in the USA and texts by Rafael Vinoly on his career which has been marked by the difficult political situation in Argentina and the cultural exchange between S America Europe and the USA Great City Parks Alan Tate,2013-05-13 Great City Parks is a celebration of some of the finest achievements of landscape architecture in the public realm It is a comparative study of twenty significant public parks in fourteen major cities across Western Europe and North America Collectively they give a clear picture of why parks have been created how they have been designed how they are managed and what plans are being made for them at the beginning of the twenty first century Based on unique research including extensive site visits and interviews with the managing organisations this book is illustrated throughout with clear plans and professional photographs for each park This book reflects a belief that well planned well designed and well managed parks remain invaluable components of liveable and hospitable cities **Universal Singular** Sonia Curnier,2022-11-21 A critical introduction to the design of public spaces The way public spaces are designed reflects the period in which they were created However in our globalized world of experience and images the desire for uniqueness tends to achieve the opposite increasingly designers of open spaces resort to the same devices and thereby distance themselves from the urban context The author analyzes ten outstanding contemporary designs of public spaces in Europe in terms of their function in the urban context and what materials are used for their implementation In interviews with the designers she retraces the changes of the concepts during the design stage of the projects underpinning her findings with numerous sketches In addition her research focuses on how the projects were received in the community Learning from designers of outstanding public spaces in Europe Numerous unpublished design sketches A clear guide to urban design Also available in a French edition Landscape as Urbanism Charles Waldheim,2022-03-15 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In Landscape as Urbanism one of the field s pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an

emerging field that is likely to influence the design of cities for decades to come Architecture Series: Bibliography ,1989

Unprecedented Realism K. Michael Hays,Rodolfo Machado,Jorge Silvetti,1995 For almost two decades the work of Rodolfo Machado and Jorge Silvetti has remained at the forefront of theoretical production Their rigorously detailed and exquisitely drawn projects characterize an attitude of aesthetic realism towards materials construction function and the cultural role of architecture Yet the conditions they address and the effects they produce are unprecedented Their projects synthesize seemingly incompatible images uses and typologies Unprecedented Realism is not an illustration of theory Rather what emerges is a constructive theory of architecture that understands the process of design itself as a distinct mode of knowledge as theoretical research that is still irreducibly architectural Unprecedented Realism presents both buildings and urban infrastructures Steps of Providence RI Entrance for Cranbrook Bloomfield Hills Mich Carnegie Mellon University Center Pittsburgh Pershing Square Los Angeles and Times Square New York City Along with the analytic text of K Michael Hays the volume includes critical essays by Alan Colquhoun George Baird Fars el Dahdah and Rodolphe el Khoury please see the Table of Contents *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott,2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world s most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 *To Live in the New World* Judith K. Major,1997 While most historians and critics have focused on the treatise Judith Major gives equal emphasis to Downing s spirited monthly editorials in the Horticulturist In the journal Downing spoke American and encouraged his countrymen and women to practice economy to use America s rich natural resources wisely yet artfully to be content with a little cottage and a few fine native trees **Islamic Gardens and**

Landscapes D. Fairchild Ruggles,2011-12-30 Western admirers have long seen the Islamic garden as an earthly reflection of the paradise said to await the faithful However such simplification Ruggles contends denies the sophistication and diversity of the art form *Islamic Gardens and Landscapes* immerses the reader in the world of the architects of the great gardens of the Islamic world from medieval Morocco to contemporary India Just as Islamic culture is historically dense sophisticated and complex so too is the history of its built landscapes Islamic gardens began from the practical need to organize the surrounding space of human civilization tame nature enhance the earth s yield and create a legible map on which to distribute natural resources Ruggles follows the evolution of these early farming efforts to their aristocratic apex in famous formal gardens of the Alhambra in Spain and the Taj Mahal in Agra Whether in a humble city home or a royal courtyard the garden has several defining characteristics which Ruggles discusses Most notable is an enclosed space divided into four

equal parts surrounding a central design element The traditional Islamic garden is inwardly focused usually surrounded by buildings or in the form of a courtyard Water provides a counterpoint to the portioned green sections Ranging across poetry court documents agronomy manuals and early garden representations and richly illustrated with pictures and site plans Islamic Gardens and Landscapes is a book of impressive scope sure to interest scholars and enthusiasts alike The Routledge Handbook on the Reception of Classical Architecture Nicholas Temple, Andrzej Piotrowski, Juan Manuel Heredia, 2019-11-01 This is the first comprehensive study of the reception of classical architecture in different regions of the world Exploring the impact of colonialism trade slavery religious missions political ideology and intellectual artistic exchange the authors demonstrate how classical principles and ideas were disseminated and received across the globe By addressing a number of contentious or unresolved issues highlighted in some historical surveys of architecture the chapters presented in this volume question long held assumptions about the notion of a universally accepted classical tradition and its broadly Eurocentric perspective Featuring thirty two chapters written by international scholars from China Europe Turkey North America Mexico Australia and New Zealand the book is divided into four sections 1 Transmission and re conceptualisation of classical architecture 2 Classical influence through colonialism political ideology and religious conversion 3 Historiographical surveys of geographical regions and 4 Visual and textual discourses This fourfold arrangement of chapters provides a coherent structure to accommodate different perspectives of classical reception across the world and their geographical ethnographic ideological symbolic social and cultural contexts Essays cover a wide geography and include studies in Italy France England Scotland the Nordic countries Greece Austria Portugal Romania Germany Poland India Singapore China the USA Mexico Brazil New Zealand and Australia Other essays in the volume focus on thematic issues or topics pertaining to classical architecture such as ornament spolia humanism nature moderation decorum heresy and taste An essential reference guide The Routledge Handbook on the Reception of Classical Architecture makes a major contribution to the study of architectural history in a new global context Building Institution Kim Förster, 2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline in the postmodern era Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies which was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a collective biography that details the Institute's diverse roles and the dynamic interplay between research and design education culture and publishing By exploring the transformation of cultural production into a practice as well as the culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of architecture Architettura e paesaggio.
