Louis I Khan Complete Works:

Louis I. Kahn Heinz Ronner, Sharad Jhaveri, 1987 Louis I. Kahn Heinz Ronner, 1977 **Louis I. Kahn** Heinz Ronner, 1987-01-01 This book owes its concept to the transparency of the work process of Louis I Kahn whose ideas are preserved in the wealth of sketches he did whenever developing new concepts or working out details for new building projects Sketches and plans of different developmental stages of his projects are laid out in a basically chronological order and these are complemented by relevant extracts from his writings and speeches and by his commentary while this documentation was being prepared in 1973 the year before his death As in the first edition the authors aim has not been to interpret or evaluate Rather they wish to provide the scholar with a solid base for further research allowing him to follow the traces of a remarkably creative mind that revered architecture as a manifestation of man's spirit Louis I. Kahn. Complete work, 1935-74 Heinz Ronner, 1977 **Louis I. Kahn** Louis Isadore Kahn, 1977 *Louis I. Kahn* Klaus-Peter Gast, Louis I. Kahn, 1999 1999 is the twenty fifth anniversary of Louis Kahn's death In the second half of the twentieth century Louis Kahn's designs took on enormous significance for international architecture Kahn belonged to that generation of architects which perfected and simultaneously surpassed Modernism Most of Kahn's projects were realised in the USA and several large projects were built in Asia From Kahn's early work to larger projects such as the National Capital of Bangladesh in Dhaka and the Kimbell Art Museum in Fort Worth the documented works all illustrate the human aspect in Kahn's work *Louis I. Kahn* Louis I. Kahn, Heinz Ronner, Sharad Jhaveri, Alessandro Vasella, 1977 **Louis I. Kahn Complete work 1935-74** RONNER, VASELLA, JHAVERI, 1976-01-01 This book owes its concept to the transparency of the work process of Louis I Kahn whose ideas are preserved in the wealth of sketches and drawings **The Art Museums of Louis I. Kahn** Patricia Cummings Loud, Louis I. Kahn, 1989 **Complete works** Klaus-Peter Gast, Louis I. Kahn, 2001 Louis Khan is considered to be one of the most outstanding architects of the 20th Century whose impact can only be compared to that of Le Corbusier This book discusses Kahn's late modernist works including the Richards Medical Building Hugo Häring Peter Blundell Jones, 1999 Peter Blundell Jones Professor of Architecture at the University of Sheffield has long been concerned with the organic movement in architecture and has written extensively about it including a substantial work on Hans Scharoun The present book is not just a biography of Häring but an unusually detailed analysis of his architectural work including many unbuilt projects which have never before been published It also includes an account of Häring's theory with translated extracts from his many writings Through setting Häring within his historical context and differentiating his position from figures such as Mies Le Corbusier and Hannes Meyer Peter Blundell Jones suggests a radical reframing of the early Modern Movement He was aided in the development of the book by Häring's personal assistant in the late years Margot Aschenbrenner who was trained as a philosopher Jaquette Louis I. Kahn - Exposed concrete and hollow stones Roberto Gargiani, 2014-07-09 Through sheer determination and courage Kahn has researched the nature of concrete in the form of

precast cast in place or blocks Each of his renowned works in exposed concrete such as the Yale Art Gallery the Richards Laboratories the Bath House the Salk Institute the National Assembly the Kimbell Museum the Exeter Library and the Yale Center for British Art is itself an important chapter in the history of architecture for the exploration into concrete's formal expression beyond the lesson of Le Corbusier Kahn's obsession on concrete fabrication processes on the formwork and the mix design is systematically examined in two volumes The authors illustrate Kahn's vision with documents that have never been revealed in other essays drawing heavily from original sketches plans specifications worksite photographs and correspondences with collaborators engineers technicians and contractors The first volume Exposed Concrete and Hollow Stones focuses on the first ten year period of Kahn's research on concrete Moving through the many construction systems experienced by Kahn from the discovery of exposed concrete in the form of *b ton brut* at the Yale Art Gallery to the precast and poured in place techniques to the values of joint growth and ornament the essay culminates in the reconstruction of the artistic and technical characteristics of two great worksite the Richards Laboratories and the First Unitarian Church and School The second volume Towards the Zero Degree of Concrete covers the following fourteen years and leads the reader along Kahn's path to the true nature of concrete focusing on his main techniques and poetic discoveries such as the liquid stone of the Salk Institute the smooth finish at Bryn Mawr and the concept of monolithic at the Yale Center for British Art

Louis I. Kahn in Rome and Venice Elisabetta Barizza, 2021-07-22 This book examines the idea of organism in the work of Louis I Kahn from the turning point of Rome to the project for Venice It presents an original interpretation of the work of Kahn during one of the most fruitful periods of his career when he was working on a particular design method based on an entirely novel way of interacting with the past Beginning with a meticulous documentation and analysis of Kahn's experiences in the twenty years from 1930 to 1950 the book sheds new light on the relationship between Kahn's work and the modern movement The arguments are supported by case studies including that of the Palazzo dei Congressi in Venice based on Kahn's words like his lessons in Venice at IUA International University of Art in 1971 and others as the Trenton Bath House the Salk Institute La Jolla the Kimbell Museum Fort Worth the Yale Gallery and the Mellon Center for British Art New Haven and more Unlike much of the by now well established literature on Kahn's work Louis I Kahn in Rome and Venice suggests that the basic premise of Kahn's invention is the idea of spatial constructive organism which explains how he created forms that were inextricably anchored in the past without imitating any one kind of ancient architecture The main objective of the book is to explain Kahn's methodology to architects and students showing how he was able to design an architectural object with the characteristics of the best designed objects organisms in which each part contributes with the whole to creating something made of indivisible parts

Trajectories in Architecture Michael Jasper, 2023-04-21 Trajectories in Architecture

Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture. Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories. These three trajectories—the plan as conceptual device, a logic of sensation and temporalities—serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work, revealing architectural conditions and consequent spatial effects little explored to date. Trajectories in Architecture adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture. The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities. In so doing, the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression. Trajectories in Architecture includes analysis of significant projects of Le Corbusier, Peter Eisenman, Zaha Hadid, John Hejduk, Louis I Kahn and I M Pei.

Nationalism and Architecture Raymond Quek, Darren Deane, Sarah Butler, 2012. Bringing together case studies from Europe, North and South America, the Middle East, Africa, Asia and Australia, this book provides an exploration of the relationship between architecture and nationalism. It includes essays grouped together in three thematic sections: Revisiting Nationalism, Interpreting Nationalism and Questioning Nationalism.

Seeing and Making in Architecture Taiji Miyasaka, 2013-08-22. You always aim to achieve that moment of insight that leads to ingenuity and novelty in your design, but sometimes it remains elusive. This book presents a variety of techniques for mapping and making hands-on design/build projects and relates this work to real architecture. It helps you to learn new ways of seeing and making that will enhance your creative design process and enable you to experience moments that lead to ingenuity in design. Each of the book's two parts, Seeing and Making, is organized according to technique, which ranges from quantitative analysis and abstraction to pattern and scale, to provide you with a framework for mapping and hands-on exercises. Interviews with architects Yoshiharu Tsukamoto, Atelier Bow Wow and Jesse Reiser and Nanako Umemoto, Reiser Umemoto, give you perspective on using these exercises in practice.

Elements of Architecture Mikkel Bille, Tim Flohr Sorensen, 2016-02-26. Elements of Architecture explores new ways of engaging architecture in archaeology. It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment, considering how people in the past have not just dwelled in buildings but have existed within them. The book engages with the meeting point between these two perspectives. For although archaeologists must deal with the presence and absence of physicality as a discipline which studies humans through things, to understand humans they must also address the performances as well as temporal and affective impacts of these material remains. The contributions in this volume investigate the way time, performance and movement, both physically and emotionally, are central aspects of understanding architectural assemblages. It is a book about the constellations of people, places and things that emerge and dissolve as affective, mobile, performative and temporal.

engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human Elements of Architecture elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies *Modern Architecture and Religious Communities, 1850-1970* Kate Jordan,Ayla Lepine,2018-04-17 Social groups formed around shared religious beliefs encountered significant change and challenges between the 1860s and the 1970s This book is the first collection of essays of its kind to take a broad thematically driven case study approach to this genre of architecture and its associated visual culture and communal experience Examples range from Nuns holy spaces celebrating the life of St Theresa of Lisieux to utopian American desert communities and their reliance on the philosophy of Teilhard de Chardin Modern religious architecture converses with a broad spectrum of social anthropological cultural and theological discourses and the authors engage with them rigorously and innovatively As such new readings of sacred spaces offer new angles and perspectives on some of the dominant narratives of the nineteenth twentieth and twenty first centuries empire urban expansion pluralism and modernity In a post traditional landscape religious architecture suggests expansive ways of exploring themes including nostalgia and revivalism engineering and technological innovation prayer and spiritual experimentation and the beauty of holiness for a brave new world Shaped by the tensions and anxieties of the modern era and powerfully expressed in the space and material culture of faith the architecture presented here creates a set of new turning points in the history of the built environment
