Deterrence in the Second Nuclear Age Keith B. Payne, 2021-10-21 Keith Payne begins by asking Did we really learn how to deter predictably and reliably during the Cold War He answers cautiously in the negative pointing out that we know only that our policies toward the Soviet Union did not fail What we can be more certain of in Payne's view is that such policies will almost assuredly fail in the Second Nuclear Age a period in which direct nuclear threat between superpowers has been replaced by threats posed by regional rogue powers newly armed with chemical biological or nuclear weapons The fundamental problem with deterrence theory is that it posits a rational hence predictable opponent History frequently demonstrates the opposite Payne argues that as the one remaining superpower the United States needs to be more flexible in its approach to regional powers *The New Nuclear Age* Ankit Panda, 2025-01-31 The world is entering a new nuclear age Nuclear weapons are returning to the fore of international statecraft in ways unseen since the Cold War With major powers like Russia issuing threats of nuclear strikes China and North Korea continuing to grow their arsenals and new prospects for proliferation from the Middle East to East Asia the world has been thrust into a new era of heightened nuclear risk In this incisive book international security expert Ankit Panda explores the enduring and emerging factors that are contributing to this new nuclear age From strained great power ties to complex multipolar dynamics and the precipitous decline of arms control he shows how our coexistence with the bomb is becoming more complicated and perilous The prospect of nuclear escalation is again shaping how political decision makers and military establishments around the world think and act But unlike the peril of the Cold War a greater number of nuclear players and a plethora of new technologies including AI and exotic new weapons make the search for stability far from straightforward Managing the risks of a nuclear confrontation he argues will require new urgency and thinking to pull us back from the precipice of global catastrophe Film and the Nuclear Age Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future
