Rorschach Content Interpretation Edward Aronow, Marvin Reznikoff, 1976 **Principles of Rorschach Interpretation** Irving B. Weiner, 2003-07-18 This second edition of Irving Weiner's classic comprehensive clinician friendly guide to utilizing the Rorschach for personality description has been revised to reflect both recent modifications in the Rorschach Comprehensive System and new evidence concerning the soundness and utility of Rorschach assessment. It integrates the basic ingredients of structural, thematic, behavioral, and sequence analysis strategies into systematic guidelines for describing personality functioning. It is divided into three parts. Part I concerns basic considerations in Rorschach testing and deals with conceptual and empirical foundations of the inkblot method and with critical issues in formulating and justifying Rorschach inferences. Part II is concerned with elements of interpretation that contribute to thorough utilization of data in a Rorschach protocol: the Comprehensive System search strategy, the complementary roles of projection and card pull in determining response characteristics, and the interpretive significance of structural variables, content themes, test behaviors, and the sequence in which various response characteristics occur. Each of the chapters presents and illustrates detailed guidelines for translating Rorschach findings into descriptions of structural and dynamic aspects of personality functioning. The discussion throughout emphasizes the implications of Rorschach data for personality assets and liabilities with specific respect to adaptive and maladaptive features of the manner in which people attend to their experience, use ideation, modulate affect, manage stress, view themselves, and relate to others. Part III presents 10 case illustrations of how the interpretive principles delineated in Part II can be used to identify assets and liabilities in personality functioning and apply this information in clinical practice. These cases represent persons from diverse demographic backgrounds and demonstrate a broad range of personality styles and clinical issues. Discussion of these cases touches on numerous critical concerns in arriving at different diagnoses, formulating treatment plans, and elucidating structural and dynamic determinants of behavior.

Viney,2012-12-06 The psychological states of patients with diabetes mellitus were compared with those of patients suffering from other chronic diseases and people with no diagnosed chronic diseases These states were assessed by applying content analysis scales to transcripts of their descriptions of their current experiences Analyses of the diabetics scale scores revealed a pattern characterized by much anxiety depression anger expressed both directly and indirectly together with feelings of helplessness The sources of anxiety which proved to be of most importance to them were fears of death and bodily mutilation as well as guilt and shame They experienced little sense of sharing with most people around them although they showed considerable enjoyment of close relationships with family and friends This pattern of psychological states did not vary with the sex of the patients or whether they were interviewed in a hospital or at home nor with recency of onset or multiplicity of health problems It was similar to the pattern of patients with other chronic diseases but differed significantly from that of the healthy group Acknowledgment The authors wish to acknowledge the contribution of Carol Preston to the collection and analysis of these data which were made available in part by patients of the Wollongong Hospital and members of the Illawarra Branch of the Diabetic Association of New South Wales References 1 Strong JA Baird JD 1971 Diseases of the endocrine system In Davidson S McLeod J eds The principles and practice of medicine *Contemporary Rorschach Interpretation* J. Psychoanalysis and Projective Methods in Personality Assessment Benoît Verdon, Catherine Azoulay, 2019-10-15 This unique book synthesizes the work of leading thinkers of the French School of psychoanalytical projective methods in personality assessment. The French School is a direct successor to Rorschach's and Murray's original approaches using the Rorschach Test and the Thematic Apperception Test (TAT). Underlying this method is the idea of the coexistence of conscious and unconscious processes of opposite instinctual pairs and of agents that are ruled by conflicts. Freud's Transitional activity is seen as part of an intermediate space, a mediator space, and bearer of messages between the subject and the clinician. Winnicott This book brings to life the important contributions of the French School, firstly exploring its theories and methods, and then its clinical applications. Detailed case studies from different stages of life examine the psychopathology of everyday life with its severe and disabling states of suffering. Contemporary advances in research and clinical work are presented, and the groundbreaking early work of Nina Rausch de Trautenberg, Vica Shentoub, and Rosine Debray are also critically reread and discussed. Clinical tools adapted for clinicians and researchers in the appendices include a useful schema to facilitate the interpretation of the Rorschach and TAT, together a list of latent solicitations for the TAT and the current version of the TAT Scoring Grid. This book is essential reading for clinical psychologists, psychiatrists, psychotherapists, researchers, and students interested in applying psychoanalytical theory to projective methods.
