River That Flows Uphill:

The River that Flows Uphill William H. Calvin, 1986 Written as the log of an expedition down the Colorado River through the Grand Canyon this is an acclaimed work of popular science in the tradition of Lewis Thomas and Stephen Jay Gould which speculates on the origin and evolution of human intelligence 18 line drawings 15 maps *Slicing Pizzas, Racing Turtles, and Further Adventures in Applied Mathematics* Robert B. Banks, 2012-05-02 Banks turns trivial questions into mind expanding demonstrations of the magical powers of mathematics generously garnished with his unpredictable wit Booklist Have you ever daydreamed about digging a hole to the other side of the world Robert Banks not only entertains such ideas but supplies the mathematical know how to turn fantasies into problem solving adventures Now the author of *Towing Icebergs Falling Dominoes* and *Further Adventures in Applied Mathematics* presents another collection of puzzles to sharpen your thinking and mathematical skills The problems range from the wondrous to the eminently practical What s the total number of people who ve lived on Earth How do you get the most pizza slices with the least number of cuts To go from point A to point B in a downpour should you walk slowly jog moderately or run as fast as possible to get least wet What is the length of the seam on a baseball If all the ice in the world melted what would happen to Florida the Mississippi River and Niagara Falls Why do snowflakes have six sides Covering a broad range of fields from geography and environmental studies to map and flag making Banks uses mostly basic algebra and geometry to solve problems And if famous scientists have also pondered these questions he shares the historical details with the reader Banks displays a playful imagination and love of the fantastic that one would not ordinarily associate with a mathematical engineer entertaining *The Christian Science Monitor* **The Rough Guide to Ireland** Margaret Greenwood, Mark Connolly, 2003 Including detailed guidance to exploring the countryside and historic sites this fully revised guide offers a complete picture of the beautiful island of Ireland north and south of color photos **Where the River Flows** Sean W. Fleming, 2019-08-06 Rivers are essential to every aspect of civilization yet how many understand how they work Fleming takes readers on a journey along our planet s waterways providing a scientist s reflections on the profound interrelationships that rivers have with landscapes ecosystems and societies *The Upside Down River: Tomek's Journey* Jean-Claude Mourlevat, 2022-04-07 Tomek lives a quiet life running his late parents village store which has everything you could ever need and more Then one day a girl visits She asks Tomek if he sells something he s never heard of before a drop of water from the magical River Qjar which flows back to front and upside down When he admits he has none she slips away Tomek is desperate to follow the mysterious girl and so he sets out on an incredible adventure To find the upside down river he must journey through strange and wondrous places the Forest of Oblivion where monstrous bears roam a meadow of deadly scented flowers a long hidden island cursed by a witch and beyond A million copy bestseller in France this beloved fantasy story is at last published in English for the very first time Translated by Ros Schwartz Fear Itself Rush W. Dozier, 1999-11-29 A Pulitzer Prize nominated science writer conducts a thrilling journey

through the science and everyday reality of this most human emotion Illustrations **The Story of Human Spiritual Evolution** Richard Ferguson, 2012-10 This book is one of a kind It traces the history of human awareness of God and belief back to its earliest roots long before the Bible the Koran the Upanishads and other writings It shows how the foundation for belief in God was contained within the instant of creation itself Scientists call this the big bang It shows that as the universe developed there came a point in human development where we had the capability to begin to be aware of an afterlife These ideas were primitive by our standards today but they served to create a solid foundation for increasing complex and more thorough understandings of who God is and our relationship with Him This book covers the well known axial age where there was a watershed or flood of prophets and holy men who advanced understandings of both philosophy and theology and science in the hundreds of years before the coming of Jesus Christ In a real sense they prepared the way for God's son and His gospel It is these men who changed the course of human understanding of God with new revolutionary ideas that advanced the self revelation of God to humankind The last part of the book looks at religion today and how we got here and ends with God's view of humanity as we constantly strive toward God on our individual spiritual journeys **The Old Country** Sir Henry John Newbolt, 1906 Restoring Colorado River Ecosystems Robert W. Adler, 2012-06-22 Over the past century humans have molded the Colorado River to serve their own needs resulting in significant impacts to the river and its ecosystems Today many scientists public officials and citizens hope to restore some of the lost resources in portions of the river and its surrounding lands Environmental restoration on the scale of the Colorado River basin is immensely challenging in addition to an almost overwhelming array of technical difficulties it is fraught with perplexing questions about the appropriate goals of restoration and the extent to which environmental restoration must be balanced against environmental changes designed to promote and sustain human economic development Restoring Colorado River Ecosystems explores the many questions and challenges surrounding the issue of large scale restoration of the Colorado River basin and of large scale restoration in general Robert W Adler evaluates the relationships among the laws policies and institutions governing use and management of the Colorado River for human benefit and those designed to protect and restore the river and its environment He examines and critiques the often challenging interactions among law science economics and politics within which restoration efforts must operate Ultimately he suggests that a broad concept of restoration is needed to navigate those uncertain waters and to strike an appropriate balance between human and environmental needs While the book is primarily about restoration of Colorado River ecosystems it is also about uncertainty conflict competing values and the nature pace and implications of environmental change It is about our place in the natural environment and whether there are limits to that presence we ought to respect And it is about our responsibility to the ecosystems we live in and use **Town Journal** ,1925 **Women without Faces** Dale A. Johnson, 2012-05-28 This is a story about the feminine deities Xi Wang Mu and Guan Yin of China It weaves together ancient detail in a modern form blending East and West **The Emperor's Regret and other**

Short Stories Dale A. Johnson,2013-01-05 The Emperor s Regret are a collection of stories based on Chinese themes I have experimented with fiction In the first story The Emperor s regret I experiment with combining fiction story form with non fiction use of footnotes In the second story I experiment with western and eastern story forms In the third story I experiment with contemporary reality with ancient fantasy Hearings United States. Answers to Questions Frederic Jennings Haskin,1926 **Land, Water and Development** Malcolm Newson,2008-09-17 Water is newsworthy there is or will be a world water crisis Aggravated by climate change we are approaching the limits of human exploitation of freshwater resources notably in growing essential food The complexities and uncertainties associated with improving our management of fresh water take the potential remedies out of the hands of simple local hard engineering and into much larger units the basin the ecosystem and the global context and also require longer term perspectives The Third Edition follows the same structure as its predecessors presenting the historical and scientific backgrounds to land water interactions and establishing the links with development processes and policies Throughout its two major messages are that our new philosophy should be one of humans in the ecosystem and that the guidance from science being uncertain and contested must be operationalized in a participatory system of governance based on participation Following a review of progress towards these elements in the developed world the international case studies update the situation in the developing world following the Millennium Development Goals our new emphasis on poverty and on global food supplies This book covers the multitude of scientific research findings development of tools and spatial

temporal scale challenges which have emerged in the last decade Tensions are highlighted in the current and future role of large dams country studies are retained and considerably updated and development contexts are explored in greater depth as a dividing line in capacity to cope with land and water stress Technical issues have been expanded to cover major droughts environmental flows and the restoration of rivers and wetlands A separate chapter picks up these themes under terms of their relationship with uncertainty and the widespread perception that a new ethos of adaptive management is needed in the water sector For students of geography environmental science hydrology and development studies this innovative edition provides a reasoned academic basis of evidence for sustainable adaptive management of rivers and related large scale ecosystems using more than 600 new sources It will also prove invaluable for lecturers and practitioners
