Creating Welded Sculpture Nathan Cabot Hale, 2012-07-12 In this generously illustrated guide newly revised and updated a well known American sculptor shares his forty years of experience working with welded sculpture techniques Nathan Cabot Hale begins with the basic assumption that it is necessary for a sculptor welder to have the same professional skills as a good job welder To help readers gain those skills he demonstrates both traditional and comparatively new welding methods step by step including the oxyacetylene technique in modeling small scale figurative sculpture Mr Hale first discusses the basic tools and techniques of welded sculpture then addresses the construction of abstract and organic shapes and modeling solid figures This is followed by detailed coverage of finishing techniques arc welding and welding large scale commissioned works He even dispenses helpful practical advice on the economics of fine art exhibiting work staying alive searching out public and private support and more Over 80 helpful diagrams and more than 100 photographs accompany the text demonstrating techniques and procedures and depicting works in progress as well as finished works In a new chapter written specially for this edition Mr Hale shares the heartening artistic philosophy he has developed over his long and distinguished career Sculptors at many levels of accomplishment will find his book instructive and inspiring [Hellenistic Sculpture](#) Brunilde Sismondo Ridgway, 1990 This is the final volume in Brunilde Sismondo Ridgway's series of books covering the entire range of Greek sculpture from its inception to its virtual end as it merged into the production of the Roman Imperial world Volume III discusses sculptural works both architectural and free standing from approximately 100 B C to the Battle of Actium 31 B C which removed from power the last Hellenistic ruler Although some monuments may belong to the years just before or just after this timespan Ridgway's aim is to concentrate on works plausibly dated to the first century B C even those with highly controversial chronologies Famous sculptures the Laokoon the epic groups from the Sperlonga cave

the Belvedere Torso the bronze Boxer in the Terme Museum and many others are discussed together with less well known pieces Ridgway gives special emphasis to the finds from two shipwrecks the Mahdia and the Antikythera wrecks that provide a reasonable terminus ante quem and argues that many of the stylistic trends and decorative objects usually considered typically Roman instead have their roots in the Greek world This last Hellenistic phase is perhaps the most interesting of the three because it documents to a great extent the transformation of the products of one culture into those of another with different interests and priorities Far from being an unimaginative inferior output driven by commercial considerations the statuary of the first century B C is vibrant and inventive drawing from many sources in a stylistic eclecticism

Department of Greek and Roman Antiquities, 1876 David Smith in Two Dimensions Sarah Hamill, 2015-01-31 How does photography shape the way we see sculpture In David Smith in Two Dimensions Sarah Hamill broaches this question through an in depth consideration of the photography of American sculptor David Smith 1906-1965 Smith was a modernist known for radically shifting the terms of sculpture a medium traditionally defined by casting modeling and carving He was the first to use industrial welding as a sustained technique for large scale sculpture influencing a generation of minimalists to come What is less known about Smith is his use of the camera to document his own sculptures as well as everyday objects spaces and bodies His photographs of his sculptures were published in countless exhibition catalogs journals and newspapers often as anonymous illustrations Far from being neutral images these photographs direct a pictorial encounter with spatial form and structure the public display of his work David Smith in Two Dimensions looks at the sculptor's adoption of unconventional backdrops alternative vantage points and unusual lighting effects and exposures to show how he used photography to dramatize and distance objects This comprehensive and penetrating account also introduces Smith's expansive archive of copy prints slides and negatives many of which are seen here for the first time Hamill proposes a new understanding of Smith's sculpture through photography exploring issues that are in turn vital to discourses of modern sculpture sculptural aesthetics and postwar art In Smith's photography we see an artist moving fluidly between media to define what a sculptural object was and how it would be encountered publicly *Popular Protest And Political Culture In Modern China* Jeffrey N Wasserstrom, 2018-02-07 This innovative and widely praised volume uses the dramatic occupation of Tiananmen Square as the foundation for rethinking the cultural dimensions of Chinese politics Now in a revised and expanded second edition the
