Prescribed Burning in California Wildlands Vegetation Management Harold Biswell, 2023-11-15 Harold Biswell's decades of research and field experience were a major factor in developing policies of controlled or prescribed burning which mimics or reintroduces the natural fire cycle. This comprehensive study introduces the principles and practices of prescribed burning which apply far beyond California within a historical and ecological perspective. Available for the first time in paperback with a new foreword by James Agee, this book places Biswell's study and his legacy in the context of recent developments in the field. Harold Biswell's decades of research and field experience were a major factor in developing policies of controlled or prescribed burning which mimics or reintroduces the natural fire cycle. This comprehensive study introduces the principles and practices. **Prescribed Burning in California Wildlands Vegetation Management** Harold Hubert Biswell, 1989-01-01 **Fighting Fire in the Sierra National Forest** Marcia Penner Freedman, 2015-03-09 To live in the foothills on the periphery of the Sierra National Forest is to live with the certainty of summer wildfires. Each year from April forward Californians watch the sky and sniff the air for telltale signs of smoke. While fire remains a constant threat, the strategy for combating it has evolved with the understanding of its beneficial role in the forest environment. Marcia Penner Freedman traces the history of firefighting and fire management from the forest's early years through the policy shifts that began in the 1960s and the measures used today. **Fire in California's Ecosystems** Jan W. van Wageningen, 2018-06-08 Fire in California's Ecosystems describes fire in detail both as an integral natural process in the California landscape and as a growing threat to urban and suburban developments in the state. Written by many of the foremost authorities on the subject, this comprehensive volume is an ideal authoritative reference tool and the foremost synthesis of knowledge on the science, ecology, and management of fire in California. Part One introduces the basics of fire ecology, including overviews of historical fires, vegetation, climate, weather, fire as a physical and ecological process, and fire regimes, and reviews the interactions between fire and the physical plant and animal components of the environment. Part Two explores the history and ecology of fire in each of California's nine bioregions. Part Three examines fire management in California during Native American and post-Euro American settlement and also current issues related to fire policy, such as fuel management, watershed management, air quality, invasive plant species at risk, species, climate change, social dynamics, and the future of fire management. This edition includes critical scientific and management updates and four new chapters on fire, weather, fire regimes, climate change, and social dynamics. **Tehachapi Renewable Transmission Project (TRTP)**, 2010
