Leading Issues in Competition, Regulation, and Development Paul Cook,2004-01-01 The promotion of liberalized and deregulated markets by bilateral and multilateral aid donors and by global institutions such as the WTO has led to significant attention being paid to competition and regulatory reforms in developing economies The process of reform involves the transfer and diffusion of market models derived from practice and theory in developed countries However in developing countries regulation needs to do more than simply promote competitiveness and consumer interests it also needs to ensure that the market nurtures development By rigorously examining the numerous impacts of regulation this book will help to fill a significant gap in the literature on economic and social development The book now available in paperback draws together contributions from leading experts across a range of disciplines including economics law politics and governance public management and business management The authors begin with an extensive overview of the issues of regulation and competition in developing countries and carefully illustrate the important themes and concepts involved Using a variety of country and sector case studies they move on to focus on the problems of applicability and adaptation that are experienced in the process of transferring best practice policy models from developed to developing countries The book presents a clear agenda for further empirical research and is notable for its rigorous exploration of the links between theory and practice Although there is substantial interest in competition and regulation as yet there has been relatively little investigation of these issues in developing economies This book redresses the balance and will be a valuable resource for researchers academics teachers and students interested in development economics and development studies It will also be of great relevance for practitioners and policymakers working in the fields of competition policy and regulatory reform

Gambling and Speculation Reuven Brenner, Gabrielle A. Brenner, 1990-03-30

Gambling and Speculation takes the long historic perspective of its controversial subject The book offers not only a better understanding of the recent gambling craze but also a fundamental inquiry into human nature and the structure of societies The Brenners argue that the negative image of gamblers and of speculators stems from prejudice whose roots are in the distant forgotten past Legal scholars have frequently confused gambling with speculation and the anti gambling laws were at times erroneously interpreted as implying the prohibitions of contracts in futures and insurance markets One consequence of all this confusion was that during this century both in the United States and England the legislation and law on betting and gambling became ambiguous The authors touch on this issue and make policy recommendations to abolish restrictions on the industry diminish the states role in selling lotteries and at the same time make legal distinctions capable of helping the tiny percentage of players who might be addicted The Brenners recommendations on gambling are based on their conclusion that gamblers are neither mentally ill nor criminals and that gambling does not lead its practitioners to poverty Rather it is the other way around some of the poor and the frustrated gamble Looking at gambling in this way leads to questions about the nature of society What do the fortunate do for those who are not What is society s obligation to people who fall behind in the game of life Answers to these questions require a discussion on the principles of equality capitalism the role of religious influence on society topics that the Brenners have discussed in their previous studies and they do so here too putting gambling within its proper historical context

Entrepreneurship Stefan Kwiatkowski,2017-07-28 Entrepreneurship is the capability to be an entrepreneur Beyond that idea is an ideology that a person s business actions result in industrial growth or technical advances making that person a leader in the economic world The contributors to this latest volume in the Praxiology Series now available in paperback are united in claiming that resourcefulness is a characteristic of people who take effective action and that effectiveness is dependent on good ethical purposes The wide angle definition of entrepreneurship presented in this volume demands that people and organizations engage in more than simple self interest but also display awareness of the prospects for wider growth and advances resulting from their decisions In a period of financial crisis caused by irresponsible behavior by eminent would be entrepreneurs the significance of this perspective should be evident The editors claim that growth not stagnation advantage not decline are irreversible traits of business activity This is why the very concept of entrepreneurship calls for values and responsibility even more than in the past The contributors develop the idea of entrepreneurship from both theoretical approaches religious and practical or applied perspectives This inter and multidisciplinary approach offers readers a chance to rebuild trust in entrepreneurship
