Presidency And Science Advising:

The Presidency and Science Advising Kenneth W. Thompson, 1991 These essays consider the role of the president's science adviser who that adviser should be the requirements for such an official's success and the adviser's relations to the multiple constituencies served This series explores in depth a long neglected area of presidential research Topics in this volume include New Horizons for Science Advising Science Advising Eisenhower to the Present Science Policy Process What to Do When the Experts Disagree Research Family Practice and the University Science and the Art of Money Science Advising Our Most Urgent Problems Co published with the Miller Center of Public Affairs Report of the Miller Center Commission on the Presidency and Science Advising Miller Center Commission on the Presidency and Science Advising, 1989-01 The commission consisting of nine highly placed public officials scientists educators science advisers and science writers looked at science advising as a presidential question rather than one of science policy The core proposition of this report is that the president needs a strong system of science advising which includes a skilled chief science adviser assisted by well qualified staff and with ready access to nongovernmental sources of advice and knowledge Furthermore the commission recommends that a new president consider a spectrum of possible roles for this very flexible staff position and select the roles that best satisfy his needs rather than accept a particular historical model of science advice A major responsibility of a science adviser is to give the president access to the expertise he needs from the science and engineering community inside and outside government Co published with the Miller Center of Public Affairs **Presidential Science**

Klein, 2010-08-16 For the past 50 years a select group of scientists has provided advice to the US President mostly out of the public eye on issues ranging from the deployment of weapons to the launching of rockets to the moon to the use of stem cells to cure disease The role of the presidential science adviser came under increasing scrutiny during the administration of George W Bush which was highly criticized by many for its use and some say misuse of science This edited volume includes for the first time the reflections of the presidential science advisers from Donald Hornig who served under Lyndon B Johnson to John Marburger the previous science advisor on their roles within both government and the scientific community It provides an intimate glimpse into the inner workings of the White House as well as the political realities of providing advice on scientific matters to the president of the United States The reflections of the advisers are supplemented with critical analysis of the role of the science adviser by several well recognized science policy practitioners and experts This volume will be of interest to science policy and presidential history scholars and students
