Robert Lazzarini:

Robert Lazzarini Robert Lazzarini, John B. Ravenal, 2003 Already familiar to viewers of the 2002 Whitney Museum Biennial Robert Lazzarini is an American sculptor whose work combines extreme realism with extreme distortion Combining advanced digital technology with traditional sculpting methods Lazzarini recreates familiar objects to scale out of their original materials while deforming them in seemingly impossible ways Appearing to expand and contract as viewers shift vantage points the works seem to collapse upon themselves or in the artist's words slip toward their own demise His beautiful yet unsettling works address the physical psychological and emotional implications of this distortion This first publication devoted to Lazzarini's work coincides with his first solo museum exhibition organized by the Virginia Museum of Fine Arts and scheduled to open in November 2003 The book surveys his major work from 1997 to the present including his two most widely recognized pieces the installation of four skewed skulls in BitStreams 2001 at New York's Whitney Museum of American Art and the warped payphone from the 2002 Whitney Biennial Designed by the artist Robert Lazzarini is envisioned as an exhibition in book format including spreads that create unique visual spaces in which to present the work With an essay by John B. Ravenal describing Lazzarini's creative process and how his objects relate to the histories of perception and distortion in art this publication will fascinate all who appreciate and study contemporary art **Robert Lazzarini**, *Untitled - Robert Lazzarini Works on Paper*, 2006-01-15 *Guns, Knives, Brass Knuckles* Robert Lazzarini, 2012 **Metagaming** Stephanie Boluk, Patrick LeMieux, 2017-04-04 The greatest trick the videogame industry ever pulled was convincing the world that videogames were games rather than a medium for making metagames Elegantly defined as games about games metagames implicate a diverse range of practices that stray outside the boundaries and bend the rules from technical glitches and forbidden strategies to Renaissance painting algorithmic trading professional sports and the War on Terror In Metagaming Stephanie Boluk and Patrick LeMieux demonstrate how games always extend beyond the screen and how modders mappers streamers spectators analysts and artists are changing the way we play Metagaming uncovers these alternative histories of play by exploring the strange experiences and unexpected effects that emerge in on around and through videogames Players puzzle through the problems of perspectival rendering in Portal perform clandestine acts of electronic espionage in EVE Online compete and commentate in Korean StarCraft and speedrun The Legend of Zelda in record times with or without the use of vision Companies like Valve attempt to capture the metagame through international e sports and online marketplaces while the corporate history of Super Mario Bros is undermined by the endless levels of Infinite Mario the frustrating pranks of Asshole Mario and even Super Mario Clouds a ROM hack exhibited at the Whitney Museum of American Art One of the only books to include original software alongside each chapter Metagaming transforms videogames from packaged products into instruments equipment tools and toys for intervening in the sensory and political economies of everyday life And although videogames conflate the creativity criticality and craft of play with the act

of consumption we don't simply play videogames we make metagames
