Magical Thinking Stuart McWilliams, 2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present

Magic and Magicians in the Middle Ages and the Early Modern Time Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large

The Sorcerer's Tale Alec Ryrie, 2010 A lively history set in sixteenth

century England detailing the hitherto unknown case of an extraordinary physician magician and con man named Gregory Wisdom and the London underworld to which he belonged *Magic and Masculinity* Frances Timbers, 2014-02-21 In early modern England the practice of ritual or ceremonial magic the attempted communication with angels and demons both reinforced and subverted existing concepts of gender The majority of male magicians acted from a position of control and command commensurate with their social position in a patriarchal society other men however used the notion of magic to subvert gender ideals while still aiming to attain hegemony Whilst women who claimed to perform magic were usually more submissive in their attempted dealings with the spirit world some female practitioners employed magic to undermine the patriarchal culture and further their own agenda Frances Timbers studies the practice of ritual magic in the sixteenth and seventeenth centuries focusing especially on gender and sexual perspectives Using the examples of well known individuals who set themselves up as magicians including John Dee Simon Forman and William Lilly as well as unpublished diaries and journals literature and legal records this book provides a unique analysis of early modern ceremonial magic from a gender perspective From Bishop to Witch David Gentilcore, 1992 This book reconstructs the complex of ritual behaviour and attitudes towards the sacred of a Mediterranean society over the two hundred and fifty years following the close of the Council of Trent 1563 using sources like episcopal court records and trials for the canonisation of local saints

Tryphonopoulos, 2010-10-30 Despite the painstaking work of Pound scholars the mythos of The Cantos has yet to be properly understood primarily because until now its occult sources have not been examined sufficiently Drawing upon archival as well as recently published material this study traces Pound's intimate engagement with specific occultists W B Yeats Allen Upward Alfred Orage and G R S Mead and their ideas The author argues that speculative occultism was a major factor in the evolution of Pound's extraordinary aesthetic and religious sensibility much noticed in Pound criticism The discussion falls into two sections The first section details Pound's interest in particular occult movements It describes the tradition of Hellenistic occultism from Eleusis to the present and establishes that Pound's contact with the occult began at least as early as his undergraduate years and that he came to London already primed on the occult Many of his London acquaintances were unquestionably occultists The second section outlines a tripartite schema for The Cantos katabasis dromena epopteia which in turn is applied to the poem It is argued here that The Cantos is structured on the model of a initiation rather than a journey and that the poem does not so much describe an initiation rite as enact one for the reader In exploring and attempting to understand Pound's occultism and its implications to his Pound's oeuvre Tryphonopoulos sheds new light upon one of the great works of modern Western literature **History and Religion** Bernd-Christian Otto, Susanne Rau, Jörg Rüpke, 2015-08-31 History is one of the most important cultural tools to make sense of one's situation to establish identity define otherness and explain change This is the first systematic scholarly study that analyses the complex relationship between history and religion taking into account religious groups both as producers of historical narratives as well as distinct topics of historiography Coming from different disciplines the authors of this volume ask under which conditions and with what consequences religions are historicised How do religious groups employ historical narratives in the construction of

their identities What are the biases and elisions of current analytical and descriptive frames in the History of Religion The volume aims at initiating a comparative historiography of religion and combines disciplinary competences of Religious Studies and the History of Religion Confessional Theologies History History of Science and Literary Studies By applying literary comparison and historical contextualization to those texts that have been used as central documents for histories of individual religions their historiographic themes tools and strategies are analysed The comparative approach addresses circum Mediterranean and European as well as Asian religious traditions from the first millennium BCE to the present and deals with topics such as the origins of religious historiography the practices of writing and the transformation of narratives

The Collected Papers of Bertrand Russell, Volume 26 Bertrand Russell, 2020-12-30 The Collected Papers of Bertrand Russell Volume 26 covers a period of transition in Russell's political life between his orthodox and sometimes pugnacious defence of the West in the early post war and the dissenting advocacy of nuclear disarmament and détente that started in earnest in the mid 1950s While some of the

assembled writings echo harsh prior criticism of Soviet expansionism and dictatorship others register growing qualms about the recklessness of American foreign policy and the baneful effects on civil liberties of anti communist hysteria inside the United States Whether continuing to push for western rearmament or highlighting in a more placatory vein the folly of the Cold War s divisions and rival fanaticisms Russell s paramount objective was avoiding a war that threatened global catastrophe Suspended between fear and hope he expounded his evolving political concerns and much else besides including autobiographical reflections and typically common sense guidance for living well in a constant flow of newspaper and magazine articles letters to editors radio broadcasts and discussions and of special note a Nobel Prize acceptance speech Russell also completed two lecture tours of the United States the last of many as well as a landmark such visit to Australia All three of these journeys and the textual record they left are examined in depth using manuscript material and unpublished correspondence from the Bertrand Russell Archives at McMaster University which is mined extensively throughout the volume

Witchcraft, Madness, Society, and Religion in Early Modern Germany H.C. Erik Midelfort, 2024-10-28 H C Erik Midelfort has carved out a reputation for innovative work on early modern German history with a particular focus on the social history of ideas and religion This collection pulls together some of his best work on the related subjects of witchcraft the history of madness and psychology demonology exorcism and the social history of religious change in early modern Europe Several of the pieces reprinted here constitute reviews of recent scholarly literature on their topics while others offer sharp departures from conventional wisdom A critique of Michel Foucault s view of the history of madness proved both stimulating but irritating to Foucault s most faithful readers so it is reprinted here along with a short retrospective comment by the author Another focus of this collection is the social history of the Holy Roman Empire where towns peasants and noble families developed different perceptions of the Protestant and Catholic Reformations and of the options the religious revolutions of the sixteenth century offered Finally this collection also brings together articles which show how Freudian psychoanalysis and academic sociology have filtered and interpreted the history of early modern Germany

Ancient Magic and Ritual Power Paul Mirecki, Meyer, 2015-08-24 This volume contains a series of provocative essays that explore expressions of magic and ritual power in the ancient world The essays are authored by leading scholars in the fields of Egyptology ancient Near Eastern studies the Hebrew Bible Judaica classical Greek and Roman studies early Christianity and patristics and Coptology Throughout the book the essays examine the terms employed in descriptions of ancient magic From this examination comes a clarification of magic as a polemical term of exclusion but also an understanding of the classical Egyptian and early Greek conceptions of magic as a more neutral category of inclusion This book should prove to be foundational for future scholarly studies of ancient magic and ritual power This publication has also been published in paperback please click here for details
