Rethinking Presidential Constructions of Constitutional Regimes Richard Alexander Izquierdo,2011 ABSTRACT This dissertation assesses the design and incentive structures that link the presidency to constitutional maintenance and renewal when extraordinary times occur and posits that institutional power and historical context were priced into the presidency since its creation This finding has robust implications for understanding the presidency s role in constitutional change and in particular the construction of constitutional regimes Presidents are naturally drawn to the lure of constructing a

constitutional regime by the nature of the office as presidents want to constitutionalize their priorities from rival political interests in order to secure their legacy. Some fortunate presidents aided by historical context actually get the opportunity to do so. After providing a theory of the presidency's role within the constitutional order and its incentive structures, the study then builds upon these insights to construct a coherent model that assesses the dynamics between presidential leadership and historical context in the construction of constitutional regimes. The research finds that there exists an inverse relationship between the degree of constitutional change and the president's role in initiating it. The reason for this inverse dynamic is that extraordinary historical events crowd out the space typically reserved for executive leadership whenever they come to the fore. Conversely, the less extensive the degree of constitutional change, the greater the presidential leadership plays a role in the process. Reconstructive presidents are actually reactive at the level of constitutional politics despite the high praise political commentators offer to this most select group of presidents. Their presidencies' collective effects on constitutional change have been greatly aided, perhaps overwhelmingly, by factors destined for success at the constitutional level due to exogenous factors beyond their control. The coalitional political shifts in electoral support seen during these transformative periods are just a by-product of massive historical events. Presidential leadership is important but not in the actual initiation of the constitutional construction despite the institutional inclination of presidents to chart new paths. A reconstructive president chooses a set of principles, ideology, or commitments with which to define the content of the new regime in place, but his autonomy here is limited to providing a substantive constitutional vision, not the sort of initial decisive action typically associated with leadership efforts. If the analysis of presidents was confined to nameless, faceless institutional actors engaged in the quest for constitutional regime construction, the greatest difference between the efforts of similarly situated presidents would be in the substantive content that each provided to his historic opportunity. Presidential greatness at the constitutional level would not be determined by unusual skill in turning a normal opportunity into a transformative one or in providing a constitutional opening where none was to be found. While the constitutional space opened by historical events crowds out the space for autonomous action by reconstructive presidents, the reverse is true for presidents with a more limited constitutional opening. Presidents constrained by contextual factors must exercise more extensive leadership skills in attempting any efforts to influence constitutional meaning. Since non-reconstructive presidents' openings are smaller, their efforts have to be much more exacting and tactical, even though their payoffs are irredeemably smaller than those of reconstructive presidents. Therefore, non-reconstructive presidents provide the elegance to the model of constitutional construction in that they show how presidential forays into constitutional politics exist within a continuum. Presidential leadership is more institutionally creative and, by necessity, more entrepreneurial at the narrowest openings of constitutional space while it is least in display because less necessary at the level of reconstructive politics where the constitutional space is broadest. The theoretical insight of this research therefore concludes that there exists an inverse relationship between presidential leadership and

historical context in the construction of constitutional regimes The Presidency in the Constitutional Order Joseph M. Bessette, Jeffrey Tulis, 2017-07-12 This classic collection of studies first published in 1980 contributes to the revival of interest in the powers and duties of the American presidency Unlike many previous books on the constitution and the president the contributors to this volume are political scientists not law professors Accordingly they display political scientists concern with structures as well as power with conflict between the branches of government as well as their functional separation and with political prescription as well as legal analysis Underlying the entire volume is a persistent attention to the nature of executive power and its particular manifestation in the American system Part One introduces the foundations that underlie contemporary issues including the famous James Madison Alexander Hamilton debate over the powers of the presidency Contemporary political and scholarly controversies which are the subjects of Part Two include the constitutionality of the War Powers Resolution of 1973 the legislative veto executive privilege and secrecy the character of the presidency presidential selection and the nature of executive power The essays in *The Presidency in the Constitutional Order* represent some of the most cogent thought available about the highest elected office in America and the themes of the volume continue to be timely and provocative **Presidential Power in the United States** Raymond Tatalovich, Byron W.
