delve deep into the social political human and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes Throughout they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED's

next phase **Story and Sustainability** Barbara Eckstein, James A. Throgmorton, 2003-05-23 *Story and Sustainability* explores the role of story in planning theory and practice with the goal of creating U S cities able to balance competing claims for economic growth environmental health and social justice In the book urban practitioners and scholars from fields as diverse as American studies English geography history planning and criminal justice reflect critically on the traditional exclusionary power of storytelling and on its potential to facilitate the transformations of imagination theory and practice necessary to create sustainable democratic American cities The book begins with an editors introduction identifying story sustainable U S cities and democracy as the three key themes Part I advances and refines these concepts connects them to contemporary U S urban planning and provides tools that can be used when reading and interpreting the texts in part II Part II exemplifies amplifies and modifies the key themes and arguments through the presentation of eight texts theoretical and experiential academic and nonacademic expository and narrative and familiar and unfamiliar The combined focus on story and urban sustainability makes this book a unique contribution to planning literature *Criminal Justice Theory* Edward R. Maguire, David E. Duffee, 2008-03-25 *Criminal Justice Theory* is the first comprehensive volume on the theoretical foundations of criminal justice The authors argue that theory in criminal justice is currently underdeveloped and inconsistently applied especially in comparison to the role of theory in the study of crime itself In the diverse range of essays included here the authors and contributors integrate examples from the study of criminal justice systems judicial decision making courtroom communities and correctional systems building the argument that students of criminal justice must not evaluate their discipline solely on the basis of the effectiveness of specific measures in reducing the crime rate Rather if they hope to improve the system they must acquire a systematic knowledge of the causes behind the structures policies and practices of criminal justice Heat Wave Eric Klinenberg, 2003-07-15 Heat waves in the United States kill more people during a typical year than any other natural disaster Focusing on the 1995 Chicago heatwave Klinenberg demonstrates the cracks in the social foundations of the city that remain to this day
