Paul Kemp, Angelina M. Freeman, David P. Muth, 2014-05-16 Human impacts and emerging mega trends such as climate change and energy scarcity will impact natural resource management in this century This is especially true for deltas because of their ecological and economic importance and their sensitivity to climate change The Mississippi delta is one of the largest in the world and has been strongly impacted by human activities Currently there is an ambitious plan for restoration of the delta This book by a renowned group of delta experts provides an overview of the challenges facing the delta and charts a way forward to sustainable management **Environmental Health Perspectives** , 2004-07 **Historical Perspectives on Democracies and their Adversaries** Joost Augusteijn, Constant Hijzen, Mark Leon de Vries, 2019-08-07 This book historicizes the debate over how democratic regimes deal with anti democratic groupings in society Democracies across the world increasingly find themselves under threat from enemies ranging from terrorists to parties and movements that undermine democratic institutions from within This compilation of essays provides the first historical exploration of how democracies have dealt with such anti democratic forces in their midst and how this impacted upon what democracy meant to all involved From its inception in the nineteenth century modern democratic politics has included fundamental debates over whether it is undemocratic and dangerous to ban parties with anti democratic objectives and whether democracies should defend themselves if necessary with violence against perceived anti democratic forces This volume shows that implicit conceptions of democracy and democratic repertoires become explicit fluid and contested throughout these confrontations not only within democratic parties but also among their adversaries Both sides have at times used force or limited the expression of ideas thus blurring the lines between who is democratic and who is not **Hurricane Katrina in Transatlantic Perspective** Romain Huret, Randy J. Sparks, 2014-12-15 There is no such thing as a natural disaster writes Romain Huret in his introduction to this multidisciplinary study of the events surrounding and the legacy of Hurricane Katrina Though nature produced Katrina's rising waters and destructive winds a vast array of manmade factors shaped the scope of the storm's impact as well as the local and national response to it In Hurricane Katrina in Transatlantic Perspective American and European scholars approach this infamous storm and its aftermath through a variety of disciplines from music to geography to anthropology creating a nuanced understanding of how society reacts to and later remembers times of disaster Richard Campanella and Romain Huret examine the particular geographical and political mix that set the stage for Katrina's devastation especially among the poorest populations of New Orleans and the Gulf South Jean Kempf James Boyden Andrew Diamond and Thomas Jessen Adams address the ideological biases and racial stereotypes that infused local and national commentary in the days and weeks after the storm Finally Bruce Raeburn Sara Le Menestrel Anne M Lovell and Randy J
