Searching For Higher Ground:

Searching for Higher Ground Steve Josse, 1998 **Searching for Higher Ground** George Glean, 2022-04-29 Is the Grass Greener on the Other Side Growing up Sinclair didn't understand why so many islanders wanted to escape to England or any other place besides Grenada. He soon learned that no one wanted to remain on the island because work was scarce and wages were low. Not only did West Indians run away to England but to wherever they could find work. Even Sinclair's parents traveled to London with his brother and two sisters leaving him to be raised by an adopted aunt and uncle. It was a challenge for Sinclair. Would he ever understand why he was left behind? Would he survive the trauma? Would he ever see his family again? It's this kind of dilemma many West Indians faced in searching for higher ground.

In Search of Human Nature Carl N. Degler,1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America s most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race Neither Black Nor White which won the Pulitzer Prize women s studies At Odds which Betty Friedan called a stunning book Southern history The Other South the New Deal and many other subjects Now in The Search for Human Nature Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years The idea of a biological root to human nature was almost universally accepted at the turn of the century Degler points out then all but vanished from social thought only to reappear in the last four decades Degler traces the early history of this idea from Darwin s argument that our moral and emotional life evolved from animals just as our human shape did to William James s emphasis on instinct in human behavior then seen as a fundamental insight of psychology We also see the many applications of biology from racism sexism and Social Darwinism to the rise of intelligence testing the eugenics movement and the practice of involuntary sterilization of criminals a public policy pioneered in America which had sterilization laws 25 years before Nazi Germany one such law was upheld by Oliver Wendell Holmes s Supreme Court Degler then examines the work of those who denied any role for biology who thought culture shaped human nature a group ranging from Franz Boas Ruth Benedict and Margaret Mead to John B Watson and B F Skinner Equally important he examines the forces behind this fundamental shift in a scientific paradigm arguing that ideological reasons especially the struggle against racism and sexism in America led to this change in scientific thinking Finally Degler considers the revival of Darwinism without the Social Darwinism racism and sexism led first by ethologists

Education in Search of the Spirit MR John Gardner, 1996-05 Real education will always seek to strengthen what is best in the human soul its longing for the experience of spiritual truth that brings into the self an objective

appreciation of the noble aspects of its own nature together with a subjective sense of real affinity with the rest of humanity the earth planet as a whole and the great cosmos above and beyond The premise of this book is that a human being is a being of body soul and spirit whose core is eternal spirit from which center one should strive to live From this perspective the aim of true education is to help our children activate this deepest center in themselves For this living intuitive thinking must be brought to life in a new way The organ for such thinking is the heart where will and feeling join in uniting self and world morality and truth love and action This book is in three parts The first poses the problem the second describes the Waldorf approach as a solution and the third deals with questions of special interest to parents and educators alike such as authority discipline and freedom the nature of genius and the question of cultural pluralism The first edition of this book was titled *The Experience of Knowledge* in response to a clear call for experience in education Certainly if the sole purpose of education is to acquire information learning becomes dry abstract and deadening To have meaningful consequence in a person's life coming to know must become an experience Too often however such experience is understood simply as doing field trips class projects and so on But doing if unconnected to the whole person is just activity To become true experience it must speak out of and toward a student's secret center the spirit Hence the author affirms that authentic education is always in search of the spirit

The Search for the Lost Riverfront: Historical investigations of the civilian occupation of the Chalmette battlefield Ted Birkedal, 2009 Originally commissioned in 1984 this report deals with the historical geography and archeology of the Battle of New Orleans during the War of 1812 as it pertained to the Chalmette Battlefield It touches upon how people put the battlefield to use after the War of 1812 as a place for generations of people as they live work and play Also covered are some of the things both bad and good we have done over the years to commemorate the battle and remember this important event in our nation's past

In Search of the Unknown in Medieval Architecture John James, 2007-12-31 John James is an Australian architect and medieval historian Since 1969 he has been searching for the origins of the Gothic style beginning with a five year study of Chartres cathedral At that time there were no coherent techniques for analysing the detailed construction history of existing stone structures This he created He expanded his research to include all the early Gothic churches in the Paris region with a three year survey of over 3500 buildings His most important discovery has been that all churches of this period were constructed in many short campaigns by mobile building teams and that major innovation was more likely to occur in the smaller buildings than in the larger This volume makes available 42 of the author's studies on the development of Gothic architecture in France

Finding Fulford - the Search for the First Battle Of 1066 Charles Jones, 2011 The battle of Fulford was fought just south of York on 20th September 1066

between the Northern Earls and King Harald Hardrada leading a Norse army Harald Hardrada had the treacherous Earl Tostig the brother of King Harold II king of England as his ally Tostig might have devised the strategy that detained his brother defending the south coast from the expected invasion from Normandy But King Harold was already on his way north when the battle took place Finding Fulford sets out a confident hypothesis for the location based on the body of evidence and research undertaken to find the first of the three battles of that autumn The report finds that the literature identifies a location south of York and the geology uniquely points to Germany Beck as the only militarily significant ditch mentioned in several sources as the place of the battle Modelling the way the landscape has changed since 1066 allows the descriptions provided for the battle to be tested The reconstructed surface provides positive feedback for the literature and helps to make more sense of what was written in Norse sources about the course of the battle The emergence of substantial quantities of ferrous material just south of the Beck reinforces the claim of Germany Beck as the place of the battle These notable concentrations of ferrous finds including tools axes and other shaped billets were co located with hearth bottoms slag charcoal and tuy res fragments The shape of the billets suggests a military rather than a civil use The interpretation provided is of post battle reprocessing There was not one centrally organised workshop since the number and spread of hearths suggests a gold rush perhaps with each warband processing material These sites were found to corresponded closely to the assumed area of the fighting and no similar sites were found in the surrounding areas which was also surveyed It is also suggested that the work was disrupted by the defeat of the Viking invaders at Stamford Bridge five days after their victory at Fulford This is an important assumption as it helps explain why so much material was abandoned at Fulford in a pattern that has not yet been found elsewhere The interrupted reprocessing hypothesis also explains why other sites of similar antiquity have failed to yield a single weapon fragment If the recycling work had been completed only hearth debris would have been found so the Fulford site might be unique Almost as important as the evidence that has emerged was that no contra indicators were found to cast doubt on the proposed site nor were any consistent pointers to another location identified even though much work was devoted to searching for alternate sites before Germany Beck was identified as the locus The investigation of the Fulford battlefield was done under some unnecessarily restrictive conditions and a chapter is devoted to work that needs to be undertaken The evidence suggests that the site still has much to reveal Alongside the archaeological investigations the report relates the events of the three battles of 1066 and also provides a detailed narrative of the battle based on all that has been revealed by the work The whole style of the work is designed to make it accessible to any interested reader
