Knowledge, Shaping Europe John Krige,2016-07-15 How America used its technological leadership in the 1950s and the 1960s to foster European collaboration and curb nuclear proliferation with varying degrees of success In the 1950s and the 1960s U S administrations were determined to prevent Western European countries from developing independent national nuclear weapons programs To do so the United States attempted to use its technological pre eminence as a tool of soft power to steer Western European technological choices toward the peaceful uses of the atom and of space encouraging options that fostered collaboration promoted nonproliferation and defused challenges to U S technological superiority In Sharing Knowledge Shaping Europe John Krige describes these efforts and the varying degrees of success they achieved Krige explains that the pursuit of scientific and technological leadership galvanized by America's Cold War competition with the Soviet Union was also used for techno political collaboration with major allies He examines a series of multinational arrangements involving shared technological platforms and aimed at curbing nuclear proliferation and he describes the roles of the Department of State the Atomic Energy Commission and NASA To their dismay these agencies discovered that the use of technology as an instrument of soft power was seriously circumscribed by internal divisions within successive administrations and by external opposition from European countries It was successful Krige argues only when technological leadership was embedded in a web of supportive harder power structures *Power Sharing in a Divided Nation* Johan

Saravanamuttu,2016-09-30 This book argues that Malaysia's electoral politics have historically been premised on a hybridized model of communalism and consociationalism Beyond this it posits a newer idea of power sharing based on the dynamic and transformative practice of mediated communalism through six decades 1952 2016 of electoral politics The strategy of mediating communalism is critically explored throughout the book serving to test its saliency as a distinct

approach to power sharing in a social formation which is ethnically religiously and regionally divided yet has remained remarkably and tenuously integrated throughout Malaysia's electoral history The book delves into this question by narrating and theorizing the complexity of communal politics leading to the emergence of new politics which have attempted to put Malaysia on the track of further democratization It is further implied that new politics has to work in tandem with mediated communalism to transcend the most deleterious effects of an ethnically divided society **Knowledge Sharing and Fostering Collaborative Business Culture** Hussain, Zahid, Khan, Arman, Qureshi, Muhammad Asif, Sharipudin, Mohamad-Noor Salehuddin, Alkara, Ibrahim, 2025-03-21 With the rise of technological advancement organizations can leverage knowledge sharing practices to foster both employee engagement and customer loyalty New technologies enable organizations to create seamless collaborative environments where information flows freely across all levels breaking silos and boosting productivity By facilitating access to critical knowledge businesses can engage employees effectively driving motivation and job satisfaction Knowledge sharing also plays a critical role in enhancing customer relationships building stronger more loyal customer bases Further research may demonstrate how leaders can foster a knowledge sharing environment ensuring that both internal teams and external customers benefit from the wealth of collective organizational knowledge Knowledge Sharing and Fostering Collaborative Business Culture emphasizes the role of digital tools such as AI cloud based platforms and data analytics in transforming traditional knowledge sharing models It examines how organizations can utilize AI and other digital tools to gather and analyze data offering personalized solutions that align with customer needs and preferences This book covers topics such as business collaboration employee engagement and workplace culture and is a useful resource for business owners sociologists computer engineers data scientists academicians and researchers **Sharing Lights on the Way to God** Pim Valkenberg, 2006 This book seeks to give form to a theology that hyphenates two traditions that have not only been in constant conflict during most of their historical encounters but are also presented as opposite blocks in the threatening clash of civilizations at the beginning of the third millennium Islam and Christianity Based on experiences of dialogue between the three Abrahamic faiths this book analyzes historical and contemporary processes of interreligious dialogue between Christians and Muslims in order to arrive at a concept of dialogue as mutual emulation It shows how in their theologies of religious others Judaism Christianity and Islam have based their images of others on their self images This characteristic makes traditional theologies of religion quite unsuitable for interreligious dialogue Consequently the author of this book develops a model in which comparative theology and interreligious dialogue are connected by studying as a Christian theologian the theological and spiritual sources of his Muslim partners These exercises in comparative Muslim Christian theology comprise both the medieval Aquinas al Ghazali Rumi and the modern periods Said Nursi Fethullah Gulen Tariq Ramadan An interlude on Teresa of Avila's poem Nada te turbe shows how Christians may recover important insights from their own tradition by reading these Muslim theological and spiritual sources **BOOK JACKET** **Sharing Jesus**

Sharing in the Divine Nature Keith Ward, 2020-05-22 A defense of the New Testament view that all things are to be united in Christ which entails that the ultimate destiny of the universe and of all that is in it is to be united in God Keith Ward argues that this conflicts with classical ideas of God as simple impassible and changeless ideas that many modern theologians espouse and which Ward subjects to careful and critical scrutiny He defends the claim that the cosmos contributes something substantial to and in that way changes the divine nature and the cosmos is destined to manifest and express the essential creativity and relationality of a God of beatific agapic redemptive and unitive love
