Preventive And Curative Intervention In Mental Retardation:

Preventive and Curative Intervention in Mental Retardation Frank J. Menolascino, Jack A. Stark, 1988

Handbook of Mental Retardation and Development Jacob A. Burack, Robert M. Hodapp, Edward F. Zigler, 1998-02-28

This book reviews theoretical and empirical work in the developmental approach to mental retardation. Armed with methods derived from the study of typically developing children, developmentalists have recently learned about the mentally retarded child's own development in a variety of areas. These areas now encompass many aspects of cognition, language, social and adaptive functioning, as well as of maladaptive behavior and psychopathology. In addition to a focus on individuals with mental retardation themselves, familial and other ecological factors have influenced developmental approaches to mental retardation. Comprised of twenty-seven chapters on various aspects of development, this handbook provides a timely comprehensive guide to understanding mental retardation and development.

International Review of Research in Mental Retardation Laraine Masters Glidden, 2003-05-03. *International Review of Research in Mental Retardation* is an ongoing scholarly look at research into the causes, effects, classification systems, syndromes, etc. of mental retardation. Contributors come from wide-ranging perspectives including genetics, psychology, education, and other health and behavioral sciences.

Mental Retardation and Mental Health Jack A. Stark, Frank J. Menolascino, Michael H. Albarelli, Vincent C. Gray, 2012-12-06. In late 1985, The President's Committee on Mental Retardation (PCMR) sponsored a National Strategy Conference on Mental Retardation and Mental Health in Washington, D.C. The purpose of this conference was to bring together our nation's leadership in the fields of mental retardation and mental health in order to delineate the state of the art relative to the diagnosis, care, and treatment of citizens with mental retardation/mental illness, as well as to chart a national course for the support and integration of citizens with these challenging needs into the confluence of family and community life. The President's Committee on Mental Retardation recognized that citizens with these needs constitute one of the most underserved and at times forgotten segments of the population. With this in mind, the PCMR called together government, professional, and parental representatives from across the nation to define the nature and extent of the problem, programs, and services that promise hope for substantive improvement in the quality of life of citizens with mental retardation/mental illness.

International Review of Research in Mental Retardation, 1991-01-22. This volume addresses three important areas of current research in mental retardation: behavioral toxicology research and its implications for the cause and prevention of some types of mental retardation; cognitive processes in mentally retarded individuals and the significance of this issue for the further development of remediation techniques and social adaptation and family functioning; and the importance of these topics for the study of mental retardation.

Mental Retardation in the Year 2000 Louis Rowitz, 2012-12-06. When you look at the advances in the field of mental retardation over the past 30 years, it is hard to imagine that more change is inevitable. Yet I think back to the time when early in his presidency President Kennedy called together the brightest scientists, researchers,

doctors and educators to develop a comprehensive plan for the nation to effectively care for treat educate and house persons with mental retardation In the early 1960s the call for new research into the causes and the amelioration of mental retardation the development of community based programs and the development of family care for appropriate education vocational training and jobs were seen as revolutionary But in the 30 years since then we have seen time and time again that it is persons with mental retardation themselves who have led the way When the schools were opened to them they learned more than any one ever thought possible when vocational training was provided they learned skills that led to jobs when employment became available they proved to be good steady workers who earned money and paid taxes When the playing fields were made available to them through programs such as Special Olympics they showed the world they could train and compete and WIN in the sports of the Olympics When communities welcomed them they became our neighbors They have earned the right to play on any field to study in any school to hold a paying job and to be anyone s neighbor **Handbook of Adolescent Psychopathology** Vincent B. Van Hasselt, Michel Hersen, 1995 **The New Morbidity** Alfred A. Baumeister, 1993 **The New Genetics of Mental Illness** Peter McGuffin, Robin Murray, 2013-10-22 The New Genetics of Mental Illness is a collection of papers that discusses the advancement of molecular biology in the context of psychiatry The book presents papers that are organized thematically The text first discusses the basics of biology and quantitative models and then proceeds to covering linkage analysis Next the book deals with various mental disorders including schizophrenia eating disorders and developmental disorders The remaining materials turn their attention to dementia and Huntington s disease The book will be of great use to researchers and practitioners of behavioral sciences such as psychology and psychiatry **Mental Retardation** , 1999
