Prevention Of Problems In Childhood Psychological Research And Applications:

Handbook of Community Psychology Julian Rappaport, Edward Seidman, 2012-12-06 As a field progresses people write about their own work in journals chapters and books but periodically the work needs to be collected and organized It needs to be brought together in a format that can both introduce new members to the field and reacquaint continuing members with the work of their colleagues Such a collection also affords an opportunity for the growing number of people with particular expertise to provide a reference for others whose work is related but differs in focus This is the first Handbook of Community Psychology It contains contributions from 106 different authors in addition to our editorial introductions Its thirty eight chapters including two that are divided into multiple individually authored parts are concerned with conceptual frameworks empirically grounded constructs intervention strategies and tactics social systems design assessment and analysis cross cutting professional issues and contemporary intersections with community psychology Although interrelated each chapter stands on its own as a statement about a particular part of the field and the volume can serve as a reference for those who may want to explore an area about which they are not yet familiar To some extent community psychologists eschew the distinction between researcher and practitioner and regardless of one's primary work environment university small college practice setting government or grassroots organization there is something of interest for anyone who wants to explore the community psychology approach

Treating Children's Psychosocial Problems in Primary Care Beth Wildman, Tracy Stancin, 2006-05-01 The Forum that led to this volume was the thirteenth in an ongoing annual series sponsored by the Applied Psychology Center APC at Kent State University The resources and programs of the APC allowed for the prominent clinicians and scholars to attend the meeting and interact informally in the picturesque and relaxing atmosphere of the Inn at Honey Run in the heart of the Amish area of Northeast Ohio This environment nurtured interaction among the participants for three days and permitted all to leave the Forum with ideas well beyond those presented in the text We are grateful to the APC for facilitating this endeavor The editors would especially like to acknowledge the ongoing contribution of Kathy Floody without whose help neither the Forum nor this book would exist Kathy arranged for every detail of the Forum from transportation plans rooms food and drink to scheduling of papers discussions and tours of the local area Kathy compulsively reviewed all chapters for references errors and oversights and maintained a positive disposition and encouraging demeanor throughout the process The success of the Forum was as much Kathy's doing as it was the responsibility of the scholars who participated

Handbook of Clinical Behavioral Pediatrics Alan M. Gross, Ronald S.

Drabman, 2013-03-07 Since 1978 the editors have collaborated on several research projects and spent many hours at conventions discussing research graduate education and patient care The idea for this volume arose when we both concluded that the area of behavioral pediatrics needed a how to book Several important scholarly reviews had recently appeared They presented excellent summary information concerning the general assumptions and theories underlying the area of behavioral medicine with children But these volumes devote very little attention to the application of clinical methods What was needed we thought was a book that would allow graduate students and practicing clinicians the opportunity to peer into the minds of eminent practitioners and understand their thinking Thus the book was conceived Editing books represents a special kind of challenge One has to sell an idea to a group of distinguished colleagues They have to believe enough in that idea to devote the considerable time and effort necessary to bring thought into reality In this case there were two ideas we tried to sell to our colleagues

Brown, 2003-09-12 In recent years the escalating costs of health care have caused managed care programs to shift the delivery of pediatric psychological services away from specialized medical centers and into primary care and school settings One result has been a radical expansion of school psychology into issues of clinical intervention health promotion and the assessment of psychotropic medications School psychologists are now expected to either deliver or more likely to provide consultation regarding a wide variety of pediatric psychological services Because this is a recent phenomenon very few school based psychologists or allied health practitioners school counselors and social workers have received training in pediatric psychology The mission of this book is to provide them with a comprehensive and authoritative guide to their newly acquired responsibilities in such areas as psychotherapy psychopharmacology health promotion and
