Over The Seas Edge:

Over the Sea's Edge Jane Louise Curry, 1971 When he exchanges medallions with the boy who appears to be his double Dave goes back 800 years in time to medieval Wales Amphibious Concepts at the Edge of the Sea Joerg Baumeister, Ioana C. Giurgiu, Daniela A. Ottmann, 2025-02-14 This book explores interfaces between land and sea and their geostrategic ecological urban productive indigenous legal historical and artistic dimensions The oceans comprising two thirds of the earth's surface were initially utilised mainly for transportation and fishing Today they serve diverse purposes such as supplying energy freshwater mineral resources supporting leisure activities and providing habitat Additionally the UN set up the first international agreement establishing Marine Protection Areas for a third of the sea to mitigate the growing use and exploitation The more interest in oceans territories increases the more the question arises about the beneficial evolution of their physical and legal boundaries What innovative amphibious concepts can be developed for the edge of the sea The book pushes the boundaries of current knowledge to provide a deeper insight into the upcoming challenges and opportunities making it easier to apply the best strategies for a healthy future for both the ocean and humanity Sea Ice David N. Thomas, 2017-03-06 Over the past 20 years the study of the frozen Arctic and Southern Oceans and sub arctic seas has progressed at a remarkable pace This third edition of *Sea Ice* gives insight into the very latest understanding of how sea ice is formed how we measure and model its extent the biology that lives within and associated with sea ice and the effect of climate change on its distribution How sea ice influences the oceanography of underlying waters and the influences that sea ice has on humans living in Arctic regions are also discussed Featuring twelve new chapters this edition follows two previous editions 2001 and 2010 and the need for this latest update exhibits just how rapidly the science of sea ice is developing The 27 chapters are written by a team of more than 50 of the world's leading experts in their fields These combine to make the book the most comprehensive introduction to the physics chemistry biology and geology of sea ice that there is This third edition of *Sea Ice* will be a key resource for all policy makers researchers and students who work with the frozen oceans and seas **The Drift of Sea Ice** Matti Leppäranta, 2007-03-06 The author presents in *The Drift of Sea Ice* the fundamental laws of sea ice drift which come from the material properties of sea ice and the basic laws of mechanics The resulting system of equations is analysed for the general properties of sea ice drift the free drift model and analytical models for ice drift in the presence of internal friction and the construction of numerical ice drift models is detailed The science of sea ice drift through its 100 year history to the present day is explained The text includes the geophysical theory observations from field programs and mathematical models Topics covered include the science of sea ice drift forecasting drift velocity based on volume size and shape sea ice ridging and remote sensing modelling of the ice conditions and finally the role of sea ice drift in research fields in ice covered seas oceanography marine ecology and engineering **Sea Ice** Mohammed Shokr, Nirmal Sinha, 2015-03-16 *Sea Ice Physics and Remote Sensing* addresses experiences acquired mainly in Canada by researchers in

the fields of ice physics and growth history in relation to its polycrystalline structure as well as ice parameters retrieval from remote sensing observations The volume describes processes operating at the macro and microscale e g brine entrapment in sea ice crystallographic texture of ice types brine drainage mechanisms etc The information is supported by high quality photographs of ice thin sections prepared from cores of different ice types all obtained by leading experts during field experiments in the 1970s through the 1990s using photographic cameras and scanning microscopy In addition this volume presents techniques to retrieve a suite of sea ice parameters e g ice type concentration extent thickness surface temperature surface deformation etc from space borne and airborne sensor data The breadth of the material on this subject is designed to appeal to researchers and users of remote sensing data who want to develop quick familiarity with the capabilities of this technology or detailed knowledge about major techniques for retrieval of key ice parameters Volume highlights include Detailed crystallographic classification of natural sea ice the key information from which information about ice growth conditions can be inferred Many examples are presented with material to support qualitative and quantitative interpretation of the data Methods developed for revealing microstructural characteristics of sea ice and performing forensic investigations Data sets on radiative properties and satellite observations of sea ice its snow cover and surrounding open water Methods of retrieval of ice surface features and geophysical parameters from remote sensing observations with a focus on critical issues such as the suitability of different sensors for different tasks and data synergism Sea Ice Physics and Remote Sensing is intended for a variety of sea ice audiences interested in different aspects of ice related to physics geophysics remote sensing operational monitoring mechanics and cryospheric sciences

Art and Identity at the Water's Edge Tricia Cusack, 2017-07-05 The water's edge whether shore or riverbank is a marginal territory that becomes invested with layers of meaning The essays in this collection present intriguing perspectives on how the water's edge has been imagined and represented in different places at various times and how this process contributed to the formation of social identities Art and Identity at the Water's Edge focuses upon national coastlines and maritime heritage on rivers and seashore as regions of liminality and sites of conflicting identities and on the edge as a tourist setting Such themes are related to diverse forms of art including painting architecture maps photography and film Topics range from the South African seaside resort of Durban to the French Riviera The essays explore successive ideological mappings of the Jordan River and how Czech cubist architecture and painting shaped a new nationalist reading of the Vltava riverbanks They examine post Hurricane Katrina New Orleans as a filmic spectacle that questions assumptions about American identity and the coast depicted as a site of patriotism in nineteenth century British painting The collection demonstrates how waterside structures such as maritime museums and lighthouses and visual images of the water's edge have contributed to the

construction of cultural and national identities Antarctic Sea Ice, 1973-1976 ,1983 Data from the Electrically Scanning Microwave Radiometer ESMR on the Nimbus 5 satellite are used to determine the extent and distribution of Antarctic sea ice The characteristics of the southern ocean the mathematical formulas used to obtain quantitative sea ice concentrations the general characteristics of the seasonal sea ice growth decay cycle and regional differences and the observed seasonal growth decay cycle for individual years and interannual variations of the ice cover are discussed The sea ice data from the ESMR are presented in the form of color coded maps of the Antarctic and the southern oceans The maps show brightness temperatures and concentrations of pack ice averaged for each month 4 year monthly averages and month to month changes Graphs summarizing the results such as areas of sea ice as a function of time in the various sectors of the southern ocean are included The images demonstrate that satellite microwave data provide unique information on large scale sea ice conditions for determining climatic conditions in polar regions and possible global climatic changes **Antarctic Journal of the United States** ,1985 *Navarin Basin Lease Offering* ,1984 *Sea Mammals and Oil: Confronting the Risks* Joseph Geraci,2012-12-02 *Sea Mammals and Oil Confronting the Risks* summarizes the effects of spilled petroleum or oil on five groups of marine mammals including seals whales and dolphins sea otters polar bears and manatees It poses questions concerning the extent of oil spill effects on marine mammals the vulnerability of each species and the probable effects to humans domestic animals and laboratory animals After an introduction to the composition and fate of petroleum and spill treating agents in the marine environment the book discusses the use of risk assessment and mathematical computer models in evaluating the effects of oil in marine mammal populations Chapters 3 to 11 examine the ecological perspectives physiologic and toxic effects of oil on five mammal groups The effect of oil on their behavior and the detection and avoidance of oil spill are also discussed With a strong focus on risk assessment this book is ideal for petroleum chemists and technologists marine biologists and veterinary medicine researchers **Encyclopedia of the Environment in American Literature** Geoff Hamilton,Brian Jones,2014-01-10 This encyclopedia introduces readers to American poetry fiction and nonfiction with a focus on the environment broadly defined as humanity s natural surroundings from the discovery of America through the present The work includes biographical and literary entries on material from early explorers and colonists such as Columbus Bartolome de Las Casas and Thomas Harriot Native American creation myths canonical 18th and 19th century works of Jefferson Emerson Thoreau Whitman Hawthorne Twain Dickinson and others to more recent figures such as Jack London Ernest Hemingway Norman Mailer Stanley Cavell Rachel Carson Jon Krakauer and Al Gore It is meant to provide a synoptic appreciation of how the very concept of the environment has changed over the past five centuries offering both a general introduction to the topic and a valuable resource for high school and university courses focused on environmental issues Western Ross Sea and McMurdo Sound Ice Forecasting Guide R.
