a powerful nation state by state **Amici Curiae and Strategic Behavior in State Supreme Courts** Scott A. Comparato, 2003-09-30 Applying strategic approaches to both interest groups as amici curiae and state supreme court justices Comparato investigates the influence of judicial retention methods and the ballot initiative on their behavior The results demonstrate that they behave strategically attempting to achieve their goals within the confines of the institutional setting What impact do state level institutions have on the behavior of state supreme court justices and interest groups participating as amici curiae in those courts Specifically is the information provided by interest groups conditioned on the judicial retention system or whether the state uses the ballot initiative and does that information impact the decision making process of the justices Comparato answers these questions by employing strategic theories of judicial and group behavior with groups motivated by the attainment of policy and group maintenance and state supreme court justices motivated by policy and the continued maintenance of their position on the court He argues that the information provided in amicus curiae briefs allows both groups and state supreme court justices to achieve their respective goals In order to answer these questions Comparato analyzes litigant and amicus curiae briefs as well as judicial decisions from seven state supreme courts to evaluate the effects of state level institutions on the types of information provided to state supreme court justices and how those justices respond to that information The results suggest that interest groups do behave strategically providing information to justices that they believe will be useful in helping the justices retain their seats on the court and achieve their desired policy outcomes There is also support for the expectation that the information provided by litigants and amici as well as the retention method have a direct impact on the decision making of justices **Interest Group Politics in the Northeastern States** Ronald J. The New Hampshire Primary And The American Electoral Process Niall Palmer,2018-02-19 New Hampshire is the subject of Palmer s book precisely because it serves as the first presidential primary every four years Many critics of the New Hampshire primary fault it for being too arcane too unrepresentative and too quixotic to use as a gatekeeper of who becomes President Palmer went to new Hampshire expecting to gather research that argued against New Hampshire as first primary As he finished he realized his findings pointed out the opposite that in fact and deed New Hampshire was as good a place to start the primary races as any other No single state is representative The retail politics that aspirants face in New Hampshire is a very useful winnowing device in which a candidate must actually come face to face with real voters who more often than not make a study of the issues and policies that they raise in their questions
