explores the myth of the American West in the nineteenth century as a place for men to assert their masculinity by roughing
it in the wilderness and reveals how this myth played out in a transatlantic context Rico uncovers the networks of elite men
British and American who circulated between the West and the metropolises of London and New York Each chapter tells the
story of an individual who by traveling these transatlantic paths sought to resolve anxieties about class gender and empire in
an era of profound economic and social transformation All of the men Rico discusses from the well known including Theodore
Roosevelt and Buffalo Bill Cody to the comparatively obscure such as English cattle rancher Moreton Frewen envisioned the
American West as a global space into which redemptive narratives of heroic upper class masculinity could be written div
