Overcentralization In Economic Administration

János Mátyás Kovács

Overcentralization In Economic Administration:

Overcentralization in Economic Administration János Kornai, 2023 Originally published in 1959 this monograph by an Eastern European economist boldly and openly criticized socialist central planning Overcentralization in Economic Administration János Kornai, 2023-08-05 Overcentralization in Economic Administration Oxford 1959 was the first book written by an Eastern European and published in the West that openly criticized socialist central planning In this work the distinguished economist János Kornai begins a lifelong study of the economic organization of centrally planned economies Professor Kornai's aim in this book was to observe the reality of the working socialist system and to draw conclusions that were not distorted by the laws of Marxist political economy He provided a lucid and coherent account of conditions along with normative recommendations which influenced the Hungarian reform process culminating in the economic changes of 1968 Professor Kornai identified several systematic failures of the centrally planned economy and gave a prescient account of weak economic performance and eventual disintegration His argument for radical rather than partial change makes this book essential reading for those interested in the economics of transition in Eastern Europe Overcentralization in economic administration Janos Kornai, 1959

The Contradictions of "Real Socialism" Michael A. Lebowitz, 2012-08-01 What was real socialism the term which originated in twentieth century socialist societies for the purpose of distinguishing them from abstract theoretical socialism In this volume Michael A. Lebowitz considers the nature tendencies and contradictions of those societies Beginning with the constant presence of shortages within real socialism Lebowitz searches for the inner relations which generate these patterns He finds these in particular in what he calls vanguard relations of production a relation which takes the apparent form of a social contract where workers obtain benefits not available to their counterparts in capitalism but lack the power to decide within the workplace and society While these societies were able to claim major achievements in areas from health care to education to popular culture the separation of thinking and doing prevented workers from developing their capacities as fully developed human beings The relationship within real socialism between the vanguard as conductor and a conducted working class however did not only lead to the deformation of workers and those elements necessary for the building of socialism it also created the conditions in which enterprise managers emerged as an incipient capitalist class which was an immediate source of the crises of real socialism As he argued in *The Socialist Alternative* Real Human Development Lebowitz stresses the necessity to go beyond the hierarchy inherent in the relation of conductor and conducted and beyond the vanguard Marxism which supports this to create the conditions in which people can transform themselves through their conscious cooperation and practice i.e. a society of free and associated producers

The Sociology of Economic Life Mark Granovetter, 2018-04-17 This book incorporates classic and contemporary readings in economic sociology and related disciplines to provide students with a broad understanding of the many dimensions of economic life It discusses Max Weber's key concepts in economics and sociology

Problems of Communism, 1991

Bureaucracy and Political Development. (SPD-2), Volume 2 Joseph La Palombara,2015-12-08 What is the role of the public bureaucracy in social economic and political development What are the alternatives of development for newly emerging nation states How does a bureaucracy satisfy or inhibit the requisites of democratic development Twelve outstanding scholars Joseph LaPalombara Fritz Morstein Marx S N Eisenstadt Fred W Riggs Bert F Hoselitz Joseph J Spengler Merle Fainsod Carl Beck J Donald Kingsley John T Dorsey Ralph Braibanti and Walter B Sharp approach these questions both by historical analysis in the U S and in a score of countries in Europe Asia and Africa and by empirical field research in such varied places as Nigeria Pakistan and Viet Nam Originally published in 1963 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Emerging India Bimal Jalan,2013-03-15 As India marks the twenty year milestone of economic liberalization some concerns about the country s future prospects as an emerging power are beginning to be voiced often these stem from the past history of sharp swings in India s fortunes Bimal Jalan one of the country s well known

economists and former Governor of the Reserve Bank of India has closely followed the path of India's economic policies across its changing trajectories from before the time the economy was liberalized to the very present. The pieces that appear here were all written during the last twenty years with the exception of three prescient notes from the mid 1970s highlighting the need for economic reforms to foster growth. The principal thought behind these essays is that in the past twenty years India's capacity to grow faster than ever before has increased substantially because of its comparative advantage in relation to other countries. However, Jalan points out that for India to seize the opportunities that lie ahead it is essential to bring about further reforms in the running of India's politics and administration in order to ensure inclusive and incremental economic growth.

Remaking the Economic Institutions of Socialism Victor Nee, David Stark, 1989. To what extent can contemporary socialist economies be reformed by the introduction of markets? The question is usually debated in either a Chinese or an East European context. This collection of eleven essays is unique in taking the first steps toward a comparative analysis. Twenty years of experience with reforms in Hungary and a decade of experimentation with reforms in China provide a critical mass of evidence for analyzing the problems endemic to centrally planned economies and the dilemmas faced in efforts to reform them. In reflecting on the Chinese and East European experiences, these essays trace the shift from a conception of reform as a mix of planning and markets within the state sector to a socialist mixed economy with implications for the emergence of new social groups and autonomous social organizations. The essays exemplify a new perspective in the study of state socialism that changes the focus from ideologies to economic institutions, examining how the activities of subordinate groups place limits on the power of state elites. The authors include scholars who have shaped debates in Eastern Europe and whose work is now stimulating much discussion in China as well as representatives of a younger generation of economists, sociologists, and political scientists writing on the basis of field research recently conducted in factories, cities, and villages in China and Eastern Europe. The contributors are Włodzimierz Brus, Walter D. Connor, Zhiren Lin, Victor Nee, Susan Shirk, David Stark, Ivan Szelenyi, and Martin King Whyte. An introductory essay surveys recent theories and research on state socialism and outlines a new institutional perspective for understanding the dilemmas of partial reforms, the political cycles of reform and retrenchment, and the role of subordinate groups in stimulating changes outside the state sector.

Comparative Economics in a Transforming World Economy, third edition J. Barkley Rosser, Jr., Marina V. Rosser, 2018-01-26. An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements with updated country case studies. Comparative economics with its traditional dichotomies of socialism versus capitalism, private versus state and planning versus market is changing. This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field. This new edition examines a wide variety of institutional and systemic arrangements, many of which reflect deep roots in countries' cultures and histories. The book has

been updated and revised throughout with new material in both the historical overview and the country case studies It offers a broad survey of economic systems then looks separately at market capitalism Marxism and socialism and new traditional economies with an emphasis on the role of religions Islam in particular in economic systems It presents case studies of advanced capitalist nations including the United States Japan Sweden and Germany alternative paths in the transition from socialist to market economies taken by such countries as Russia the former Soviet republics Poland China and the two Koreas and developing countries including India Iran South Africa Mexico and Brazil The new chapters on Brazil and South Africa complete the book s coverage of all five BRICS nations the chapter on South Africa extends the book s comparative treatment to another continent The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues Each chapter ends with discussion questions **A**

History of Modern Political Thought in East Central Europe Balázs Trencsényi,Michal Kopeček,Luka Lisjak Gabrijelčič,Maria Falina,Mónika Baár,Maciej Janowski,2018-10-18 A History of Modern Political Thought in East Central Europe is a synthetic work authored by an international team of researchers covering twenty national cultures and 250 years It goes beyond the conventional nation centered narratives and presents a novel vision especially sensitive to the cross cultural entanglement of political ideas and discourses Its principal aim is to make these cultures available for the global market of ideas and revisit some of the basic assumptions about the history of modern political thought and modernity as such The present volume is a sequel to Volume I Negotiating Modernity in the Long Nineteenth Century It begins with the end of the Great War depicting the colorful intellectual landscape of the interwar period and the increasing political and ideological radicalization culminating in the Second World War Taking the war experience both as a breaking point but in many ways also a transmitter of previous intellectual traditions it maps the intellectual paradigms and debates of the immediate postwar years marked by a negotiation between the democratic and communist agendas as well as the subsequent processes of political and cultural Stalinization Subsequently the post Stalinist period is analyzed with a special focus on the various attempts of de Stalinization and the rise of revisionist Marxism and other critical projects culminating in the carnivalesque but also extremely dramatic year of 1968 This volume is followed by Volume II Negotiating Modernity in the Short Twentieth Century and Beyond Part II 1968 2018 **A Research Annual** Ross B. Emmett,Jeff E. Biddle,Warren J. Samuels,2009-06-09 Contains refereed articles on constrasting relational conceptions of the individual in economics This book also covers the development of Adam Smith s style of lecturing a comparison of problems encountered in the historian s work as editor based upon editing Harrod s papers and Haberler s Prosperity and Depression Planning and Market Relations International Economic Association,1971 Conference report on economic planning market competition and trade in capitalist and communist economic systems includes papers on consumption and accumulation as economic objectives of socialist production monopoly policy centralization of the social decision making process and price regulation theoretical

aspects of the non market determination of interest rate based on production function analysis etc References and statistical tables Conference held in liblice 1970 may Industrial Policy in Europe after 1945 C. Grabas,A. Nützenadel,2014-03-31 Bringing together renowned scholars in the field with younger researchers this interdisciplinary study of the history of post war industrial policy in Europe investigates transfers across borders and locates industrial policy in the context of the Cold War from a global perspective **Wealth of Persons** Fr. John McNerney,2016-08-31 Thomas Piketty s Capital in the Twenty First Century initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike Wealth of Persons offers a totally different perspective that challenges the very terms of the debate The Great Recession reveals a great existential rift at the core of certain economic reflections thereby showing the real crisis of the crisis of economics In the human sciences we have created a kind of Tower of Babel where we cannot understand each other any longer The breakdowns occur equally on the personal social political and economic levels There is a need for an about face in method to restore harmony among dissociated disciplines Wealth of Persons offers a key to such a restoration applying insights and analysis taken from different economic scholars schools of thought philosophical traditions various disciplines and charismatic entrepreneurs Wealth of Persons aims at recapturing an adequate understanding of the acting human person in the economic drama one that measures up to the reality The investigation is a passport allowing entry into the land of economic knowledge properly unfolding the anthropological meaning of the free economy Communist Planning versus Rationality János Mátyás Kovács,2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning **From Marx to Mises** David Ramsay Steele,2013-12-15 In 1920 Ludwig von Mises proclaimed that all attempts to establish socialism would come to grief for reasons of informational efficiency At first socialists and economists took Mises s argument seriously but by the end of the Second World War a consensus prevailed that Mises had been discredited More recently that consensus has been rapidly reversed it

is now widely agreed that Mises was right Yet the momentous implications of the Mises argument for economics politics culture and philosophy remain largely unexplored From Marx to Mises is a clear penetrating exposition of the economic calculation debate and a scrutiny of some of the broader issues it raises

From Communists to Foreign Capitalists Nina Bandelj, 2011-10-16 From Communists to Foreign Capitalists explores the intersections of two momentous changes in the late twentieth century the fall of Communism and the rise of globalization Delving into the economic change that accompanied these shifts in central and Eastern Europe Nina Bandelj presents a pioneering sociological treatment of the process of foreign direct investment FDI She demonstrates how both investors and hosts rely on social networks institutions politics and cultural understandings to make decisions about investment employing practical rather than rational economic strategies to deal with the true uncertainty that plagues the postsocialist environment The book explores how eleven postsocialist countries address the very idea of FDI as an integral part of their market transition The inflows of foreign capital after the collapse of Communism resulted not from the withdrawal of states from the economy as is commonly expected but rather from the active involvement of postsocialist states in institutionalizing and legitimizing FDI Using a wide array of data sources and combining a macro level account of national variation in the liberalization to foreign capital with a micro level account of FDI transactions in the decade following the collapse of Communism in 1989 the book reveals how social forces not only constrain economic transformations but also make them possible From Communists to Foreign Capitalists is a welcome addition to the growing literature on the social processes that shape economic life

Planning and Profits in Socialist Economies Jean-Charles Asselain, 2013-11-05 This study of economic reforms throughout Eastern Europe covers the history of attempts at decentralization The book Describes the centralized model and compares its requirements with the realities of socialist countries Discusses the economic policies of the post Stalinist period Examines the origin of the reforms which began in 1956 culminating in the Soviet economic reform of 1965 and the rehabilitation of profit Countries covered include the former USSR the former East Germany and Hungary

This Enthralling World of Kindle Books: A Detailed Guide Revealing the Advantages of E-book Books: A World of Convenience and Flexibility E-book books, with their inherent mobility and ease of access, have freed readers from the limitations of physical books. Gone are the days of carrying bulky novels or meticulously searching for specific titles in shops. E-book devices, sleek and lightweight, effortlessly store an wide library of books, allowing readers to indulge in their preferred reads anytime, everywhere. Whether traveling on a bustling train, relaxing on a sunny beach, or simply cozying up in bed, Kindle books provide an unparalleled level of convenience. A Literary Universe Unfolded: Discovering the Vast Array of E-book Overcentralization In Economic Administration Overcentralization In Economic Administration The Kindle Store, a digital treasure trove of literary gems, boasts an extensive collection of books spanning varied genres, catering to every readers taste and choice. From captivating fiction and thought-provoking non-fiction to classic classics and contemporary bestsellers, the Kindle Shop offers an exceptional variety of titles to discover. Whether looking for escape through engrossing tales of fantasy and exploration, delving into the depths of historical narratives, or broadening ones knowledge with insightful works of science and philosophical, the Kindle Shop provides a doorway to a literary world brimming with endless possibilities. A Revolutionary Factor in the Literary Scene: The Persistent Impact of E-book Books Overcentralization In Economic Administration The advent of Kindle books has unquestionably reshaped the bookish landscape, introducing a paradigm shift in the way books are released, disseminated, and read.
